*Apples (0130010), pears (0130020), apricots (0140010), cherries(sweet) (0140020), peaches (0140030), plums (0140040), table grapes (0151010), wine grapes (0151020), Sunflower seeds (0401050), Rapeseeds/ canola seeds (0401060), sugar beet roots (0900010), swine: liver (1011030), swine: edible offals (other than liver and kidney) (1011050), bovine: kidney (1012040), bovine: edible offals (other than liver and kidney) (1012050), sheep: edible offals (other than liver or kidney) (1013050), goat: edible offals (other than liver or kidney) (1014050), equine: kidney (1015040), equine: edible offals (other than liver and kidney) (1015050), other farmed terrestrial animals: muscle (1017010), other farmed terrestrial animals: fat tissue (1017020), other farmed terrestrial animals: liver (1017030), other farmed terrestrial animals: kidney (1017040), other farmed terrestrial animals: edible offals (other than liver and kidney) (1017050). For reference, the full list of GB commodity codes is set out in Part 1 of the GB pesticides Maximum Residue Level statutory register –see link).*

**New or raised GB MRLs for mefenfentrifluconazole amending the GB MRL Statutory Register.**

Mefenfentrifluconazole is an approved active substance in GB. An application was received by the Health and Safety Executive to set new MRLs for apples, pears, apricots, cherries, peaches, plums, table grapes, wine grapes, sunflower seeds, rapeseeds, sugar beet roots and products of animal origin. Following assessment, new or raised MRLs have been introduced to accommodate new authorisations of plant protection products in GB and to set Import Tolerances. The Evaluation Report and Reasoned Opinion supporting the new or raised MRLs is available at the following link. A complete list of the new or raised MRLs is available within this document, see page 7-9: The evaluation of the new MRLs for mefenfentrifluconazole in or on various commodities (hse.gov.uk) The residue levels arising in food or feed from the notified uses result in consumer exposures below the toxicological reference values and therefore harmful effects on human health are not expected. As the residue levels exceed the current MRLs in force, new or raised MRLs are being adopted.

*Grain and seeds for consumption, feed or processing*

08/04/2023

**Import Health Standard: Grain and Seeds for Consumption, Feed or Processing.**

MPI is amending the Import Health Standard: Grain and Seeds for Consumption, Feed or Processing. The import health standard dated 2 February 2023 replaces the earlier version of the standard dated 22 December 2022. The amendment is to remove the following viruses from the Phaseolus spp. and Pisum spp. pest list, along with the specific import requirements for these viruses in the specified hosts:

Phaseolus spp.:

- Broad bean mottle virus
- Cowpea severe mosaic virus
- Pea early-browning virus
- Peanut mottle virus

Pisum spp.:

- Peanut mottle virus
- Peanut stunt virus

Consultation is not required for this amendment. This is because consultation was conducted when removing these organisms from the seeds for sowing import health standard (the highest-risk pathway for the import of seeds) and no concerns were raised during the consultation period.

*Used agricultural machineries*

08/04/2023

**Import requirements for used agricultural machineries.**

As of 1 March 2023 Türkiye will require a phytosanitary certificate indicating that used agricultural machinery products (HS codes given below) do not contain soil, pests and plant residues in the additional declaration section of the certificate and these products shall be subject to phytosanitary control upon entry into the country. The additional declaration section of the phytosanitary certificate issued by the NPPO of the exporting country for the import of the machineries in question to Türkiye should include an additional statement explained below: "The machineries have been controlled and cleaned before export and are free from soil, pests and plant residues (including seeds and other plant parts capable of propagation)." Additional declaration requirement is relevant for following products given in HS codes below:

84.32 Agricultural, horticultural or forestry machinery for soil preparation or cultivation; lawn or sports-ground rollers. (used or renovated)

84.33 Harvesting or threshing machinery, incl. straw or fodder balers; grass or hay mowers; machines for cleaning, sorting or grading eggs, fruit or other agricultural produce; parts thereof (other than machines for cleaning, sorting or grading seed, grain or dried leguminous vegetables of heading 8437) (used or renovated)

8436.80.10.00.00 Forestry machinery (used or renovated)

8701.21.90.00.00 Used

8701.91.10.00.00 Agricultural tractors and forestry tractors, wheeled (used or renovated)

8701.92.10.00.00 Agricultural tractors and forestry tractors, wheeled (used or renovated)

8701.93.10.00.00 Agricultural tractors and forestry tractors, wheeled (used or renovated)  
 8701.94.10.00.00 Agricultural tractors and forestry tractors, wheeled (used or renovated)  
 8701.95.10.00.00 Agricultural tractors and forestry tractors, wheeled (used or renovated)  
 Accordingly, the above-mentioned products shall be returned or destroyed in the event that they do not carry a phytosanitary certificate containing the additional declaration issued by the NPPO of the exporting country and if they are not found suitable (the presence of any of the causes of soil, pests, plant residues, reproduce seeds and other plant parts capable of propagation) as a result of the phytosanitary control to be carried out upon entry into Türkiye.

*Breeding and non-breeding animals and germinal products (forcattle, breeding female and male bovine animals and male cattle for breeding and slaughtering)*

20/02/2023

**Communiqué on Import of Breeding and Non-breeding Animals and Germinal Products.**

The purpose of this communiqué is to regulate the issues related to the importation of breeding and non-breeding animals and germinal products. This communiqué covers:

- breeding and non-breeding animals and germinal products;
- the approval of the Control Document required for the import of fattening, slaughtering cattle and sheep-goat type animals, equidae, poultry, bees and other animals and germinal products;
- document requirements and the issues related to the issuance of the Veterinary Health Certificate.

The Communiqué regulates the conditions that restrict the approval of the Control Document, the issuance and validity period of the Veterinary Health Certificate. The Communiqué provides the opportunity to prepare and approve documents in electronic environment. This Communiqué brings together other legislation that was previously in effect. It contains revisions that make it easier in practice.

Australia

*Dairy products for human consumption*

31/03/2023

**Import risk review for dairy products for human consumption: draft report.**

The Australian Government Department of Agriculture, Fisheries and Forestry has released the Import risk review for dairy products for human consumption: draft report (the review) for a 60-day consultation period. The review aims to modernise Australia's dairy import conditions

to reflect the current and future trading environment. It considers the biosecurity risks associated with importing (from any country) dairy products for human consumption manufactured from milk obtained from domestic cattle, buffalo, sheep, and goats. It takes into account new and relevant peer-reviewed scientific information, international standards, relevant changes in industry practices and operational practicalities. The review identified six hazards of biosecurity concern for imported dairy products. We undertook risk assessments for each and proposed measures to manage the biosecurity risks. The draft report proposes expanded risk management options for countries not recognised by the department as free from foot-and-mouth disease and/or lump skin disease and/or sheep and goat pox.

*Seed potatoes*  
**Details of Planned Amendments to Commission Implementing Regulation (EU) 2019/2072 to correct the table of threshold tolerances for the presence of Regulated Non-Quarantine Pests (RNQPs) on the growing plants for seed potatoes entering and moving within Great Britain.**

10/04/2023

Amendments are being made to England, Scotland and Wales (Great Britain) retained legislation (Commission Implementing Regulation (EU) 2019/2072). The amendments to retained Commission Implementing Regulation (EU) 2019/2072 will correct the second table in Annex 5, Part F which provides threshold tolerances for the presence of Regulated Non-Quarantine Pests (RNQPs) on the growing plants of seed potatoes entering and moving within Great Britain. Please see the attachment in section 5 above which contains the proposed table.

**Proposed GB MRLs for thiram amending the GB MRL Statutory Register.**

11/04/2023

The document outlines the proposed MRLs for thiram following a review of the relevant MRLs by the Health and Safety Executive. The draft Reasoned Opinion on the review of the MRLs is available at the following link: The review of the MRLs for thiram - Proposed MRLs. All MRLs are being lowered to the limit of quantification as the risks of a harmful effect on human health means that the appropriate level of human protection is not met. This measure only proposes to lower the specific MRLs for thiram (determined specifically as thiram). At this time there are no proposals to amend the MRLs for dithiocarbamates (total dithiocarbamates, determined as CS2).
