G/SPS/N/BRA/2491 18/05/2026	Brazil	<i>Begonia spp.</i> Draft - Establishes the phytosanitary requirements for the importation of propagative material of begonia (<i>Begonia spp.</i>) produced in any origin Draft Ordinance aiming to establish the phytosanitary requirements for the importation into Brazil of propagative material of begonia (<i>Begonia spp.</i>, Category 4) produced in any origin.	17/07/2026
G/SPS/N/EU/945 18/05/2026	European Union	<i>Preparations of a kind used in animal feeding (HS code(s): 2309)</i> Commission Implementing Regulation (EU) 2026/1012 of 7 May 2026 concerning the authorisation of L-cysteine, L-cysteine hydrochloride monohydrate and L-cysteine hydrochloride as feed additives for all animal species (Text with EEA relevance) This Regulation authorises for the first time in the European Union and for a period of ten years L-cysteine, L-cysteine hydrochloride monohydrate and L-cysteine hydrochloride as feed additives belonging to the category 'nutritional additives' and in the functional group 'amino acids, their salts and analogues' for all animal species. This authorisation is based on the favourable conclusions of a scientific assessment of the dossier submitted by the applicant, conducted by the European Food Safety Authority (EFSA). The terms of the authorisation are detailed in the Annex to the Act.	
G/SPS/N/EU/946 18/05/2026	European Union	<i>Preparations of a kind used in animal feeding (HS code(s): 2309)</i> Commission Implementing Regulation (EU) 2026/1014 of 7 May 2026 concerning the authorisation of L-tryptophan produced with <i>Escherichia coli</i> CCTCC M 2024517 as a feed additive for all animal species (Text with EEA relevance) This Regulation authorises for the first time in the European Union and for a period of ten years L-tryptophan produced with <i>Escherichia coli</i> CCTCC M 2024517 as a feed additive belonging to the category 'nutritional additives' and in the functional group 'amino acids, their salts and analogues' for all animal species. This authorisation is based on the favourable conclusions of a scientific assessment of the dossier submitted by the applicant, conducted by the European Food Safety Authority (EFSA). The terms of the authorisation are detailed in the Annex to the Act.	
G/SPS/N/EU/947 18/05/2026	European Union	<i>Preparations of a kind used in animal feeding (HS code(s): 2309)</i> Commission Implementing Regulation (EU) 2026/1018 of 7 May 2026 concerning the authorisation of a preparation of <i>Saccharomyces cerevisiae</i> NBRC 0203 and <i>Lactocaseibacillus rhamnosus</i> NBRC 3425 as a feed additive for all animal species (Text with EEA relevance)	

This Regulation authorises for the first time in the European Union and for a period of ten years a preparation of *Saccharomyces cerevisiae* NBRC 0203 and *Lactocaseibacillus rhamnosus* NBRC 3425 as a feed additive belonging to the category ‘technological additives’ and in the functional group ‘silage additives’ for all animal species. This authorisation is based on the favourable conclusions of a scientific assessment of the dossier submitted by the applicant, conducted by the European Food Safety Authority (EFSA). The terms of the authorisation are detailed in the Annex to the Act.

Strawberry (Fragaria × ananassa) plants

Modifica Resolución No 1.923 de 2025 que Establece requisitos fitosanitarios de importación para plantas de frutilla (Fragaria × ananassa) procedentes de los Estados miembros de la Unión Europea (Amendment to Resolution No. 1.923 of 2025 establishing phytosanitary import requirements for Fragaria × ananassa plants from European Union member States).

The draft Resolution updates the phytosanitary import requirements for strawberry (*Fragaria × ananassa*) plants from European Union member States. In particular, it removes from the requirements the pest *Aphelenchoides fragariae*, which is present in Chile, replaces *Colletotrichum acutatum* complex with *Colletotrichum acutatum*; and updates the scientific names of raspberry ringspot virus (=Nepovirus rubi) and tomato black ring virus (=Nepovirus nigranuli), in accordance with the SAG's official list of quarantine pests, established in Resolution No. 3.080 of 2003 and amendments thereto. Further details can be found in the document attached hereto.

Equids/Non-Equid perissodactyls (Wild Ass, Zebra, Hippopotamus, Tapir, Rhinoceros and other similar species)

Draft Veterinary Health Certificate for Import of Equids/Non-Equid perissodactyls (Wild Ass, Zebra, Hippopotamus, Tapir, Rhinoceros and other similar species) into India

The draft Veterinary Health Certificate for import of equids and non-equid perissodactyls into India prescribes detailed sanitary, quarantine, testing, vaccination, transportation, and post-import requirements to ensure biosecurity and prevent the introduction of infectious and contagious diseases. The certificate includes provisions relating to animal identification, origin, pre-export quarantine, disease-free status of the exporting country or establishment, mandatory vaccination and diagnostic testing protocols for various equine diseases, vector protection measures, transportation hygiene, and post-import quarantine procedures in India. It also lays down responsibilities of the competent veterinary authority and importer, while aligning the import conditions with guidelines laid down by World Organisation for Animal Health (WOAH) standards.

Draft Order of the Ministry of Health of Ukraine “On Approval of the Criteria for Classifying Drinking Water as Natural Mineral Water”

The draft Order provides for the approval of criteria for classifying drinking water as natural mineral water. The Criteria define the geological, hydrogeological, physical, chemical, physico-chemical and microbiological requirements that drinking water shall to comply with in order to be classified as natural mineral water, including underground origin, protection from contamination, microbiological safety, stability of composition and temperature within natural variations, and specific natural characteristics such as mineral content, trace elements or other constituents. The Criteria also establish maximum levels for certain naturally occurring constituents that may pose a risk to human health and provide for pharmacological, physiological and clinical studies where necessary.

Food additives, food flavourings, primary products for the production of smoke flavourings and food enzymes

**Draft Resolution of the Cabinet of Ministers of Ukraine
“On Approval of the Procedure for State Registration of Objects of Sanitary Measures and Requirements for the Form and Content of Documents”**

The draft Resolution provides for the approval of the Procedure for State registration of sanitary measure objects and the requirements for the form and content of documents submitted for such registration.

The Procedure establishes the mechanism for state registration of objects of sanitary measures, amendments to the conditions of use and specifications of such objects, the requirements for registration dossiers and supporting documents. It also defines the form and detailed requirements for decisions on state registration, requirements for risk assessment and scientific opinion on the safety of objects, as well as rules for handling confidentiality requests and protecting confidential information. The Procedure applies, in particular, to food additives, food flavourings, smoke flavouring primary products and food enzymes. State registration is carried out by the Ministry of Health of Ukraine on the basis of an application and a scientific opinion on the safety of the object, prepared following risk assessment.

Poultry meat, eggs and their products

Notice of Administration Order of Saudi Food and Drug Authority Ref. No. 47932 dated 12 May 2026 entitled "Temporary ban on importation of poultry meat, eggs and their products originating from Maine-et-Loire in France"

Following the WOA report dated 17 April 2026, a Highly Pathogenic Avian Influenza (HPAI) virus outbreak has occurred in Maine-et-Loire in France. In compliance with the World Organisation for Animal Health (WOAH), Terrestrial Animal Health Code Chapter 10.4, it is deemed necessary for the Kingdom of Saudi Arabia to prevent the entry of the HPAI virus into the country. Therefore, the import of poultry meat, eggs and their products from Maine-et-Loire in France to the Kingdom of Saudi Arabia is temporarily suspended (with the exception of processed poultry meat and egg products exposed to either heat or other treatments that ensure deactivation of the HPAI virus, as long as it conforms with the approved health requirements, and standards, with a health certificate issued by the official bodies in France prove that the product is free from the virus).

28/07/2026

Proposal to modify the List of Permitted Food Colours (jagua (genipin-glycine) blue)

Health Canada completed the premarket safety and efficacy assessment of a food additive submission seeking authorization for the use of jagua (genipin-glycine) blue as a food colour in various foods at maximum levels of use that vary according to the food. The results of the premarket assessment support the safety and efficacy of jagua (genipin-glycine) blue for its requested uses. Consequently, Health Canada intends to enable the use of jagua (genipin-glycine) blue by modifying the List of Permitted Food Colours, as described in the information document referenced above. The purpose of this document is to publicly announce Health Canada's intention in this regard and to provide the appropriate contact information for those wishing to submit comments, inquiries or new scientific information relevant to the safety of this food additive.
