Live poultry and poultry carcasses

The DLD order on temporary suspension of importation and transit of live poultry and poultry carcasses from the United Kingdom to prevent the spread of Highly Pathogenic Avian Influenza (Subtype H5N1).

According to the announcement of the Government Gazette dated 5 April 2023, the suspension for importation and transit of live poultry and poultry carcasses from the United Kingdom since 5 April 2023 has expired on 4 July 2023. However, the WOAHA has reported a continued outbreak of Highly Pathogenic Avian Influenza (HPAI) in many areas of the United Kingdom. Therefore, it is necessary for Thailand to prevent the entry of Highly Pathogenic Avian Influenza (HPAI) disease into the country. By virtue of the Animal Epidemics Act B.E. 2558 (2015), the importation and transit of live poultry and poultry carcasses from Cumbria, Lancashire and Sussex of the United Kingdom

is temporarily suspended for a period of 90 days after the date of publication in the Thai Royal Gazette (26 July 2023).

New GB MRLs for fludioxonil amending the GB MRL Statutory Register.

Fludioxonil is an approved active substance in GB. An application was received by the Health and Safety Executive to set new MRLs for the products listed in section 3. Following assessment, new MRLs have been introduced to accommodate new authorisations of plant protection products to set Import Tolerances. The Evaluation Report/ Reasoned Opinion supporting the new MRLs is available at the following link. A complete list of the new or raised MRLs is available within this document, see page 7:

The evaluation of new MRLs for fludioxonil in or on various commodities (hse.gov.uk)The residue levels arising in food and feed from the notified uses result in consumer exposures below the toxicological reference values and therefore harmful effects on human health are not expected. As the residue levels exceed the current MRLs in force, new MRLs are being adopted.

New GB MRL for oxathiapiprolin amending the GB MRL Statutory Register.

Oxathiapiprolin is an approved active substance in GB. An application was received by the Health and Safety Executive to set a new MRL for spring onion. This was to accommodate a new authorisation of a plant protection product in GB. The new use requires the current MRL to be amended from 0.01* mg/kg to 0.15 mg/kg. The CXL of 2 mg/kg, adopted by

Codex in 2017, was also considered within the risk assessment. Following assessment, the CXL of 2 mg/kg is being adopted as a GB MRL. This MRL will accommodate the new GB authorisation and facilitate international trade. The Evaluation Report/ Reasoned Opinion supporting the new MRL is available at the following link. The new MRL being adopted is outlined on page 5. Evaluation of a new MRL for oxathiapiprolin in or on spring onions. The residue levels arising in food from the use associated with the CXL results in consumer exposures below the toxicological reference values and therefore harmful effects on human health are not expected. The CXL can be adopted as a GB MRL.

New GB MRLs for cyprodinil amending the GB MRL Statutory Register.

Cyprodinil is an approved active substance in GB. An application was received by the Health and Safety Executive to set new MRLs for blueberries, cranberries, currants (black, red, white) and gooseberries (green, red, yellow) to set Import Tolerances. For each of these commodities, the MRL is being raised from 3mg/kg to 10mg/kg. The Evaluation Report/ Reasoned Opinion supporting the new MRLs is available at the following link. A complete list of the new or raised MRLs is available within this document, see page 5: The evaluation of new MRLs for cyrodinil in or on blueberries, cranberries, currants and gooseberries (hse.gov.uk). The residue levels arising in food from the notified uses result in consumer exposures below the toxicological reference values and therefore harmful effects on human health are not expected. As the residue levels exceed the current MRLs in force, new MRLs are being adopted.
