G/SPS/N/SAU/538 02/09/2024	Saudi Arabia, Kingdom of	<i>Poultry meat, eggs and their products</i> Notice of Administration Order of Saudi Food and Drug Authority Ref. No. 9125 dated 26 August 2024 entitled "Temporary ban on importation of poultry meat, eggs and their products originating from Morbihan in France". Following the WOAHA report dated 23 August 2024, a Highly Pathogenic Avian Influenza (HPAI) virus outbreak has occurred in Morbihan in France. In compliance with the World Organisation for Animal Health (WOAH), Terrestrial Animal Health Code Chapter 10.4, it is deemed necessary for the Kingdom of Saudi Arabia to prevent the entry of the HPAI virus into the country. Therefore, the import of poultry meat, eggs and their products from Morbihan in France to the Kingdom of Saudi Arabia is temporarily suspended (with the exception of processed poultry meat and egg products exposed to either heat or other treatments that ensure deactivation of the HPAI virus, as long as it conforms with the approved health requirements, and standards, with a health certificate issued by the official bodies in France prove that the product is free from the virus).

G/SPS/N/NOR/40 04/09/2024	Norway	<p><i>Fertilizing products of organic origin and certain inorganic fertilizing products</i></p>	03/11/2024

Draft regulations concerning the manufacture, placing on the market and import of fertilising products of organic origin and certain inorganic fertilising products (Fertilising Products Regulations).

The Norwegian Food Safety Authority has proposed a new regulation concerning the production and marketing of fertilizing products. It provides rules for safe fertilizer production and is adapted to changes that have taken place in the market regarding increased interest in the use of waste and by-products in the production of fertilizers.

The proposal introduces the following amendments:

- The requirements for hygienization and stabilization are clarified, and the indicator organism thermotolerant coliform bacteria is changed to *E. coli*;
- A limit value has been added for arsenic;
- The table of raw materials and raw material categories that can be used in fertilizer production has been updated (appendix 1) and a new system with applications for the use of other types of raw materials that are not listed in the table is being introduced;
- The registration obligation changes from a requirement for product registration to a requirement for business registration;
- Labelling requirements that earlier were included in a standard are now in the regulation;
- Both organic and inorganic biostimulants are covered by the new regulation, and they are more clearly distinguished from pesticides;
- There is a new paragraph concerning products traded under the agreement of mutual recognition in the EEA.
