Proposal M1021 –2022 MRL Harmonisation Proposal: Call for submissions report; Proposal M1021 –2022 MRL Harmonisation Proposal: Supporting document.

This Proposal seeks to amend the Australia New Zealand Food Standards Code to align maximum residue limits (MRLs) with the: Australian Pesticide and Veterinary Medicines Authority MRL Standard; Codex Alimentarius Commission; and trading partner standards relating to residues of agricultural and veterinary chemicals in food. This Proposal also includes proposed refinements to several food subgroups and commodities listed in Schedule 22 (Foods and classes of foods), as well as correction of typographical and formatting errors, necessary to improve the integrity of Schedules 20 and 22. For further information, please contact the MRL Team at Food Standards Australia New Zealand (FSANZ): MRL.contact@foodstandards.gov.au

Draft Food Safety (Health Food/Dietary Supplements, Food for Special Dietary Use, Food for Special Medical Purpose, Prebiotic and Probiotic Food) Regulation, 2023.

In accordance with the Food Safety Act 2013 (Act No. 43 of 2013), sections 13(2C), 31 and 87, the draft regulation is about food, specially processed or formulated for specific nutritional or dietary purposes rather than normal consumption. This regulation is developed bearing in mind the overall need for such standards for the broader categories based on Bangladesh's needs and in line with Codex Guidelines on "Guidelines for use of Nutrition and Health claims". Existing domestic regulations, international standards, and best practices have been reviewed meticulously. In this regulation, the name of the foods is categorized as Health Food/Food or Dietary supplements, Food for Special Dietary Uses (FSDU), Food for Special Medical Purposes (FSMP), Prebiotic and Probiotic Foods. There are different types of approved ingredients as applicable to different categories of foods as specified through Schedule I, II, and III. In Schedule IV there are different

types of approved prebiotics and probiotics ingredients. Schedule V deals with additives and their maximum allowable limit.

| G/SPS/N/BGD/5 24/08/2023 | Bangladesh | <i>Food</i> Draft Food Fortification Regulation, 2023. The draft regulation on fortification mainly deals with mandatory and voluntary food fortification. The General Principle is according to the CODEX CAC/GL9-1987. In addition to that, the regulation also contains the technological aspect, packaging and labelling requirements, micronutrient compliance, registration and statutory action for food fortification. In Schedule I the level of micronutrient is mandatorily to be added is specified and in Schedule II the level of micronutrient in food for voluntary food fortification is specified. | 23/10/2023 |
| G/SPS/N/BGD/6 24/08/2023 | Bangladesh | <i>Food</i> Draft Food Safety (Labelling of Packaged Food) Regulation, 2023. The draft regulation for labelling of packaged food is to protect consumers' health and safety by providing them with accurate and essential information about the food products they purchase. These regulations are put in place to ensure that food manufacturers and distributors comply with specific standards when it comes to labelling their products. The drafting process of this regulation is mainly done by comparing the existing regulation with internationally followed guidelines by CODEX and regulations from India and European Union (EU). The regulations include labelling, general conditions of labelling of packaged food, labelling requirements such as The name of the food, List of Ingredients, Declaration regarding Food Additives, Quantitative Ingredients Declaration, Special conditions for labelling of packaged food creating allergies or Intolerances, Nutritional Information, Declaration of name and complete address of manufacturer or FBO, Country of Origin for Imported Foods, Date Marking, etc. | 23/10/2023 |

Applies to importers of waste for recovery, reprocessing, recycling or disposal from all countries. Those involved with the importation, shipment and the treatment of these items should also know and understand the requirements of this Standard.

20/09/2023

Waste for Recovery, Reprocessing, Recycling or Disposal.

The proposed Waste standard will revoke the current Inorganic Risk Material standard. Major changes to the standard include the addition of offshore treatment providers and adjustment of treatment timeframes. There is also clarification of existing procedures and the widening of the range of commodities that can be imported (such as cardboard, paper, plastic, hazardous waste for destruction, scrap metal, and asbestos for destruction etc.). Given the expansion of the scope the standards name has also been changed to the Import Health Standard for Waste for Recovery, Reprocessing, Recycling or Disposal (Waste).

Proposals to Amend the New Zealand (Maximum Residue Levels for Agricultural Compounds) Food Notice.

The document contains technical details on proposals to amend the current Notice issued under the Food Act 2014 that lists the maximum residue levels (MRLs) for agricultural compounds in New Zealand. MPI proposes the following amendments to the Notice: a) The amendment of existing entries in Schedule 1, Maximum Residue Levels for Agricultural Compounds, for the following compounds and commodities: – An amendment of the entry for carbendazim, to revise the residue definition; – An amendment of the entry for cyromazine, to revise the residue definition and set new MRLs at 0.2 mg/kg for eggs, 0.05 mg/kg for poultry meat, 0.05 mg/kg for poultry offal, 0.3 mg/kg for sheep edible offal, 0.3 mg/kg for sheep fat, and 0.01 mg/kg for sheep milk; – A new entry for fluoxapiprolin, to set MRLs at 0.09 mg/kg for tomatoes and 0.01(*) mg/kg for potatoes; and – An amendment of the entry for fluralaner, to set new MRLs at 0.01(*) mg/kg in sheep fat, 0.01(*) mg/kg in sheep kidney, 0.01(*) mg/kg in sheep liver, and 0.005(*) mg/kg in sheep meat. Note: (*) indicates that the maximum residue level has been set at or about the limit of analytical quantification; b) The addition of two new entries in Schedule 2, for Agricultural Chemicals for which No Maximum Residue Level Applies, for 1-aminocyclopropane-carboxylic acid (ACC), when used as a plant growth regulator, and for Flg22-Bt peptide, when used as an agricultural chemical; c) The addition of a new entry in Schedule 3, for Veterinary Medicines for which No Maximum Residue Level Applies, for adrenaline acid tartrate, when used in calves following disbudding, in lambs following tail docking, and in calves and lambs following castration. The amendment of an existing entry in Schedule 3 for oxalic acid, to add reference to oxalic acid dihydrate.
