**New GB MRLs for ametodactrin amending the GB MRL Statutory Register**

Ametoctradin is an approved active substance in Great Britain (GB). An application was received by the Health and Safety Executive requesting to amend the existing Maximum Residue Level (MRL). Following assessment, a new MRL for ametoctradin in honey has been introduced, raising it from 0.05\* mg/kg to 5.00 mg/kg to support a new authorization of Plant Protection Products in GB. The Evaluation Report/Reasoned Opinion supporting the new MRL is available at the following link: The evaluation of a new MRL for ametoctradin in honeyThe residue levels arising in food from the notified uses result in consumer exposures below the toxicological reference values. As the residue levels exceed the current MRL in force, a new MRL is being adopted. There is no CXL for honey.

#### **New GB MRLs for mefentrifluconazole amending the GB MRL Statutory Register**

Mefentrifluconazole is an approved active substance in Great Britain (GB). An application was received by the Health and Safety Executive to set new Maximum Residue Levels (MRLs) for various commodities (listed in section 3). Following assessment, new MRLs have been introduced to accommodate new authorizations of a plant protection product in GB and to set import tolerances. The new MRLs are all an increase from those previously in force. The Evaluation Report/Reasoned Opinion supporting the new MRLs is available at the following link: The evaluation of new MRLs for Mefentrifluconazole in or on various commodities. The residue levels arising in food and feed from the notified uses result in consumer exposures below the toxicological reference values. As the residue levels exceed the current MRLs in force, new MRLs are being adopted.

#### **Proposed GB MRLs for dithianon amending the GB MRL Statutory Register**

Dithianon is an approved substance in Great Britain. In line with the UK’s regulatory regime, The Health and Safety Executive (HSE) has carried out a review of the GB Maximum Residue Levels (MRLs) for dithianon. Following assessment new MRLs are proposed for adoption: Citrus fruits (0.01\* mg/kg), Apples (1 mg/kg), Pears (1 mg/kg), Apricots (2 mg/kg), Plums (2 mg/kg), Wine grapes (5 mg/kg), Raspberries (red and yellow) (0.01\* mg/kg), Currants (red, black and white) (2 mg/kg), Hops (300 mg/kg). The Evaluation Report/Reasoned Opinion supporting the new MRLs is available at the following link: The review of the MRLs for apples and pears and CXLs for dithianon - proposed MRLs.docx. The assessment/reasoned opinion has concluded that the current GB MRLs for apples, pears, citrus fruits, raspberries (red and yellow), and currants (red, black and white) need to be lowered to satisfy the UK’s

17/04/2026

appropriate level of protection for these commodities. For apricots, plums, wine grapes, and hops, the current MRLs are being increased, in line with CXLs, for these commodities. All the proposed MRLs result in consumer exposures below the toxicological reference values, and therefore harmful effects on human health are not expected.

**Draft Commission Delegated Regulation amending and correcting Delegated Regulation (EU) 2020/692 supplementing Regulation (EU) 2016/429 of the European Parliament and of the Council as regards rules for entry into the Union, and the movement and handling after entry of consignments of certain animals, germinal products and products of animal origin (Text with EEA relevance)**

Commission Delegated Regulation (EU) 2020/692 supplements Regulation (EU) 2016/429 of the European

18/04/2026

Parliament and the Council as regards the animal health rules for entry into the Union and the movement and handling after entry of consignments of certain animals, germinal products and products of animal origin. Delegated Regulation (EU) 2020/692 applies from 21 April 2021. Since that date, that Delegated Regulation has been amended several times. Following these past amendments, some further minor errors have been detected in that Delegated Regulation. These mistakes and omissions should be corrected and changes introduced by amending Delegated Regulation (EU) 2020/692 accordingly. In addition, the experience gained on the application of that Delegated Regulation has shown the need to refine further several provisions related to the scope, application of specific conditions, animal identification, captive birds and their hatching eggs for conservation programmes, meat, dairy and egg products, eggs, composite products, vaccination programmes against highly pathogenic avian influenza, risk-mitigating treatments for milk and dairy products and egg products, aquatic and equine animals.

<p><a href="#">G/SPS/N/SAU/612</a> 18/02/2026</p>	<p>Saudi Arabia, Kingdom of</p>	<p><i>Pesticides and other agrochemicals (ICS code(s): 65.100)</i> <b>Pesticides used as baits for domestic rodents</b> This draft technical regulation specifies the technical requirements and conditions that must be met by pesticides used as rodent baits.</p>	<p>19/04/2026</p>
<p><a href="#">G/SPS/N/AUS/630</a> 19/02/2026</p>	<p>Australia</p>	<p><i>Edible meat and meat products derived from cattle, buffalo, camels, goats, deer, sheep, pigs, horses and donkeys; wild game; rabbit; poultry and ratite (emu, ostrich).</i> <b>Administrative updates to Australian Government edible meat and meat product sanitary and halal certificate templates used for exports from Australia</b> Australia is replacing its current export documentation system, known as the Export Documentation System (EXDOC), with a new version called the Next Export Documentation System (NEXDOC). The change of system from EXDOC to NEXDOC will result in changes to official Australian Government export certificate templates for Australian agricultural goods. Australia's export certification for edible meat and meat products such as meat, offal and meat products derived from cattle, buffalo, camels, goats, deer, sheep, pigs, horses and donkeys; wild game; rabbit; poultry and ratite (emu, ostrich) will soon transition to the NEXDOC system. This includes, where relevant, halal certification issued for halal meat and meat products. Australia has already transitioned a range of commodity specific export certification to the NEXDOC system including inedible animal products (October 2025), low-risk food items (May 2025), wool, skins and hides (November 2024), fish (September 2024), eggs (December 2023), honey (2022-2023), and dairy (May 2021). The planned changes do not affect bilaterally agreed information, conditions or attestations required by importing countries or the department's regulatory controls over exports. However, there are minor changes to formatting and the location of some of this information on the export certificate template. Electronic certification (eCert) is not affected by the planned changes. The NEXDOC export certificate templates have unique Quick Response (QR) codes that provide consignment specific information border officials can use to confirm authenticity of the certificate in real-time. To verify the QR code, border</p>	<p>20/04/2026</p>

officials scan the code through the official's smart phone camera. Australia proposes NEXDOC export certificate and, where relevant, halal certificate templates will be issued for edible meat and meat products from 20 April 2026. There will be a transition period where both the EXDOC and NEXDOC certificate templates will be in use to allow for transit time (air and sea freight) to the port of destination.

**Cancellation Order for Certain Pesticide Registrations and/or Amendments To Terminate Uses (from 20 November 2025 Notice)**

19/02/2026

This notice announces EPA's order for the cancellations and/or amendments to terminate uses, voluntarily requested by the registrants and accepted by the Agency, pursuant to the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA). This cancellation order follows a 20 November 2025 Federal Register Notice of Receipt of Requests from the registrants listed in Table 3 of Unit II, to voluntarily cancel and/or amend to terminate uses of these product registrations. In the 20 November 2025 notice, EPA indicated that it would issue an order implementing the cancellations and/or amendments to terminate uses, unless the Agency received substantive comments within the 30-day comment period that would merit its further review of these requests, or unless the registrants withdrew their requests. The Agency did not receive any comments on the notice. Further, the registrants did not withdraw their requests. Accordingly, EPA hereby issues in this notice a cancellation order granting the requested cancellations and/or amendments to terminate uses. Any distribution, sale, or use of the products subject to this cancellation order is permitted only in accordance with the terms of this order, including any existing stocks provisions.

This document announces the Agency's receipt of and solicits

comment on requests by registrants to voluntarily cancel their pesticide registration of certain products and/or to amend their product registrations to terminate one or more uses. In accordance with the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), EPA provides a periodic notice of receipt addressing requests received by EPA since the last notice of receipt was issued and uses the month and year in the title to help distinguish one document from the other. EPA intends to grant these requests at the close of the comment period for this announcement unless the Agency receives substantive comments during the comment period that would merit further review of the requests, or the request is withdrawn by the registrant. If these requests are granted, EPA will issue an order in the Federal Register cancelling the listed product registrations, after which any sale, distribution, or use of the products listed in this document will only be permitted after the registrations have been cancelled if such sale, distribution, or use is consistent with the terms as described in the final order.
