<a href="#">G/SPS/N/ALB/213</a> 18/03/2025	Albania	<i>Live animals (HS code(s): 01)</i> <b>Detailed rules for organic livestock production, including rules for transition.</b> This regulation defines detailed rules on organic livestock, included general production rules for animals and detailed production rules for the species: bovine, equine, cervine, porcine, ovine, caprine, poultry, rabbits and bees. Draft instruction "On detailed rules on organic livestock" is approximated with Regulation (EU) 2018/848 of the European Parliament and of the Council of 30 May 2018 on organic production and labelling of organic products and repealing Council Regulation (EC) No 834/2007.	17/05/2025
<a href="#">G/SPS/N/JPN/1327</a> 18/03/2025	Japan	<i>Plant, plant products and other objects</i> <b>Proposed revisions of the Ordinance for Enforcement of the Plant Protection Act, relevant notifications and detailed rules.</b>	17/05/2025

The MAFF will revise Annexed Tables 1, 1-2, 2 and 2-2 of the Ordinance for Enforcement of the Plant Protection Act and the non-quarantine pest list to reflect the latest scientific evidence.

1. Summary of the proposed revisions - Annex 1;
2. Proposed revision of Annexed Table 1 of the Ordinance for Enforcement of the Plant Protection Act on list of the quarantine pest list - Annex 2;
3. Proposed revision of Annexed Table 1-2 of the Ordinance for Enforcement of the Plant Protection Act on list of the plants and other objects subject to specific phytosanitary measures to be carried out in exporting countries - Annex 3;
4. Proposed revision of Annexed Table 2 of the Ordinance for Enforcement of the Plant Protection Act on list of the import prohibited plants - Annex 4;
5. Proposed revision of Annexed Table 2-2 of the Ordinance for Enforcement of the Plant Protection Act on list of the import prohibited plants (excluding the plants that meet the requirements) - Annex 5;
6. Proposed revision of the non-quarantine pest list - Annex 6.

The following emergency notifications will be withdrawn after the enforcement of this amendment: □G/SPS/N/JPN/1261, G/SPS/N/JPN/1272, G/SPS/N/JPN/1275 and G/SPS/N/JPN/1276.

*Raw milk and/or un-heated/un-treated milk products*

**Import suspension of raw milk and/or un-heated/un-treated milk products from Hungary and the Slovak Republic.**

In order to prevent the introduction of Foot-and-Mouth Disease (FMD) virus into Japan, MAFF has suspended the import of raw milk and/or un-heated/un-treated milk products from Hungary and the Slovak Republic, including those shipped through third countries, on 7 March 2025 based on the "Animal Health Requirements for raw milk and/or milk products to be exported to Japan from Listed countries" and the Articles 37 and 44 of the "Act on Domestic Animal Infectious Disease Control". This is to inform that MAFF has removed Hungary and the Slovak Republic from the listed countries.

*Meat and meat products derived from cloven-hoofed animals*

17/05/2025

**Import suspension of meat and offal derived from cloven-hoofed animals (cattle, sheep, goat, deer and Suidae family) from Hungary and import suspension from facilities handling cloven-hoofed animals of Hungary origin.**

In order to prevent the introduction of Foot-and-Mouth Disease (FMD) virus into Japan, MAFF has suspended the import of meat and offal derived from cloven-hoofed animals (cattle, sheep, goat, deer and Suidae family) from Hungary, including those shipped through third countries, on 7 March 2025 based on the "Animal health requirements for meat and viscera derived from cloven-hoofed animals (cattle, sheep, goat and deer only), and for sausages, ham and bacon made from the said meat and viscera as raw materials, to be exported to Japan from Hungary", "Animal health requirements for meat and viscera derived from pigs, and for sausages, ham and bacon made from the said meat and viscera as raw

materials, to be exported to Japan from Hungary" and the Articles 37 and 44 of the "Act on Domestic Animal Infectious Disease Control".

Based on the Animal Health Requirements established between Japan and each exporting country, facilities that handle cloven-hoofed animals of Hungary origin, as well as their meat and offal, are not permitted to produce or manufacture products to be exported to Japan, and each exporting country must notify Japan of this export suspension immediately.

*Fresh pineapple fruit*

**Measures for fresh pineapple fruit to prevent the introduction of False Codling Moth (*Thaumatotibia leucotreta*).**

The Animal and Plant Quarantine Agency (APQA), Ministry of Agriculture, Food and Rural Affairs (MAFRA) in the Republic of Korea, notified the "Emergency phytosanitary measures on Fresh pineapple fruit to prevent the introduction of *Cryptophlebia leucotreta*" on 13 January 2013 (G/SPS/N/KOR/436). APQA has added distributed countries of False Codling Moth (*Thaumatotibia leucotreta*), one of the prohibited quarantine pests of the Republic of Korea, which is based on the result of Pest Risk Analysis (PRA). To prevent introduction of False Codling Moth into the Republic of Korea, APQA prohibits fresh pineapple fruit from Eswatini and Mali. This measure will be applied to consignments shipped on and after 1 June 2025.

*Rosa spp. plants (only if flowers or flower buds are attached)*

**Measures for *Rosa* spp. plants to prevent the introduction of False Codling Moth (*Thaumatotibia leucotreta*).**

The Animal and Plant Quarantine Agency (APQA), Ministry of Agriculture, Food and Rural Affairs (MAFRA) in the Republic of Korea, has added host plants and distributed countries for the False Codling Moth (*Thaumatotibia leucotreta*), a prohibited quarantine pest in Korea, based on the results of a Pest Risk Analysis (PRA). To prevent the introduction of False Codling Moth into Korea, APQA has decided to include *Rosa* spp. plants (only if flowers or flower buds are attached) as host plants of False Codling Moth and prohibit the import of such host plants from the following areas where False Codling Moth is known to occur: Angola, Benin, Burkina Faso, Burundi, Cabo Verde, Cameroon, Central African Republic, Chad, Congo, Côte

implementation of a number of articles of the Food Safety Law:

I. Administrative procedure reform

1. Eliminating the regulation on translating and notarizing English legal documents after consular legalization and acceptance of electronic copies of legal documents;
2. Allowing the use of the Testing Result for health supplement of production facilities that meet Good Manufacturing Practices (GMP) without having to send samples for testing at designated testing laboratories or recognized testing laboratories;
3. Stipulating the number of times enterprises can submit additional request documents (maximum three times) and the time limit for enterprises to submit additional request documents (30 days) for the sequence of food groups that must register product declarations according to the recommendation of the Government Inspectorate;
4. Adding regulation on importing food donated by organizations and individuals for charity purposes, not for business purposes, in the direction of simplifying the process and procedures compared to the case of food business;
5. Supplementing regulations assigning ministries to develop unified management software from central to local levels to handle administrative procedures and manage food safety according to assigned management areas;
6. Adding regulation on product declaration registration for mixed food additives with new uses, food additives not on the list of additives permitted for use in food or not for the right users as prescribed by the Ministry of Health;
7. Reducing and simplifying some administrative procedures:
  - ☐ Simplifying procedures for registration of advertising confirmation, issuance of Certificate of food safety qualified facilities;
  - ☐ Adding one procedure on exemption from periodic inspection and supervision of testing facilities;
  - ☐ Simplifying requirements on registration dossiers for designating testing facilities currently regulated in Joint Circular 20/2013/TTLT-BYT-BCT-BNNPTNT stipulating conditions, procedures for designating food testing facilities for state management.

II. Strengthening decentralization and delegation of authority  
Decentralizing granting Certificates of Free Sale for food products, except health supplement; Health Certificate and other relevant certificates for exported foods to local authorities.

III. Strengthening post-inspection

1. Regulations on only the manufacturing facility or product owner being allowed to be named in the declaration dossier. In case it is not the above two entities, the organization or individual responsible for bringing the product to the market must have a letter of authorization from the manufacturing facility or product owner;
2. Controlling changes to products after announcement: adding cases where re-announcement is required if there is a change in the organization or individual responsible for bringing the product to the market; manufacturing facility, origin; product name; ingredients; uses, subjects; dosage; concentration, content, volume of ingredients that create the product's uses, dosage form; quality and safety indicators;

3. Adding provisions on the withdrawal and suspension of the acceptance of the Certificate of registration of product declaration, Certificate of confirmation of food advertising content, withdrawal of the Certificate of food safety qualified facility, in which specific provisions are made on the cases of withdrawal and the authority to withdraw;

4. Organizations and individuals responsible for bringing products to market must keep records as prescribed in Point g, Clause 2, Article 7 and Point d, Clause 1, Article 19 of the Food Safety Law and in accordance with the provisions of Good Manufacturing Practice (GMP) for health protection foods, Hazard Analysis and Critical Control Points (HACCP) system, ISO 22000 Food Safety Management System, International Food Standards (IFS), Global Food Safety Standards (BRC), Food Safety System Certification (FSSC 22000) or equivalent if they apply and are certified for this system to serve inspection and examination work and present it when requested by competent inspection and examination agencies;

5. Requiring organizations and individuals to provide Standards including testing methods for safety indicators and quality indicators of the product in the registration dossier of the declaration so that the dossier receiving agency can provide them to public testing units to deploy sampling for monitoring on the market;

6. Adding regulations on Food Testing for State Management (including conditions for food testing facilities for State Management and verification testing facilities; registration dossier for designating testing facilities; procedures for designation and cases of recall.

IV. Implement the recommendations of Ministries, including the Government Inspectorate

1. Adding and clarify the concept of functional foods introduced to the market for the first time;

2. Amending and adding the concept of scientific evidence proving the product's uses.

V. Some other contents

1. Amending and adding the concept of dietary supplements to control the features and uses of this product;

2. Regarding self-declaration procedures for food products: clearly stipulate the responsibilities of the competent state management agency designated by the Provincial People's Committee to post the self-declaration dossier on the unit's electronic information page within seven days from the date of receiving the dossier; At the same time, the records must be reviewed within three months after the organization or individual self-declares (regarding product classification, uses, users, ingredients) to ensure that the product is declared correctly in nature and in accordance with regulations.

*Products (and associated GB commodity codes\*): 1,4-dimethylnaphthalene, acetamiprid, boscalid, clothianidin, cyantraniliprole, cyflumetofen, imazapyr, isocycloseram, isoflucypram, isotianil, mepiquat chloride, oxathiopiprolin, tetraniliprole, thiamethoxam, tricyclazole.*

**New GB MRLs following on from Codex Committee on Pesticide Residues (CCPR) 55 (2024) amending the GB MRL Statutory Register.**

The measure adopts Codex MRLs (CXLs) endorsed as new international food standards by the 47th session of the Codex Alimentarius Commission. The CXLs are being adopted for the following active substances for a range of commodities, having been assessed as meeting the United Kingdom's appropriate level of protection: 1,4-dimethylnaphthalene, acetamiprid, boscalid, clothianidin, cyantraniliprole, cyflumetofen, imazapyr, isocycloseram, isoflucypram, isotianil, mepiquat chloride, oxathiopiprolin, tetraniliprole, thiamethoxam, tricyclazole. The Evaluation Report/ Reasoned Opinion supporting adoption of the new MRLs is available at the following link. Decision on the adoption of Codex MRLs (CCPR 2024): see pages 7-25. The residue levels arising in food and feed from the notified uses result in UK consumer exposures below the toxicological reference values and therefore harmful effects on human health are not expected. As the residue levels exceed the current GB MRLs in force, new MRLs are being adopted.

*Products (and associated GB commodity codes\*): Citrus Fruit (0110000), Apricots (0140010), Peaches (0140030), Tomatoes (0231010), Aubergines/eggplants (0231030), Cucumber (0232010), Hops (0700000)*

**New GB MRLs for cyflumetofen amending the GB MRL Statutory Register.**

The Health and Safety Executive received applications to set new GB MRLs for cyflumetofen in various crops, including citrus fruit, apricots, peaches, tomatoes, aubergines/eggplants, cucumbers, and hops. Following assessment, new MRLs have been adopted to set Import Tolerances. The supporting Evaluation Reports/Reasoned Opinions are available: Citrus fruit, peaches, apricots, tomatoes, aubergines/eggplants and cucumber (pages 6–7) Hops (page 8)

The residue levels from the approved uses are below toxicological limits, so no harmful effects on human health are expected. Since these levels exceed current GB MRLs, new MRLs are being adopted.
