This list is based on ISPM No. 19: "Guidelines on lists of regulated pests" (2003, FAO, Rome). The regulation is based mainly on Costa Rican Technical Regulation (RTCR) No. 379/2000: "Procedures for the implementation of phytosanitary requirements for the importation of plants, plant products and other plant material capable of harbouring pests", Decree No. 29.473-MEIC-MAG, and the respective technical guides, and on pest interceptions at entry points, technical data sheets and pest risk analysis (PRA) for specific pests and pests of national interest.</p> | |
| G/SPS/N/HKG/47 11/04/2022 | Hong Kong | <p><i>Livehamsters for commercial purpose</i></p> <p>Notice of Temporary Suspension on Commercial Imports of Live Hamsters into Hong Kong, China.</p> <p>A number of human COVID-19 cases in Hong Kong, China were found to be linked to hamsters tested positive for SARS-CoV-2 virus. Epidemiological investigation as well as viralsequencing suggest that hamsters, which were previously imported into Hong Kong, China, are the source of human infection. Commercial imports of live rodents and lagomorphs into Hong Kong, China were temporarily suspended between 18 January 2022 and 31 March 2022 for precautionary purpose. This emergency measure was adjusted from 1 April 2022 to cover only the temporary suspension of commercial imports of live hamsters.</p> | |

United Arab
Emirates

Live poultry (HS Code: 0105), day-old chicks (HS Code: 0105.11), hatching eggs, and poultry products including poultry meat (HS Code: 0207), except heat-treated products
United Arab Emirates is imposing a temporary ban on the importation of domestic and wild birds and their untreated by-products from the Province of Sultan Kudarat and the Province of Pampanga in the Philippines.

Following the notification published by the World Organisation for Animal Health (OIE) regarding the outbreak of Highly Pathogenic Avian Influenza virus (HPAI) in the Province of Sultan Kudarat and the Province of Pampanga in the Philippines, the United Arab Emirates is applying a precautionary sanitary measure to prevent the risk of introducing HPAI virus through the imports of live birds and their products from the Province of Sultan Kudarat and the Province of Pampanga in the Philippines.

These measures include:

- 1) Continuous of temporary ban on the importation of domestic and wild birds and their untreated by-products and day-old chicks and hatching eggs from the Philippines to the United Arab Emirates;
- 2) Continue to allow the importation of heat-treated poultry products (treated meat and treated egg products) from all regions in the Philippines;
- 3) Regulating the import of poultry meat and table eggs and their non-heat treated products according to the health certificate for export of "meat and meat products" and the health certificate for export of "table eggs and egg products" from the Philippines to the United Arab Emirates;
- 4) Continuing to allow the entry of consignments of table eggs and unheated poultry meat from regions (according to the first administrative division (Provinces)) that are not infected with the health certificate forms currently used, provided that the competent authorities in the exporting country send a health certificate: "The imported products have been produced (and packed) of live poultry from a facility (farm/slaughterhouse/packing facility) in an area (known within a radius of 25 km around the facility) in which no hotbeds of highly pathogenic avian influenza (HPAI) have been recorded for a period of not less than (28) previous days Export with the application of the destruction policy, or for a period of no less than (12) months preceding the export without applying the policy of destruction." All necessary precautions were taken to prevent the consignment from coming into contact with any source of the bird flu virus;

As a precautionary measure, consignments of table eggs and non-heat treated poultry meat from the Province of Pampanga and the Province of Sultan Kudarat that were produced after 26 January 2022 are not allowed to enter.

United Arab
Emirates

Live poultry (HS Code: 0105), day-old chicks (HS Code: 0105.11), hatching eggs, and poultry products including poultry meat (HS Code: 0207) except heat-treated products

United Arab Emirates is imposing a temporary ban on the importation of domestic and wild birds and their untreated by-products from Belgium.

Following the notification published by the World Organisation for Animal Health (OIE) regarding the outbreak of Highly Pathogenic Avian Influenza Virus (HPAI) in the Province of West Flanders (West-Vlaanderen) in Belgium, the United Arab Emirates is applying a precautionary sanitary measure to prevent the risk of introducing HPAI virus through the imports of live birds and their products from the Province of West Flanders (West-Vlaanderen) in Belgium. These measures include:

1. Temporary ban on the importation of domestic and wild birds and their untreated by-products and day-old chicks and hatching eggs from Belgium to the United Arab Emirates;
2. Applying the "mechanism of importing falcons from high-risk countries" on importing from Belgium;
3. Continue to allow the importation of heat-treated poultry products (treated meat and treated egg products) from Belgium;
4. Allow the entry of consignments of unheat-treated poultry meat and table eggs from areas (according to the second administrative division (Provinces)) that are not infected,

according to the currently used health certificate models, provided that the competent authorities of the country of export send a health statement: "The imported products were produced (and packed) from live poultry from a facility (farm/slaughterhouse/packing facility) in an area (defined within a 25 km radius around the facility) in which no highly pathogenic avian influenza (HPAI) have been recorded for a period of no less than (28) days prior to exportation with the application of the destruction policy or for a period of no less than (12) months prior to export without applying the policy of destruction";

5.Consignments of unheat-treated poultry meat and table eggs and its products from the Province of West Flanders (West-Vlaanderen)produced after 14 March 2022 are not allowed to be exported to the United Arab Emirates.

composite products subject to official controls at border control posts (Text with EEA relevance).

In accordance with Regulation (EU) 2017/625 on official controls on the agri-food chain, the Commission shall, by means of implementing acts, establish lists of animals, products of animal origin, germinal products, animal by-products and derived products, composite products, hay and straw that are subject to official controls at the border control posts. The lists have been established by way of Commission Implementing Regulation (EU) 2021/632. The objective of this draft Implementing Regulation is to include certain products of animal origin and composite products into the list of goods subject to official controls at border control posts. The scope of import controls of animal by-products has been revised. Since Combined Nomenclature (CN) codes provided for in Council Regulation (EEC) No 2658/87 have been amended by Commission Implementing Regulation (EU) 2021/1832, corresponding changes have been introduced in this Regulation.

Preparations of a kind used in animal feeding (HS code(s): 2309)

Commission Implementing Regulation (EU) 2022/537 of 4 April 2022 concerning the authorisation of a preparation of lemon extract as a feed additive for all animal species (Text with EEA relevance).

Lemon extract was authorized without a time limit in accordance with Directive 70/524/EEC as a feed additive for all animal species. That additive was subsequently entered in the Register of feed additives as an existing product, in accordance with Article 10(1)(b) of Regulation (EC) No 1831/2003. In accordance with Article 10(2) of Regulation (EC) No 1831/2003 in conjunction with Article 7 thereof, an application was submitted for the re-evaluation of a preparation of lemon extract for all animal species. The applicant requested the additive to be classified in the additive category 'sensory additives' and in the functional group 'flavouring compounds'. That application was accompanied by the particulars and documents required under Article 7(3) of Regulation (EC) No 1831/2003. The applicant requested the preparation of lemon extract to be authorized also for use in water for drinking. However, Regulation (EC) No 1831/2003 does not allow the authorization of flavouring compounds for use in water for drinking. Therefore, the use of the preparation of lemon extract in water for drinking should not be allowed. (The European Food Safety Authority ('the Authority') concluded in its opinion of 29 September 2021 that, under the proposed conditions of use, the preparation of lemon extract does not have adverse effects on animal health, consumer health or the environment. The Authority also concluded that the preparation of lemon extract should be considered a skin and eye irritant, and a potential corrosive. Therefore, the Commission considers that appropriate protective measures should be taken to prevent adverse effects on human health, in particular as regards the users of the additive.

Preparation of a kind used in animal nutrition (HS Code: 2309)

Commission Implementing Regulation (EU) 2022/593 of 1 March 2022 concerning the authorisation of litsea berry

**essential oil as a feed additive for certain animal species
(Text with EEA relevance).**

Litsea berry essential oil was authorised without a time limit in accordance with Directive 70/524/EEC as feed additive for all animal species. This additive was subsequently entered in the Register of feed additives as existing product, in accordance with Article 10(1)(b) of Regulation (EC) No 1831/2003. In accordance with Article 10(2) of Regulation (EC) No 1831/2003 in conjunction with Article 7 thereof, an application was submitted for the re-evaluation of litsea berry essential oil for all animal species. The applicant requested the additive to be classified in the additive category 'sensory additives' and in the functional group 'flavouring compounds'. That application was accompanied by the particulars and documents required under Article 7(3) of Regulation (EC) No 1831/2003. The applicant requested litsea berry essential oil to be authorised also for use in water for drinking. However, Regulation (EC) No 1831/2003 does not allow the authorisation of 'flavouring compounds' for use in water for drinking. Therefore, the use of litsea berry essential oil in water for drinking should not be allowed.
