Enhanced regulatory measures to address risks associated with Pepper Ringspot Virus

To address risks associated with Pepper ringspot virus, enhanced regulatory measures (country freedom certified on phytosanitary certificate) will be required for nursery stock from the following plant genera: *Bidens*, *Columnea*, *Gerbera* and *Pogostemon*. From 17 June 2026, permitted species of the host genera listed above imported from countries other than Brazil or South Africa will require new additional declarations on the phytosanitary certificate.

Importation of Pepper ringspot virus host genera from Brazil and South Africa (countries where Pepper ringspot virus is known to occur) will be suspended pending a review of the biosecurity risk management measures.

New measures for Banana bunchy top virus and Banana bract mosaic virus on *Alpinia* sp. nursery stock

To address risks associated with Banana bunchy top virus (BBTV) and Banana bract mosaic virus (BBBrMV) the following enhanced regulatory measures will apply to all permitted *Alpinia* species:

- country freedom certified on phytosanitary certificate; or

		• offshore PCR testing of mother tissue cultures certified on phytosanitary certificate; or • 12 months disease screening at the government post entry quarantine facility. For further information of this change and the applicable import conditions please see: New measures for Banana bunchy top virus and Banana bract mosaic virus on <i>Alpinia</i> spp. nursery stock, https://bicon.agriculture.gov.au/ViewElement/Element/Alert?elementPk=2488166.	
G/SPS/N/AUS/635 28/05/2026	Australia	<i>Nursery stock, tissue culture, cuttings, budwood, rooted plants, corms and bulbs</i> Changes to manage the risk posed by Moko disease (<i>Ralstonia solanacearum</i> phylotype II) on nursery stock Measures for nursery stock and tissue culture against <i>Ralstonia solanacearum</i> phylotype II (moko strains) will be expanded on 17 June 2026 to include additional plant genera as advised in: 74-2026: Updates to nursery stock import requirements to manage plant disease risks. This follows a review of the plant host range and countries where moko disease is known to occur. Current measures are not sufficient to manage the biosecurity risks associated with moko disease. New import conditions are summarised in BICON clarify these additional measures.	27/07/2026
