G/SPS/N/CAN/1477 20/02/2023	Canada	<p><i>Use of Lactase from Bacillus subtilisDH617 in Lactose-reducing Enzyme Preparations and Certain Dairy Foods (ICS code: 67.220.20)</i></p> <p>Notice of Modification to the List of Permitted Food Enzymesto Enable the Use of Lactase from Bacillus subtilisDH617 in Lactose-reducing Enzyme Preparations and Certain Dairy Foods.</p> <p>Health Canada's Food Directorate completed a premarket safety assessment of a food additive submission seeking approval for the use of lactase from Bacillus subtilisDH617 in certain dairy foods. Lactase from other sources is already permitted for use in Canada in lactose-reducing enzyme preparations and certain dairy products. Prior to this notice, B. subtilisDH617 was not a permitted source for any food enzyme in Canada. The results of the premarket assessment support the safety of lactase from B. subtilisDH617 for its requested uses. Consequently, Health Canada has enabled the use of lactase from this source as described in the information document below by modifying the List of Permitted Food Enzymes, effective 6 February 2023. The purpose of this communication is to publicly announce the Department's decision in this regard and to provide the appropriate contact information for those wishing to submit an inquiry or new scientific information relevant to the safety of this food additive.</p>	21/04/2023
G/SPS/N/CAN/1478 20/02/2023	Canada	<p><i>Use of Erythritol to Ready-to-eat Breakfast Cereals and their Coatings (ICS code: 67.220.20)</i></p> <p>Notice of Modification to the List of Permitted Sweetenersto Extend the Use of Erythritol to Ready-to-eat Breakfast Cereals and their Coatings.</p> <p>Health Canada's Food Directorate completed a premarket safety assessment of a food additive submission seeking authorization for the use of erythritol in granola and other ready-to-eat (RTE) breakfast cereals and coatings for RTE breakfast cereals. Erythritol is already permitted for use as a food additive in various foods in Canada. The results of the premarket assessment support the safety of erythritol for its requested uses. Consequently, Health Canada has enabled the use of erythritol described in the information document below by modifying the List of Permitted Sweeteners, effective 2 February 2023. The purpose of this communication is to publicly announce the Department's decision in this regard and to provide the appropriate contact information for those wishing to submit an inquiry or new scientific information relevant to the safety of this food additive.</p>	17/04/2023

This Regulation is a measure transposing Codex MRLs (CXLs), for which the European Union has not reserved its position in the 52nd Codex Committee for Pesticides Residues (CCPR), into EU legislation.	
G/SPS/N/NZL/709 21/02/2023	New Zealand	<i>Dracaena whole plants and cuttings</i> Import health standard 155.02.06: Importation of Nursery Stock.	03/03/2023

The New Zealand Ministry for Primary Industries is publicly consulting on the following proposed amendments to the import health standard 155.02.06: Importation of Nursery Stock:

- Amending the current onshore chemical treatment options for *D. deremensis* whole plants and non-dormant cuttings;
- Adopting the onshore chemical treatment options to all whole plants and non-dormant cuttings *Dracaena* species eligible for importation into New Zealand;
- Adding a spraying option for the application of the onshore chemical treatment for whole plants and non-dormant cuttings of *Dracaena* species;
- Clarifying that onshore treatment is mandatory for all whole plants and non-dormant cuttings *Dracaena* species.

Transferring the *Dracaena* onshore treatment requirements to the New Zealand Approved Biosecurity Treatments Standard (ABTRT).

Department of Agriculture Memorandum Order No. 15 Series of 2023, "Temporary Ban on the Importation of Domestic and Wild Birds and their Products including Poultry Meat, Day-Old Chicks, Eggs, and Semen originating from Türkiye".

The Order, signed on 17 February 2023, bans the importation of domestic and wild birds and their products, including poultry meat, day-old chicks, eggs, and semen. It also immediately suspends the processing, evaluation of the application and issuance of SPS import clearance for the said commodities. All shipments coming from Türkiye that are IN TRANSIT/LOADED/ACCEPTED UNTO PORT before the official communication of this Order to the Turkish Authorities shall be allowed provided that the products were slaughtered/produced on or before 17 January 2023. Shipments which have not complied with the conditions set forth in Item 3 shall be dealt with as per DA AO 9 s.2010 Section VII.D. All shipments of the aforementioned goods (with the exception of heat-treated products) into the country shall be stopped by all Veterinary Quarantine Officers/Inspectors at all major ports of entry.

Administrative Regulation No. 02/2023 Amendment to Administrative Regulation No. 11/2020 (Maximum residue limits of pesticides in foodstuffs).

In order to ensure food safety and better supervise pesticide residues in food, amendments have been introduced to the Administrative Regulation No.11/2020 Maximum residue limits of pesticides in foodstuffs), expanding its scope of coverage on pesticides and categories of foodstuffs. The Administrative Regulation No.02/2023, a food safety standard that regulates the levels of pesticide residues in food, amends the Administrative Regulation No. 11/2020 to replace the provisions of the attached tables and revise the appendix to include Table 1 (List of maximum levels of pesticide residues in foodstuffs) and Table 2 (List of maximum limits of exogenous residues of pesticides in foodstuffs). This administrative regulation establishes the maximum residue limits and extraneous maximum residue limits of pesticides presenting in foodstuffs, as well as the list of pesticides exempted from maximum residue limits, as stipulated in the annexes to the regulation. In this administrative regulation, "pesticide" is defined as any substance intended for preventing, destroying, attracting, repelling, or controlling pests during the production, storage, transport, distribution, and processing of food, or which may be administered to animals for the control of ectoparasites, including substances intended for use as plant-growth regulators, defoliants, desiccants, fruit thinning agents or sprouting inhibitors, and substances applied to crops either before or after harvest to prevent deterioration during storage and transport, and excluding fertilizers, plant and animal nutrients, food additives and veterinary drugs. According to the administrative regulation, maximum residue limits and extraneous maximum residue limits of pesticides in foodstuffs shall comply with the standards stipulated in the annexes.
