G/SPS/N/AUS/574 28/08/2023	Australia	<p><i>Prawn and prawn products for human consumption</i></p> <p>Biosecurity Advice 2023-A10: Final import conditions for prawns and prawn products.</p> <p>On 28 August 2023 the Australian Government Department of Agriculture, Fisheries and Forestry (the department) released Animal Biosecurity Advice (ABA) 2023-A10 advising of the final import conditions for prawns and prawn products imported into Australia. In response to ABA 2023-A06, the department received comments from three stakeholders during the 60-day comment period. These comments were considered when finalising the import conditions for prawns and prawn products. From 30 October 2023, the department will begin implementing changes to the import conditions for prawns and prawn products for human consumption as outlined in ABA 2023-A06 and ABA 2023-A10 which are available on the department's website: https://agriculture.gov.au/biosecurity-trade/policy/risk-analysis/memos. Australia's updated model health certificate for prawns and prawn meat for human consumption is attached. The wording of the model health certificate has not changed since the release of the previous SPS notification proposing these changes and requesting comment (G/SPS/N/AUS/565, published on 9 June 2023). Australia's trading partners will need to provide a revised health certificate to the department for approval. Trading partners are encouraged to implement required certification changes in a timely manner to prevent disruptions to trade.</p>

G/SPS/N/USA/3415 31/08/2023	United States of America	<i>All commodities</i> Phenol; Revoking Exemption From the Requirement of a Pesticide Tolerance. Proposed Rule. EPA is proposing to revoke the tolerance exemption for residues of the antimicrobial pesticide ingredient phenol when used as an inert ingredient (solvent/cosolvent) in	23/10/2023

pesticide formulations applied to growing crops. This rulemaking is proposed on the Agency's own initiative under the Federal Food, Drug, and Cosmetic Act (FFDCA) to implement a tolerance action the Agency determined was appropriate during the registration review conducted under the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) for phenol. EPA is proposing to revoke this tolerance exemption because it corresponds to a use no longer current or registered under FIFRA in the United States.
