G/SPS/N/CAN/1545 05/02/2024	Canada	<p><i>Municipal biosolids imported as fertilizers -HS codes: 38.25.20 (Sewage sludge) and 38.25.10 (Municipal waste)</i></p> <p>Implementation of the interim per-and polyfluoroalkyl substances standard for municipal biosolids imported or sold in Canada as fertilizers.</p> <p>The interim standard for PFAS in biosolids is based on the concentration of perfluorooctane sulfonate (PFOS) used as an indicator which cannot exceed 50 ppb (parts per billion) of the final product per kg of dry weight. Compliance with the limit will be verified at import and through domestic inspection via a certificate of analysis (CoA) generated by the importer using a standard method for testing and an accredited laboratory. The CoA will have to be accompanied by an attestation of its validity (template form will be provided by the CFIA). The interim standard for PFAS is part of GoC suite of measures aimed at reducing human and environmental exposure to PFAS which are highly persistent and toxic organic pollutants. The CFIA's standard for municipal biosolids focuses on the end of the product's life cycle, namely disposal of industrial and household wastes. It will prohibit the importation of heavily contaminated biosolids thus minimizing risks to agricultural crops, soil health and productivity, plants, animals and the food supply chain.</p>	05/04/2024

Saudi
Arabia,
Kingdom of

Poultry meat, eggs and their products

Notice of Administration Order of Saudi Food and Drug Authority Ref. No. 19185 dated 23 January 2024 entitled "Temporary ban on importation of poultry meat, eggs and their products originating from Vendée in France".

Following the WOAHA report dated 18 January 2024, a Highly Pathogenic Avian Influenza (HPAI) virus outbreak has occurred in Vendée in France. In compliance with the World Organization for Animal Health (WOAH), Terrestrial Animal Health Code Chapter 10.4, it is deemed necessary for the Kingdom of Saudi Arabia to prevent the entry of the HPAI virus into the country. Therefore, the import of poultry meat, eggs and their products from Vendée in France to the Kingdom of Saudi Arabia is temporarily suspended (with the exception of processed poultry meat and egg products exposed to either heat or other treatments that ensure deactivation of the HPAI virus, as long as it conforms with the approved health requirements, and standards, with a health certificate issued by the official bodies in France prove that the product is free from the virus).

- 6.method for assessing the health risks or potential reduced health risks of tobacco-free oral nicotine pouches.

G/SPS/N/BRA/2246 06/02/2024	Brazil	<i>Environment. Health protection. Safety (ICS code(s): 13)</i> Draft Resolution 1230, 1 February 2024. This draft resolution proposes the inclusion of active ingredient C89 -CINMETHYLIN on the Monograph List of Active Ingredients for Pesticides, Household Cleaning Products and Wood Preservatives, which was published by Normative Instruction 103 on 19 October 2021 in the Brazilian Official Gazette (DOU -Diário Oficial da União).	01/04/2024
G/SPS/N/BRA/2247 06/02/2024	Brazil	<i>Environment. Health protection. Safety (ICS code(s): 13)</i> Draft Resolution 1231, 1 February 2024. This draft resolution proposes the exclusion of active ingredient S07 -SULFLURAMIDE on the Monograph List of Active Ingredients for Pesticides, Household Cleaning Products and Wood Preservatives, which was published by Normative Instruction 103 on 19 October 2021 in the Brazilian Official Gazette (DOU -Diário Oficial da União).	18/03/2024
G/SPS/N/EU/716 06/02/2024	European Union	<i>Preparations of a kind used in animal feeding (HS code(s): 2309)</i> Draft Commission Implementing Regulation withdrawing from the market star anise terpenes from <i>Illicium verum</i> Hook.f. as a feed additive (Text with EEA relevance). The draft act concerns the withdrawal from the EU market of star anise terpenes from <i>Illicium verum</i> Hook.f. as a feed additive belonging to the functional group of 'flavouring compounds'. That additive was allowed on the EU market under the previous legislation (Directive 70/524/EEC), as part of a generic entry within the group of 'flavouring and appetising substances' and was the subject of an application for re-authorization submitted under Article 10(2) of Regulation (EC) No 1831/2003. In its opinion of 26 September 2023, the European Food Safety Authority ('EFSA') concluded that the additive star anise terpenes contains up to 25% estragole by specification and is obtained by a manufacturing process which results in the enrichment of this genotoxic carcinogen. EFSA further	

stated that this does not comply with the principles outlined in the general approach to assess the safety for the target species of botanical preparations which contain compounds that are genotoxic and/or carcinogenic when used as feed additives. Therefore, EFSA considered that it was inappropriate to perform an assessment of the safety and efficacy of star anise terpenes for its use as a feed additive. The applicant subsequently withdrew the application for re-authorization of that feed additive for all animal species. As a result of the withdrawal of the application, Article 10(5) of Regulation (EC) No 1831/2003 imposes the adoption of a measure requiring the withdrawal from the market of the additive concerned. It is proposed to provide a limited period of time – which is kept to a minimum due to the safety concerns raised in the relevant EFSA opinion – in order to allow operators to comply properly with the measure.
