It also concluded that it is considered a respiratory sensitiser. It further concluded that the preparation showed a potential to reduce the pH and the growth of coliforms in liquid feeds. The preparation of <i>Pediococcus acidilactici</i> CNCM I-4622 thus satisfies the conditions for authorisation, as provided for in Article 5 of Regulation (EC) No 1831/2003. Accordingly, the use of this preparation was authorised, specifying that appropriate protective measures be taken to prevent adverse effects for users of the additive.</p>
