G/SPS/N/AUS/569 11/07/2023	Australia	<i>Live sturgeon</i> Biosecurity import risk analysis of live sturgeon for aquaculture (the sturgeon BIRA) - Draft report The Australian Government Department of Agriculture, Fisheries and Forestry has released the draft report for the Biosecurity import risk analysis of live sturgeon for aquaculture (the sturgeon BIRA) for comment. The sturgeon BIRA assesses the biosecurity risks associated with the import of live sturgeon (Acipenser and Huso species) from all countries for aquaculture. The draft BIRA report proposes that Acipenser and Huso species be permitted import into Australia, provided they comply with appropriate biosecurity. These measures include sourcing from disease-free stocks, pre-export and post-arrival quarantine, parasite treatment, egg disinfection and testing for disease agents. Trading partners are invited to provide comments on the draft BIRA report until 11 September 2023 (60-day comment period). The department will carefully consider all comments while preparing the provisional BIRA report.	09/09/2023

G/SPS/N/RUS/267 11/07/2023	Russian Federation	<i>Veterinary medicines</i> Draft Decision of the Council of the Eurasian Economic Commission on Amendments to the Rules for Regulating the Circulation of Veterinary Medicines in the Customs Territory of the Eurasian Economic Union The draft provides for technical amendments developed to simplify the registration dossier of veterinary medicinal products in line with the requirements of the Rules for certain groups of veterinary medicinal products. The following measure is regulated by the TBT Agreement. The measure has been notified to the WTO, symbol: G/TBT/N/RUS/146.	09/09/2023

G/SPS/N/SAU/512 11/07/2023	Saudi Arabia, Kingdom of	<p><i>Poultry meat, eggs and their products</i></p> <p>Notice of Administration Order of Saudi Food and Drug Authority Ref. No. 31249 dated 10 July 2023 entitled "Temporary ban on importation of poultry meat, eggs and their products originating from Malopolskie in Poland"</p> <p>Following the WOAHP report dated 10 July 2023, a Highly Pathogenic Avian Influenza virus (HPAI) outbreak has occurred in Malopolskie in Poland. In compliance with the World Organization for Animal Health (WOAH), Terrestrial Animal Health Code Chapter 10.4, it is deemed necessary for the Kingdom of Saudi Arabia to prevent the entry of HPAI into the country. Therefore, the import of poultry meat, eggs and their products (with the exception of processed poultry meat and egg products exposed to either heat or other treatments that ensure deactivation of avian influenza viruses) from Malopolskie in Poland to the Kingdom of Saudi Arabia is temporarily suspended.</p>	
G/SPS/N/JPN/1213 12/07/2023	Japan	<p><i>Live poultry, poultry meat or egg products</i></p> <p>Import suspension of live poultry, poultry meat or egg products from France and Brazil</p> <p>In order to prevent the introduction of High Pathogenicity Avian Influenza (HPAI) virus into Japan, MAFF has taken import suspension measures based on Articles 37 and 44 of the "Act on Domestic Animal Infectious Disease Control" and other relevant requirements.</p>	
G/SPS/N/AUS/570 13/07/2023	Australia	<p><i>Fresh passionfruit</i></p> <p>Passionfruit from Viet Nam: Biosecurity import requirements draft report</p> <p>This draft report determines that the importation of commercially produced passionfruit (<i>Passiflora edulis</i>) to Australia from all commercial production areas of Vietnam can be permitted, subject to a range of biosecurity requirements. The draft report contains details of pests that are of biosecurity concern to Australia that are potentially associated with the importation of commercially produced passionfruit from Vietnam, the risk assessments for the identified quarantine pests, and the proposed risk management measures to reduce biosecurity risks to an acceptable level.</p>	11/09/2023

G/SPS/N/EU/655 13/07/2023	European Union	<p><i>Preparations of a kind used in animal feeding</i></p> <p>Draft Commission Implementing Regulation concerning the authorisation of guanidinoacetic acid and a preparation of guanidinoacetic acid as feed additives for chickens reared for breeding and chickens reared for laying in feed and in water for drinking, an</p> <p>The draft act concerns the authorisation of guanidinoacetic acid, in the form of a substance and of a preparation, as a feed additive for chickens reared for breeding and chickens reared for laying (for use in feed and in water for drinking) and for chickens for fattening (for use in water for drinking). The draft act also corrects and amends the existing authorisation of that additive (for use in feed for chickens for fattening, pigs for fattening and weaned piglets) in order to re-allocate it to the category of 'zootechnical additives' instead of 'nutritional additives', on the basis of the EFSA opinions of 28 September 2022 and 27 January 2016. The draft act also specifies the composition of the additive in the form of a preparation. It is proposed to provide a transitional period in order to allow operators to adapt to the modifications of the existing authorisation, in particular the re-allocation of the additive</p>	11/09/2023

to the category of 'zootechnical additives', triggering a holder-specific authorisation status. That transitional period would end on the expiry date of the existing authorisation (25 October 2026).

G/SPS/N/BGD/1 14/07/2023	Bangladesh	<p><i>Food products</i></p> <p>Draft Food Safety (Chemical Contaminants and Toxins) Regulation, 2023</p> <p>Food and feed contamination can potentially jeopardize human and/or animal well-being and may also adversely affect the overall quality of the food or feed. There are multiple factors and mechanisms through which food and feed can become contaminated. This draft Food Safety (Chemical Contaminants and Toxins) Regulation 2023 has been formulated for controlling use of contaminants in food and feed. This regulation contains maximum levels of contaminants and toxins (heavy metals, radionuclides, nitrates, PCBs, Dioxin, mycotoxins and other toxin) in food and feed. It consists of seven schedules which contain</p>	12/09/2023

name of the contaminants, name of the article of food and maximum levels for that particular food articles. In order to establish maximum levels of chemical contaminants and toxins in relation to the manufacturing, handling, importation, promotion, or distribution of any food item not specified in schedule-1 to schedule-7, it is required to adhere to the maximum level specified in the most recent version of Codex CXS 193-1995 or an internationally acknowledged standard.

G/SPS/N/BGD/2 14/07/2023	Bangladesh	<i>Food products</i> Draft Food Safety (Pesticides Residues and Other Chemical Residues) Regulations, 2023 In accordance with Food Safety Act 2013 (Act No. 43 of 2013), section 13 (4), the draft regulation is about the Maximum Residue Limit (MRL) of pesticide and plant growth regulators in food. Maximum Residue Limits stipulated in Schedule-1 and Schedule-2 are in most cases stated in terms of a specific whole raw agricultural commodity as it moves in trade. In Schedule-1 MRL of 163 Pesticide molecules are considered. The widely used plant growth regulator Ethephon's MRL is stated in Schedule-2. Portion of commodity to which the maximum residues limits (MRL) applies are described in Schedule-3. The Pesticide residues in food shall comply with the MRLs set forth in the draft Food Safety (Pesticides Residues and Other Chemical Residues) Regulations, 2023. In cases other than those specified in the list Schedule-1 and Schedule-2, the pesticide residues in food shall not exceed the limits as stipulated in the latest edition of Codex Alimentarius Commission or the internationally recognized standards.	12/09/2023
G/SPS/N/BGD/3 14/07/2023	Bangladesh	<i>Food</i> Draft Food Safety (Use of Food Additives) Regulation, 2023 The draft regulation on the use of food additives mainly describes the maximum allowable limit of various additives in different foods. In this regulation the name of the foods are organized according to CODEX Food Category. There are 16 food category in schedule I and II including dairy products, cereals, fruits and vegetables, beverages, meat and poultry, bakery, confectionary etc. In schedule III there are different types of additives and their maximum allowable limit. In schedule IV there is GMP table including functional class of additives e.g. preservatives, emulsifier, bulking agent, stabilizer etc.	12/09/2023
G/SPS/N/BRA/2192 14/07/2023	Brazil	<i>Torenia seeds (Torenia Fournieri)</i> ORDINANCE SDA No 829, of 26 June 2023 - Establishes the phytosanitary requirements for the importation of torenia seeds (Torenia Fournieri) from Costa Rica Establishes the phytosanitary requirements for the importation of torenia seeds (Torenia Fournieri) from Costa Rica.	
G/SPS/N/CRI/253 14/07/2023	Costa Rica	<i>Calabazas frescas o refrigeradas, la calabaza y calabazas "Cucurbita spp." (código(s) del SA: 070993); Frutas y frutos comestibles; Cortezas de agrios (cítricos), melones</i>	12/09/2023
