Nuevo Formato de Certificado Fitosanitario de Perú
 G/SPS/N/PER/971 Para evitar cualquier interrupción del comercio, Perú está notificando a sus socios comerciales que todos los certificados fitosanitarios se imprimirán en papel normal blanco con la impresión en blanco y negro. El nuevo certificado fitosanitario se implementará a partir del 10 de marzo de 2022 en adelante. Durante el período de transición, tanto el nuevo certificado como el certificado actual podrán presentarse durante un período de tiempo en consideración a la validez de los certificados emitidos antes del 10 de marzo de 2022. El SENASA enfatiza que estos certificados fitosanitarios siguen las Normas Internacionales para Medidas Fitosanitarias y mantienen las siguientes características de seguridad: a) El Logo del Ministerio de Desarrollo Agrario y Riego en la parte superior izquierda; b) El Logo del SENASA en la parte superior derecha; c) Un código de respuesta rápida (QR) único ubicado en la parte superior derecha debajo del logo de SENASA que permite la validación en línea. Adicionalmente, como medida de seguridad los CF emitidos por el SENASA pueden ser verificados a través del siguiente enlace: <https://servicios.senasa.gob.pe/verify/>.

Department of Agriculture Memorandum Order No. 24, Series of 2022, Temporary Ban on the Importation of Domestic and Wild Birds and their Products Including Poultry Meat, Day-old Chicks, Eggs and Semen Originating from Nova Scotia, Canada

G/SPS/N/PHL/511 The Order, signed on 7 March 2022, institutes the following emergency measures for the importation of domestic and wild birds and their products from Nova Scotia, Canada: 1) Banning the importation of domestic and wild birds and their products, including poultry meat, day-

old chicks, eggs and semen from Nova Scotia, Canada;2) Immediate suspension of the processing, evaluation of the application and issuance of SPS import clearance for the above-stated commodities;3) All shipments coming from Nova Scotia, Canada that are IN TRANSIT/LOADED/ACCEPTED UNTO PORT before the official communication of this Order to the Canadian authorities shall be allowed provided the products were slaughtered/produced before 16 January 2022;4) Shipments which have not complied with the conditions set forth in Item 3 shall be dealt with as per DA AO9 S. 2010 Section VII D.

G/SPS/N/CAN/1428 09/03/22	Canada	<p><i>Cellulose and microcrystalline cellulose (ICS Code: 67.220)</i> ICS codes: 67.220 (Spices and condiments. Food additives); Notice of Modification to the List of Permitted Anticaking Agents to Extend the Use of Cellulose and Microcrystalline Cellulose to Cubed, Diced, Grated or Shredded Plant-based Products that Resemble Cheese</p>	14/05/22
		<p>G/SPS/N/CAN/1428 Health Canada's Food Directorate completed a premarket safety assessment of a food additive submission seeking approval for the use of cellulose as an anticaking agent in non-dairy (i.e., plant-based) cheese flavoured preparations that are grated, shredded, cubed or diced. Both cellulose and microcrystalline cellulose are already permitted as anticaking agents in cubed, diced, grated or shredded cheddar cheese and other standardized varieties of cheese, as well as unstandardized cubed, diced, grated or shredded cheese preparations. The results of the premarket assessment support the safety of cellulose and microcrystalline cellulose for use as anticaking agents in plant-based products that resemble cheese that are cubed, diced, grated or shredded. Consequently, Health Canada has extended the use of cellulose and microcrystalline cellulose as described in the information document by modifying the List of Permitted Anticaking Agents, effective 1 March 2022. The purpose of this communication is to publically announce the Department's decision in this regard and to provide the appropriate contact information for those wishing to submit an inquiry or new scientific information relevant to the safety of these food additives.</p>	
G/SPS/N/EU/547 09/03/22	European Union	<p><i>Dried vine fruit, dried fruit other than dried vine fruit, certain liquorice products, dried herbs, certain ingredients for herbal infusions, certain oilseeds, pistachio nuts and cocoa powder, non-alcoholic malt beverages, date syrup, roasted and soluble coffee</i></p> <p>Draft Commission Regulation (EU) amending Regulation (EC) No 1881/2006 as regards maximum levels of ochratoxin A in certain foodstuffs (Text with EEA relevance)</p>	08/05/22
		<p>G/SPS/N/EU/547 The draft Regulation establishes maximum levels for ochratoxin A in dried fruit other than dried vine fruit, certain liquorice products, dried herbs, certain ingredients for herbal infusions, certain oilseeds, pistachio nuts and cocoa powder, non-alcoholic malt beverages, date syrup and lowers the maximum level for ochratoxin A in dried vine fruit, roasted coffee and soluble coffee.</p>

Genetically modified plant and plant products derived from the use of modern biotechnology

DOST-DA-DENR-DOH-DILG Joint Department Circular No. 01, series of 2021: Rules and Regulations for the Research and Development, Handling and Use, Transboundary Movement, Release into the Environment, and Management of Genetically Modified Plant and Plant Products Derived from the Use of Modern Biotechnology

G/SPS/N/PHL/512 The measure revised DOST-DA-DENR-DOH-DILG Joint Department Circular (JDC) No.1, Series of 2016, previously notified as G/SPS/N/PHL/373. Changes include the creation of a Joint Assessment Group (JAG) tasked to evaluate biosafety permit applications and make recommendations on the approval of a biosafety permit application. The Circular reiterates the function of the Bureau of Plant Industry (BPI) in the processing of biosafety application permits. In compliance to the Ease of Doing Business (EODB) Law, the application procedure for securing a biosafety permit was shortened from 85 working days to 40 working days. The new JDC provides that application for permits for regulated articles developed in other countries may be filed directly for a Biosafety Permit for Field Trial if BPI determines data set generated in other countries is applicable to the local setting. The JDC also only requires an applicant to publish a copy of the approved Public Information Sheet (PIS) in one newspaper of general circulation and in the official website of the applicant and of the Bureau of Plant Industry. All biosafety permits for Commercial Propagation and Direct Use for Food and Feed or for Processing to be issued shall be valid unless revoked for: 1. Provision of misleading information in the Application; 2. Discovery of new, relevant, and significant information that the regulated article poses greater risks to human health and the environment compared to its conventional counterpart; 3. Non-compliance with the conditions of the permit; and 4. Other grounds that the regulatory agencies may deem necessary to protect human health and the environment. The JDC includes a provision stating plants produced through conventional breeding of approved genetically modified parental lines and their derived products are not considered novel. Payment of fees is possible to cover the cost of re-evaluation of the decision made on applications. The Circular also provides regulated articles with existing original and renewed Biosafety Permits under the 2016 version of the document for Commercial Propagation and Direct Use shall remain valid unless otherwise revoked under conditions enumerated in Sections 15.J and Sections 18.J.
