| G/SPS/N/CAN/1492 13/03/2023 | Canada | <p>communication is to publicly announce the Department's intention in this regard and to provide the appropriate contact information for inquiries or for those wishing to submit new scientific information relevant to Health Canada's scientific assessment. Health Canada's Food Directorate is committed to reviewing new scientific information on the safety in use of any food additive that is permitted in Canada or is under consideration for approval in Canada, including already-permitted aluminum-containing food additives. Health Canada is able to consider information received by 22 May 2023, 75 days from the date of this posting.</p> <p><i>Transglutaminase from Streptomyces mobaraensis M2020197 in various foods (ICS code: 67.220.20)</i></p> <p>Notice of Modification to the List of Permitted Food Enzymes to Enable the Use of Transglutaminase from Streptomyces mobaraensis M2020197 in Various Foods</p> <p>Health Canada's Food Directorate completed a premarket safety assessment of a food additive submission seeking authorization for the use of transglutaminase from Streptomyces mobaraensis M2020197 in various foods. Transglutaminase from another source is already permitted for use in Canada in a number of the foods requested by the petitioner. Prior to this Notice, S. mobaraensis M2020197 was not a permitted source for any food enzyme in Canada. The results of the premarket assessment support the safety of transglutaminase from S. mobaraensis M2020197 for its requested uses. Consequently, Health Canada has enabled the use of transglutaminase from this source as described in the information document by modifying the List of Permitted Food Enzymes, effective 2 March 2023. The purpose of this information document is to publicly announce the Department's decision in this regard and to provide the appropriate contact information for those wishing to submit an inquiry or new scientific information relevant to the safety of this food additive.</p> | 15/05/2023 |
| G/SPS/N/CAN/1493 13/03/2023 | Canada | <p><i>Acetic Acid to 2'-Fucosyllactose (ICS code: 67.220.20)</i></p> <p>Notice of Modification to the List of Permitted Food Additives to Extend the Use of Acetic Acid to 2'-Fucosyllactose</p> <p>Health Canada's Food Directorate completed a premarket safety assessment of a food additive submission seeking authorization for the use of acetic acid as a crystallization aid and washing agent in the manufacture of 2'-fucosyllactose (2'-FL), which is to be used as an ingredient in infant formula and nutritional supplements for children one to three years of age (12-47 months). Acetic acid is already permitted for use in Canada in various foods as a pH adjusting agent or as a preservative. The results of the premarket assessment support the safety of acetic acid for its described use in the manufacture of 2'-FL. Consequently, Health Canada has extended the use of this food additive as described in the information document by modifying the List of Permitted Food Additives with Other Accepted Uses, effective 27 February 2023. The purpose of this information document is to publicly announce the Department's decision in this regard and</p> | 12/05/2023 |

| | | to provide the appropriate contact information for those wishing to submit an inquiry or new scientific information relevant to the safety of this food additive. | |
| G/SPS/N/CHN/1277 13/03/2023 | China | <i>Foods</i> National Food Safety Standard of the P.R.C.: Maximum Residue Limits for Pesticides in Foods This standard establishes 421 maximum residue limits (MRLs) for 85 pesticides, including abamectin, etc. in or on foods. | 12/05/2023 |
| G/SPS/N/USA/3370 13/03/2023 | United States of America | <i>Meat and edible offal of fowls of the species Gallus domesticus, ducks, geese, turkeys and guinea fowls, fresh, chilled or frozen (HS code(s): 0207); Sugar confectionery not containing cocoa, incl. white chocolate (HS code(s): 1704); Food technology (ICS code(s): 67)</i> Innophos, Inc.; Filing of Color Additive Petition The Food and Drug Administration (FDA or we) is announcing that we have filed a petition, submitted by Innophos, Inc., proposing that the color additive regulations be amended to provide for the safe use of tricalcium phosphate in poultry (chicken thigh), icing, white chocolate candy melts, doughnut sugar, and sugar for coated candies. The color additive petition was filed on 1 February 2023. | |
| G/SPS/N/URY/69 13/03/2023 | Uruguay | <i>Plaguicidas a base de Carbofuran, Metil paratión, Triclorfón, Diclorvós y Cihexatin</i> Proyecto de Resolución de la Dirección General de Servicios Agrícolas que prohíbe la importación, registro y renovación de productos fitosanitarios a base de ingredientes activos Carbofuran, Metil Paratión, Triclorfón, Diclorvós y Cihexatin La presente Resolución tiene por objetivo prohibir la importación, registro y renovación de los productos fitosanitarios a base de los ingredientes activos Carbofuran, Metil Paratión, Triclorfón, Diclorvós y Cihexatin. | 12/05/2023 |
| G/SPS/N/AUS/562 14/03/2023 | Australia | <i>Fresh blueberries and cranberries</i> New Zealand: Fresh blueberries and cranberries – Change to import conditions Australia will no longer regulate for blueberry rust (<i>Thekopsora minima</i>) on fresh blueberries and cranberries grown in New Zealand and imported into Western Australia and Tasmania. The quarantine status of blueberry rust in Western Australia and Tasmania has changed and is no longer under official control. As a result, Australia has removed the conditions for fresh blueberries and cranberries grown in New Zealand imported into these states to be free from blueberry rust in alignment with the import conditions for all Australian states and territories, other than South Australia. Australia will continue to regulate for blueberry rust on fresh blueberries and cranberries grown in New Zealand imported into South Australia. Further details of the import conditions for fresh blueberries and cranberries grown in New Zealand are available on the Australian Biosecurity Import Conditions website (BICON): https://bicon.agriculture.gov.au/ | |

| G/SPS/N/THA/624 17/03/2023 | Thailand | <p><i>Cattle and buffalo (HS 0102) and their products</i></p> <p>The DLD order on temporary suspension of importation of cattle and buffalo and their products and their products under Animal Epidemics Act B.E. 2558 (2015) from Myanmar</p> <p>The WOAHA reported an outbreak of Foot and Mouth Disease in Myanmar. Therefore, it is necessary for Thailand to prevent the entry of Foot and Mouth Disease into the country. By the virtue of Animal Epidemics Act B.E. 2558, the importation of cattle and buffalo and their products under Animal Epidemics Act B.E. 2558 (2015) from Myanmar is temporarily suspended for a period of 90 days since 1 March 2023 onward in the Thai Royal Gazette.</p> | |
| G/SPS/N/UKR/198 17/03/2023 | Ukraine | <p><i>Poultry meat</i></p> <p>Draft Order of the Ministry of Agrarian Policy and Food of Ukraine "On Amendments to the Order of the Ministry of Agrarian Policy and Food of Ukraine No. 813 of 20 October 2022 and Approval of the Requirements for Certain Quality Indicators for Poultry Me</p> <p>The draft Order provides for amendments to the Order of the Ministry of Agrarian Policy and Food of Ukraine No. 813 "On Approval of Hygienic Requirements for the Production and Circulation of Food Products of Animal Origin" of 20 October 2022 (notified as G/SPS/N/UKR/151) and approves requirements for certain quality indicators for poultry meat. The draft Order is developed with consideration of the amendments made to Regulation (EC) No. 853/2004 by the Commission Delegated Regulation (EU) No. 2022/2258, which entered into force on 8 December 2022 and provide, in particular: establishing new requirements for the transportation and storage of fish products in the case of using "supercooling" and three-layer polyethylene containers filled with water and ice; updating approaches to the requirements for the production and circulation of eggs. In particular, the minimum shelf life is established for eggs obtained from Gallus gallus chickens and the deadline for delivery of eggs to the consumer is changed (21 days is replaced by 28 days); establishing new requirements for the production of highly purified animal products (in terms of requirements for fat processing products, flavors, and methods of processing raw materials). The draft Order also establishes that: 1) hygienic requirements for the production and circulation of food products of animal origin, approved by this Order, will apply to food market operators engaged in export or have declared to the competent authority their intention to export, from the date of entry into force of this Order; 2) for food</p> | 16/05/2023 |
