The proposal is a trade facilitation measure aimed at optimizing and streamlining certification procedures. The proposed measure does not establish or amend the phytosanitary requirements applicable to the products, but rather establishes the digital modality for the issuance, validation and use of the certificate.</p> | 31/10/2026         |

**On the Approval of the Rules and Conditions for Issuing Permits by the Legal Entities under Public Law – The Revenue Service and the National Food Agency and of the Forms of Permit Certificates**

It establishes and amends the list of authorized countries for the purpose of inclusion therein. In particular, by way of exception, the National Food Agency may, until 1 September 2032, include in the list of authorized countries/exporting establishments a country/establishment with which Georgia has trade relations concerning the importation of specific products subject to veterinary control during the period from 1 September 2024 to 1 September 2026, on the basis of satisfactory health guarantees. The relevant provision has already been published. This notification is intended for informational purposes, clarifying that a transitional period is in place for the establishment of the list of authorized countries.

| <a href="#">G/SPS/N/USA/3596</a><br>31/08/2026 | United States of America | <i>Multiple commodities</i><br><b>Receipt of Pesticide Petitions Filed for Residues of Pesticide Chemicals in or on Various Commodities - May 2026</b><br>This document announces EPA's receipt of and solicits public comment on initial filings of pesticide petitions requesting the establishment or modification of regulations for residues of pesticide chemicals in or on various commodities. EPA is providing this notice in accordance with the Federal Food, Drug, and Cosmetic Act (FFDCA). EPA uses the month and                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        | 16/09/2026 |

year in the title to identify when the Agency compiled the petitions identified in this notice of filing. Unit II. of the Federal Register document identifies certain petitions received in 2025 and 2026 that are currently being evaluated by EPA, along with information about each petition, including who submitted the petition and the requested action. EPA harmonizes with Codex where possible, but for some of the MRLs (tolerances) in question, the data provided to EPA may support a different MRL than Codex. Please refer to the Federal Register Notice for full information regarding which MRLs are harmonized and which are not.
