Update to the list of GB quarantine pests.

The instrument amends England, Scotland and Wales (Great Britain) retained legislation (Commission Implementing Regulation (EU) 2019/2072) and will introduce updated pest measures. It will revise the list of GB quarantine pests: • Move *Thekopsora minima* (Arthur) Sydow & P. Sydow from the list of GB quarantine pests to the list of GB regulated non-quarantine pests; • Add various fungi and oomycetes, insects and mites, viruses, viroids and phytoplasmas to the list of provisional GB quarantine pests. A copy of the updated list is made available with this notification. Other changes include: • Extending the requirements concerning plants, plant products and other objects originating in third countries which may only be introduced into Great Britain if special requirements are met to include EU member states, Liechtenstein and Switzerland; • A new additional requirement that the name of the pest free area is to be included on phytosanitary certificates for the *Agrilus plannipennis* measures; • Clarification of the *Xylella fastidiosa* measures, which require pest free areas for lower risk hosts to be notified in advance and that names of places/sites of production must be included on phytosanitary certificates; • Seeds of *Pinus* L. and *Pseudotsuga menziesii* (Mirbel) Franco will be subject to Article 72 checks in GB retained legislation (Commission Implementing Regulation (EU) 2019/2072); • Correcting the name of the genus *Chrysanthemum* L., making no changes to the existing import requirements. A draft of the legislation will be made available in due course.

Ukraine

Agricultural products of plant origin, pesticides and agrochemicals, organic products

Law of Ukraine No 2246 "On amendments to some laws of Ukraine on uninterrupted production and supply of agricultural products during martial law" of 12 May 2022.

The Law provides for:

1) simplification of phytosanitary requirements for export, import and movement of agricultural products of plant origin through the territory of Ukraine, in particular the possibility of drawing up a phytosanitary certificate in electronic form;

2) during martial law and within 90 days after its termination or cancellation:

– expansion of the list of entities that can take samples and conduct phytosanitary examination, in particular, the introduction of a simplified order of authorization of private laboratories and the possibility of taking samples by specialists of such laboratories, as well as certification auditors (agronomical inspectors);

– giving the ability to reissue the phytosanitary certificate;

– simplification of procedures for submitting documents for state registration of pesticides and agrochemicals in order to approximate the legislation of Ukraine to the legislation of the European Union, in particular the provisions of Regulation (EC) No 396/2005 in terms of the requirement to have a conclusion of sanitary and epidemiological expertise;

– expansion of the list of agrochemicals allowed to import to Ukraine, production, trade, use and advertising without state registration;

3) possibility for Ukrainian producers of organic products, which are produced according to EU standards, to move to Ukrainian production standards without additional transitional period (if it happens within one certification body);

4) regulating within three years from the date of termination or cancellation of martial law import (sending) of goods subject to documentary checks, compliance checks and physical checks carried out at the checkpoints (points of control) through the state border of Ukraine;

5) exclusion provisions that prohibit import to Ukraine of goods with live animals in transit through countries where there are cases of dangerous diseases according to the list of OIE, to which the animals concerned are susceptible;

6) postponing the enactment of the Law of Ukraine "On Veterinary medicine" for one year after termination or cancellation of martial law, but no later than 1 January 2024.
