| 03/24/2023 | United States of America | <i>Mango, papaya, and oil palm</i> Azoxystrobin; Pesticides Tolerances. Final Rule This regulation establishes tolerances for residues of azoxystrobin in or on mango, papaya, and oil palm. | |
| 03/24/2023 | Australia | <i>Foods in general</i> Proposal to amend Schedule 20 of the revised Australia New Zealand Food Standards Code (21 March 2023) This Proposal seeks to amend the Australia New Zealand Food Standards Code to align the following maximum residue limits (MRLs) for various agricultural and veterinary chemicals so that they are consistent with other national regulations relating to the safe and effective use of agricultural and veterinary chemicals:- Dodine, Fipronil, Fluopicolide, Indaziflam, Inpyrfluxam, Ipflufenquin, Mandestrobin, Mesotrione, Metrafenone, Propamocarb, Proquinazid, Prosulfocarb, Pyraclostrobin, Sethoxydim and Tetraniliprole in specified plant commodities;- Fluralaner, Indaziflam, Inpyrfluxam and Ipflufenquin in specified animal commodities. | 29/05/2023 |
| 03/24/2023 | New Zealand | <i>Dracaena whole plants and cuttings</i> Amendment to the Ministry for Primary Industries (MPI) Import health standard 155.02.06: Importation of Nursery Stock MPI has amended the import health standard 155.02.06: Importation of Nursery Stock effective 22 March 2023. This standard was amended to allow the use of an alternative onshore chemical treatment for the management of the regulated scale <i>Chrysomphalus aonidum</i> on all <i>Dracaena</i> whole plants and non-dormant cuttings eligible to be imported into New Zealand, in lieu of onshore methyl bromide fumigation. Additionally, the <i>Dracaena</i> onshore treatment requirements have been transferred to the MPI Approved Biosecurity Treatments Standard (ABTRT). | |
| 03/24/2023 | European Union | <i>Food products</i> Draft Commission Regulation amending Annex II to Regulation (EC) No 1333/2008 of the European Parliament and of the Council as regards the use of polyglycerol polyricinoleate (E 476) and the Annex to Commission Regulation (EU) No 231/2012 as regards specifications for glycerol (E 422), polyglycerol esters of fatty acids (E 475) and polyglycerol polyricinoleate (E 476) (Text with EEA relevance) The text revises the EU specifications of the authorised food additives glycerol (E 422), polyglycerol esters of fatty acids (E 475) and, polyglycerol polyricinoleate (E 476) and authorises an extension of use of polyglycerol | 23/05/2023 |

|-------------|---------------------|---|--------------------|
| 03/24/2023 | Thailand | <p>polyricinoleate (E 476) based on the recent scientific opinions from the European Food Safety Authority (EFS). For glycerol (E 422), the current specifications are adapted by reducing the maximum limits for toxic elements (arsenic, lead, mercury and cadmium), by deleting the identification method based on acrolein formation during heating, by deleting the test for the presence of acrolein, by including a maximum limit for acrolein and by modifying the definition of glycerol (E 422). For polyglycerol esters of fatty acids (E 475), the current specifications are adapted by reducing the maximum limits for toxic elements, by including maximum limits for the sum of 3-monochloropropanediol (3-MCPD) and 3-MCPD fatty acid esters (expressed as 3-MCPD), glycidyl fatty acid esters (expressed as glycidol) and erucic acid and by modifying the definition of polyglycerol esters of fatty acids (E 475). For polyglycerol polyricinoleate (E 476), the current specifications are adapted by reducing the maximum limits for toxic elements, by including maximum limits for the sum of 3-monochloropropanediol (3-MCPD) and 3-MCPD fatty acid esters (expressed as 3-MCPD) and glycidyl fatty acid esters (expressed as glycidol) and by modifying the definition of polyglycerol polyricinoleate (E 476).The text also authorises the use of polyglycerol polyricinolate (E 476) in food category 03 'Edible ices' at a maximum level of 4,000 mg/kg and in food category 12.6 'Sauces' at an increased maximum level of 8,000 mg/kg for emulsified sauces with a fat content of 20% or more.In order to allow for a smooth transition, the text lays down that the use of the food additives glycerol (E 422), polyglycerol esters of fatty acids (E 475) and polyglycerol polyricinolate (E 476) lawfully placed on the market before the date of the entry into force of this Regulation is allowed during a transitional period of six months. Foods containing such food additives may continue to be placed on the market during the same transitional period and may remain on the market until their date of minimum durability or 'use-by-date'. The food additive polyglycerol esters of fatty acids (E 475) legally placed on the market after the date of entry into force of this Regulation and complying with the reduced intermediate maximum level for glycidyl fatty acid esters (expressed as glycidol) is allowed to be used until the exhaustion of stocks and foods containing such food additive should be allowed to be placed on the market and to remain on the market until their date of minimum durability or 'use-by-date'.</p> <p><i>Live domestic pigs and their carcasses (HS Code(s): 0103, 0203, 0502.10.00); Wild pigs and their carcasses</i></p> <p>The DLD order on temporary suspension of importation of live domestic pigs and wild pigs and their carcasses from Germany to prevent the spread of African Swine Fever</p> | |

|-------------|---------------------|--|--------------------|
| | | <p>According to the announcement of the Government Gazette dated 16 December 2022, the suspension for importation of live domestic and wild pigs and their carcasses from Germany since 16 December 2022 has expired on 15 March 2023. However, the WOAHA has reported a continued outbreak of African Swine Fever in the area of Germany. Therefore, it is necessary for Thailand to prevent the entry of African Swine Fever disease into the country. By the virtue of Animal Epidemics Act B.E. 2558 (2015), the importation of live domestic and wild pigs and their carcasses from Germany is temporarily suspended for a period of 90 days since 16 March 2023 onward in the Thai Royal Gazette.</p> | |
| 03/23/2023 | Brazil | <p><i>Environment. Health protection. Safety (ICS code(s): 13)</i></p> <p>Draft Resolution number 1132, 15 December 2022</p> <p>The Draft Resolution number 1132, 15 December 2022 - previously notified through G/SPS/N/BRA/2125 - which is regarded the proposal for inclusion of active ingredient B61: Baculovirus Spodoptera littoralis on the Monograph List of Active Ingredients for Pesticides, Household Cleaning Products and Wood Preservers, published by Normative Instruction number 103 - 19 October 2021 on the Brazilian Official Gazette (DOU - Diário Oficial da União), was adopted as the Normative Instruction number 218, 20 March 2023. |-------------|---------------------|--|--------------------|
| 03/22/2023 | Thailand | <p>also increase agility and efficiency throughout the traceability system. The amendments will address the identified gaps in the current livestock traceability system by:</p> <ul style="list-style-type: none"> · adding farmed cervids and goats as regulated species; · include movement reporting requirements for all domestic movements of regulated species; · reduce the time to report information to a central database from 30-60 days to 7 days for all species; · and require more accurate location data be reported via the provincial premises identification programs which allocate premises identification numbers to agricultural sites. By addressing the gaps in the livestock traceability system, the regulatory proposal will strengthen the ability to protect Canada's food supply and animal resource base and reduce the impact of various events on Canada's national herd and the Canadian agriculture economy. Conforms with the World Organization of Animal Health's Terrestrial Animal Health Code, section 4.1 – General principles on identification and traceability of live animals. | |
| 03/22/2023 | Thailand | <p><i>Live poultry and poultry carcasses (HS code(s): 0105, 0207, 0407, 0408)</i></p> <p>The DLD order on temporary suspension of importation of live poultry and poultry carcasses from Chinese Taipei to prevent the spread of Highly Pathogenic Avian Influenza (Subtype H5N1)</p> <p>According to the announcement of the Government Gazette dated 11 November 2022, the suspension for importation of live poultry and poultry carcasses from Chinese Taipei since 13 November 2022 has expired on 10 February 2023. However, the WOAHA has reported a continued outbreak of Highly Pathogenic Avian Influenza (HPAI) (Subtype H5N2) in the area of Chinese Taipei. Therefore, it is necessary for Thailand to prevent the entry of disease into the country. By the virtue of Animal Epidemics Act B.E. 2558 (2015), the importation of live poultry and poultry carcasses from Chinese Taipei is temporarily suspended for a period of 90 days after the date of publication in the Thai Royal Gazette. (7 March 2023), except the feathers and down of poultry that have been processed in the approved establishment by the DLD and these commodities that have been processed to ensure the destruction of avian influenza virus recommended by WOAHA terrestrial Animal Health code topics 10.4.22 and 10.4.23 which use one of the following methods:-</p> <ul style="list-style-type: none"> - washed and steam-dried at 100°C for 30 minutes; - fumigation with formalin (10% formaldehyde) for 8 hours; - irradiation with a dose of 20 kilogray. | |

| | | <p>Consulta pública sobre propuesta de modificación de los artículos 169, 173 y 452 del Reglamento Sanitario de los Alimentos (Public consultation on the proposed amendment to Articles 169, 173 and 452 of the Food Health Regulations).</p> <p>The proposal amends the nomenclature of products that are currently classified as so-called dried fruits, to move to a more specific category: "tree nuts" this category includes groundnuts. The Code of Hygienic Practice for Tree Nuts (CAC/RCP 6-1972) and the Code of Hygienic Practice for Groundnuts (Peanuts) (CAC/RCP 22-1979) were taken into consideration. Nomenclature amendments are made under different articles and microbiological criteria are established, in the light of the provisions of Microorganisms in Foods 8, ICMSF. New microbiological criteria for tea (<i>Camellia sinensis</i>) and mate (<i>Ilex brasiliensis</i> and <i>I. paraguariensis</i>) and herbs for infusions are also proposed, in addition to the nomenclature amendments. The grounds for the consultation are set out in the same document. Further details can be found in the document attached to this notification.</p> | |

| | | <p>Regulation (EC) No 1107/2009. EU member States shall withdraw authorisations for plant protection products containing dimoxystrobin as an active substance. The non-renewal of approval is based on the first evaluation of the substance for use as a pesticide active substance in the European Union under Regulation (EC) No 1107/2009. The substance was formerly assessed and approved under Directive 91/414/ EEC. This decision only concerns the placing on the market of this substance and plant protection products containing it. Following non-approval and the expiry of all grace periods for stocks of products containing this substance, separate action will likely be taken on MRLs and a separate notification will be made in accordance with SPS procedures. This draft Commission Implementing Regulation was also notified under the TBT Agreement in notice G/TBT/N/EU/961.</p> | |
