<a href="#">G/SPS/N/EU/568</a> 23/05/2022	European Union	<p><i>Food products</i></p> <p><b>Draft Commission Regulation amending Annexes II to Regulation (EC) No 1333/2008 of the European Parliament and of the Council as regards the use of ascorbic acid (E300), sodium ascorbate (E301) and calcium ascorbate (E302) in tuna (Text with EEA relevance).</b></p> <p>The proposal sets, in the interest of legal certainty, a maximum level for the use of ascorbic acid (E 300), sodium ascorbate (E 301) and calcium ascorbate (E302) which applies only for tuna in food categories 09.1.1 "Unprocessed fish" and 09.2 "Processed fish and fishery products including molluscs and crustaceans" in Part E of Annex II to Regulation (EC) No 1333/2008. The use of those food additives in tuna intended for canning in high amounts to artificially restore the colour of fresh tuna flesh does not comply with the general conditions for inclusion and use of food additives in the Union list and with the quantum satis principle. On the basis of the information provided by the industry to the European Food Safety Authority in view of the re-evaluation of the safety of the food additives and official controls carried out by some competent authorities, a maximum level of 300 mg/kg is considered appropriate. The maximum level allows to maintain the current levels of legitimate use following good manufacturing practices.</p>	22/07/2022

**The DLD order on temporary suspension of importation of live poultry and poultry carcasses from Belgium to prevent the spread of Highly Pathogenic Avian Influenza (Subtype H5N1).**

According to the announcement of the Government Gazette dated 31 January 2022, the suspension for the importation of live poultry and poultry carcasses from Belgium expired on 1 May 2022. However, the OIE has reported a continued outbreak of Highly Pathogenic Avian Influenza (HPAI) in the area of Belgium. Therefore, it is necessary for Thailand to prevent the entry of Highly Pathogenic Avian Influenza (HPAI) disease into the country. By virtue of the Animal Epidemics Act B.E. 2558 (2015), the importation of live poultry and poultry carcasses from Belgium has been temporarily suspended for 90 days from 2 May 2022 onward in the Thai Royal Gazette.

Ukraine

*Agricultural products of plant origin*

**Resolution of the Cabinet of Ministers of Ukraine of 1 April 2022 No. 398 "Some issues of implementation of phytosanitary measures and procedures under martial law".**

The Resolution provides:

1. Introduction of the extraterritoriality principle for realization of powers of territorial bodies of the State Service of Ukraine on Food Safety and Consumer Protection. From now on, the business entity at its choice has the right to:

- apply for and receive documents, administrative services and phytosanitary procedures in any territorial body of the State Service of Ukraine on Food Safety and Consumer Protection;
- apply for phytosanitary examination (analysis) to any phytosanitary laboratory of the State Service of Ukraine on Food Safety and Consumer Protection;

2. Simplification of phytosanitary control of imported goods belonging to UKTZED groups 07-12, by carrying out inspections only without sampling and phytosanitary examination (analysis).

As an exception, full phytosanitary control is carried out if:

- phytosanitary certificates (phytosanitary certificates for re-export) are missing or invalid;
- the consignment does not match the information specified in the phytosanitary certificate (phytosanitary certificate for re-export);
- the inspection revealed infection (signs) or damage by regulated pests;

3. Elimination of the requirement to conduct phytosanitary control of the accompanying wooden packaging material (pallets, packing boxes, boxes, etc.), which imports goods of not plant origin;

4. Abolition of the compulsory movement through the territory of Ukraine of imported regulated products, including seeds, accompanied by a quarantine certificate;

5. Issuance of a quarantine certificate only upon the request of the person.

As an alternative, for the purpose of control, it is proposed to keep records of regulatory objects and provide information upon the request of the State Service of Ukraine on Food Safety and Consumer Protection (not more than once a month). Government simplifies the requirements for the import and movement of agricultural products of plant origin, including seeds, under martial law.

Appropriate measures have been introduced to simplify phytosanitary measures for the import of agricultural

products of plant origin and to create an uninterrupted supply of such products during martial law is in power.
