**Law on Food Safety.**

The Law on Food Safety promulgated on 8 June 2022 comprises 43 articles and 35 definitions, divided into 11 chapters. It aims to regulate frameworks and mechanisms for managing and ensuring safety, quality, hygiene and compliance of food in all stages of the food production chain in order to provide protection of health and safe food for consumers and ensuring fair practices in food trade. According to Article 5 of the Law on Food Safety, ministries or institutions involved in food safety and quality have authority to prepare technical regulations where applicable based on national or international food standards, codes of practices and guidelines. The Law on Food Safety gives mandate to the following ministries as competent institutions to govern food safety control throughout the food chain. These include Ministry of Commerce, Ministry of Agriculture, Forestry and Fisheries, Ministry of Industry, Science, Technology and Innovation, Ministry of Health, Ministry of Tourism and Ministry of Economy and Finance. The food safety measures (requirements) as defined in Article 6, shall be based on key principles including food shall be safe, of good quality, hygienic and suitable for human consumption and food control shall be based on food safety measures or technical regulations as defined in Article 7. Food business operators, at every stage of the food chain, have the primary role and responsibility for ensuring the safety of their food products and shall collaborate with relevant competent authorities for implementation of food safety measures to avoid or mitigate risks posed by products (Article 11). According to this Law (Articles 13-15) the food business operators have been grouped into three categories based on the nature of their business for example big, medium or small enterprise. The punishment is applied to food business operators, who fail to implement provisions as stipulated by this law (Articles 33-40).

**Draft Commission Regulation amending Annexes II to Regulation (EC) No 396/2005 of the European Parliament and of the Council as regards maximum residue levels for fenbuconazole and penconazole in or on certain products (Text with EEA relevance).**

The proposed draft Regulation concerns the review of existing MRLs for fenbuconazole and penconazole in certain food commodities. MRLs for these substances in certain commodities are lowered. Lower MRLs are set after deleting old uses which are not authorized any more in the European Union.

<a href="#">G/SPS/N/GBR/65</a> 03/07/2024	United Kingdom	<p><i>All GB commodity codes as outlined in Part 1 of the GB pesticides Maximum Residue Level Statutory Register</i></p> <p><b>Proposed GB MRLs for methidathion amending the GBMRL Statutory Register</b></p> <p>The notified document outlines the proposed MRLs for methidathion following a review in Great Britain (GB) by the Health and Safety Executive. The draft Reasoned Opinion, produced by the Health and Safety Executive, on the review of the MRLs is available at the following link: The review of the existing MRLs for methidathion -proposed MRLs (hse.gov.uk) The MRLs for methidathion are being lowered to the limit of quantification as risks of a harmful effect on human health cannot be excluded and therefore the appropriate level of protection has not been met. The Codex MRLs for methidathion were revoked in December 2023 following the scientific assessment by the JMPR (Joint Meeting of the FAO and WHO on pesticide residues). This proposal aligns GB MRLs with the Codex standards. The JMPR scientific assessment and report of the Codex Committee on Pesticide Residue (CCPR) and Codex Alimentarius Commission (CAC) are available using the links below:</p> <ul style="list-style-type: none"> <li>-JMPR Report 2022;</li> <li>-Report of the 54th Session of the CCPR (The revocations of the CXLs for methidathion are outlined in point 87 and in Appendix III);</li> <li>-Report of the CAC 46 -December 2023.7</li> </ul>	01/09/2024

**Draft Decree of the Chairman of the Indonesian Quarantine Authority Concerning Quarantine Documents And Seals.**

Referring to G/SPS/N/IDN/148, Indonesia will require the following documents for the importation of animal and animal products, fish and fish products, plant and plant products into the territory of Indonesia:

1. Prior Notice (Code of document: K-1.2): This document will provide initial information and notification for the commodities which will be exported to Indonesia. This document must be sent by the Exporting Country to the Indonesian Quarantine Authority prior to the departure of the said commodities to Indonesia;

2. Notification of Non-Compliance (Code of document: K-7.4): This document will provide notification for non-compliance of SPS issues related to the importation of animal and animal product, fish and fish product, plant and plant products into the territory of Indonesia.

Furthermore, Indonesia will also issue the following documents for the exportation of animal and animal products, fish and fish products, plant and plant products from the territory of Indonesia:

1. Animal Health Certificate (Code of document: KH-1): This document certifies the health of the carrier media, especially animals which will be sent from one area to another area within the territory of Indonesia, and those that will be exported to destination country;

2. Sanitary Certificate of Animal Products (Code of document: KH-2): This document certifies the health of the carrier media, especially animal products that will be sent from one area to another area within the territory of Indonesia, and those that will be exported to destination country;

3. Health Certificate for Fish and Fish Products (Code of document: KI-1): This document certifies the health of the carrier media, especially fish and fish products, which will be exported to destination country;

4. Phytosanitary Certificate (Code of Document: KT-1): This document certifies the health of the carrier media, especially plant and plant products, which will be sent from one area to another within the territory of Indonesia, and those that will be exported to destination country;

5. Phytosanitary Certificate for re-export (Code of document: KT-2): This document certifies the carrier media that enter the territory of Indonesia, including information

regarding quarantine measures that have been conducted for the said carrier media;

6.Certification for Export of Processed Product/Non-Regulated Article (Code of document: KT-4): This document certifies the health of processed carrier media, including information regarding the quarantine measures that have been conducted for the said processed carrier media. This document will be sent by the exporting countries to the importing country, if the National Plant Protection Office (NPPO) of the importing country requires it.

**Notice of Saudi Food and Drug Authority (SFDA), Decision No. 33906 dated 13 June 2024 entitled "Temporary ban of importation of salmon originated from Liège, Belgium.**

Following the WOAHA report dated 4 June 2024, an Infectious Hematopoietic Necrosis Virus (IHNV) outbreak has occurred in Liège, Belgium. Incompliance with the World Organisation for Animal Health (WOAH) Aquatic Animal Health Code Chapter 10.6, it is deemed necessary for the Kingdom of Saudi Arabia to prevent the entry of the IHNV virus into the country. Therefore, the import of salmon fish from Liège, Belgium, to the Kingdom of Saudi Arabia is temporarily suspended, with the exception of:(a) aquatic salmon fish that have been subjected to a heat-treatment sufficient to inactivate IHNV as long as they conform with the approved health requirements, and standards, with a health certificate issued by the official bodies in Belgium prove that the product is free from the virus); (b) mechanically dried, eviscerated fish subjected to a heat-treatment; (c) fish skin leather subjected to a heat-treatment; (d) fish oil.
