G/SPS/N/BRA/2526 14/09/2026	Brazil	<i>Environment. Health protection. Safety (ICS code(s): 13)</i> Draft Resolution 1.417, 17 August 2026 This draft resolution proposes an amendment to Monograph P67 – <i>Pseudomonas fluorescens</i>, in the List of Active Ingredient Monographs for Pesticides, Disinfectant Sanitizers, and Wood Preservatives, established by Normative Instruction (IN) No. 103 of 19 October 2021, and published in the Official Gazette of the Union (DOU).	13/11/2026
G/SPS/N/BRA/2528 14/09/2026	Brazil	<i>Limonium sinuatum</i> Draft - Updates the phytosanitary requirements for the importation of cut statice flowers (<i>Limonium sinuatum</i>) produced in the Republic of Colombia Draft Ordinance aiming to update the phytosanitary requirements for the importation of cut statice flowers (<i>Limonium sinuatum</i>) produced in Colombia. The consignments must be accompanied by a Phytosanitary Certificate issued by the National Plant Protection Organization (NPPO) of Colombia, which must include the following additional declaration: “The consignment is free from <i>Copitarsia heydenreichii</i> and <i>Neoaliturus tenellus</i>.”. Further details are set out in the Draft Ordinance.	13/11/2026
G/SPS/N/BRA/2530 14/09/2026	Brazil	<i>Paulownia spp.</i> Draft - Establishes the phytosanitary requirements for the importation of in vitro seedlings of <i>Paulownia spp.</i> produced in the Kingdom of Spain Draft Ordinance aiming to establish the phytosanitary requirements for the import of in vitro seedlings (Category 4) of <i>Paulownia spp.</i> produced in Spain. The consignments must be accompanied by a Phytosanitary Certificate, issued by the National Plant Protection Organization – NPPO of Spain, which must include the following additional declaration: “The consignment is free from <i>Diaporthe eres</i> and <i>Pseudomonas syringae</i> pv. <i>actinidiae</i>, according to the result of the official laboratory analysis No. ().”. Further details are set out in the Draft Ordinance.	13/11/2026
G/SPS/N/BRA/2531 14/09/2026	Brazil	<i>Artichoke (Cynara scolymus)</i> Draft - Updates the phytosanitary requirements for the importation of artichoke inflorescences (<i>Cynara scolymus</i>) produced in the Argentine Republic Draft Ordinance aiming to update the phytosanitary requirements for the importation of artichoke inflorescences (Category 3) (<i>Cynara scolymus</i>) produced in Argentina. The consignments must be accompanied by a Phytosanitary Certificate, issued by the National Plant Protection Organization – NPPO of Argentina, which must include an additional declaration stating that the consignment is free from <i>Bagrada hilaris</i>, <i>Cacoecimorpha pronubana</i>, <i>Copitarsia heydenreichii</i> and <i>Tetranychus turkestani</i>, as detailed in the Draft Ordinance.	13/11/2026

*Bare-rooted coffee (*Coffea arabica*) plants*

13/11/2026

Resolución 237-2026-IPSA, Establecimiento de Requisitos Fitosanitarios para la Importación de planta raíz desnuda café (*Coffea arabica*), origen Guatemala (Resolution No. 237-2026-IPSA establishing phytosanitary requirements for the importation of bare-rooted coffee (*Coffea arabica*) plants originating in Guatemala)

The notified document establishes phytosanitary requirements for the importation of bare-rooted coffee plants originating in Guatemala.1. The shipment must be accompanied by an official phytosanitary certificate, which certifies that the plants have been officially inspected by the national plant protection organization (NPPO) of the country of origin, and indicates under "Additional declaration" that the shipment comes from a crop inspected during the growth period at appropriate times for the detection of pests and has been found free of: *Meloidogyne paranaensis*, *Pseudococcus elisae*, *Dysmicoccus neobrevipes*;2. The shipment will be subject to a phytosanitary inspection and sampling for phytosanitary diagnosis at the agricultural quarantine post upon entry into the country. Shipments will be subject to phytosanitary checks by plant quarantine inspectors from the Institute for Agricultural and Livestock Protection and Health, who will verify compliance with the phytosanitary requirements and decide whether or not to authorize importation, on the basis of the accompanying documents.

Resolución 238-2026-IPSA, Establecimiento Requisitos Fitosanitarios para la Importación de planta in vitro aguacate (*Persea americana*), origen Israel (Resolution No. 238-2026-IPSA establishing phytosanitary requirements for the importation of in vitro avocado (*Persea americana*) plants originating in Israel)

The notified document establishes the phytosanitary requirements for the importation of in vitro avocado plants originating in Israel.1. The shipment must be accompanied by an official phytosanitary certificate, which certifies that the plants have been officially inspected by the national plant protection organization (NPPO) of the country of origin, and indicates under "Additional declaration" that the shipment comes from a crop that was inspected during the growth period at appropriate times for the detection of pests, was subjected to molecular laboratory testing (RT-PCR or sequencing) for the detection of pests and was found to be free of: Avocado sunblotch viroid, Potato spindle tuber viroid, *Xylella fastidiosa*;2. The "Additional declaration" must also state that the NPPO certifies that the in vitro plants are free of pests, based on an official laboratory result bearing the corresponding

reference number;3. The shipment will be subject to a phytosanitary inspection and sampling for phytosanitary diagnosis at the agricultural quarantine post upon entry into the country. Shipments will be subject to phytosanitary checks by plant quarantine inspectors from the Institute for Agricultural and Livestock Protection and Health, who will verify compliance with the phytosanitary requirements and decide whether or not to authorize importation, on the basis of the accompanying documents.

The notified Resolution establishes the phytosanitary requirements for the importation of aubergine seeds originating in Brazil.1. The shipment must be accompanied by an official phytosanitary certificate indicating that the seeds come from areas or production sites officially inspected by the national plant protection organization (NPPO) of the country of origin and have been found free of: *Phomopsis vexans*, Tobacco mosaic virus, *Verticillium dahliae*;2. The shipment must be free from soil and any foreign material or contaminants;3. The seeds must be presented in new, first-use packaging, completely free of foreign material or contaminants;4. The shipment will be subject to a phytosanitary inspection and sampling for phytosanitary diagnosis at the agricultural quarantine post upon entry into the country. Shipments will be subject to phytosanitary checks by plant quarantine inspectors from the Institute for Agricultural and Livestock Protection and Health, who will verify compliance with the phytosanitary requirements and decide whether or not to authorize importation, on the basis of the accompanying documents.

Saudi
Arabia,
Kingdom of

Poultry meat, eggs and their products

Notice of Administration Order of Saudi Food and Drug Authority Ref. No. 11854 dated 13 September 2026 entitled "Temporary ban on importation of poultry meat, eggs and their products originating from Maine-et-Loire in France"

Following the WOAHP report dated 1 September 2026, a Highly Pathogenic Avian Influenza (HPAI) virus outbreak has occurred in Maine-et-Loire in France. In compliance with the World Organisation for Animal Health (WOAH), Terrestrial Animal Health Code Chapter 10.4, it is deemed necessary for the Kingdom of Saudi Arabia to prevent the entry of the HPAI virus into the country. Therefore, the import of poultry meat, eggs and their products from Maine-et-Loire in France to the Kingdom of Saudi Arabia is temporarily suspended (with the exception of processed poultry meat and egg products exposed to either heat or other treatments that ensure deactivation of the HPAI virus, as long as it conforms with the approved health requirements, and standards, with a health certificate issued by the official bodies in France prove that the product is free from the virus).

Preparations of a kind used in animal feeding (HS code(s): 2309)

Commission Implementing Regulation (EU) 2026/1811 of 24 July 2026 concerning the authorisation of eugenol and trans-anethole as feed additives for poultry and ornamental birds and the renewal of the authorisation of trans-anethole produced by chemical synthesis as a feed additive for ornamental birds, and amending Implementing Regulation (EU) 2022/1452 (Text with EEA relevance)

The act further to the positive scientific assessment conducted by the European Food Safety Authority: Authorises for the first time for a period of 10 years the following feed additives: Eugenol by the extraction from dried clove leaves or clove leaf oil (Eugenia caryophyllata Thunberg) for poultry and ornamental birds; Trans-anethole produced by chemical synthesis for poultry; Trans-anethole produced from leaves or fruit of star anise (Illicium verum Hook.f) for poultry and ornamental birds. The terms of the authorisation are detailed in the Annex to the Act. Renews trans-anethole produced by chemical synthesis for ornamental birds. This additive was authorised for a period of 10 years. The application for the authorisation of trans-anethole produced by chemical synthesis for ornamental birds should be treated as an application for renewal of the authorisation granted by Implementing Regulation (EU) 2022/1452. The terms of the renewal are detailed in the Annex to the Act. A transitional period is included for the interested parties to meet the new authorisation's requirements. Modifies the authorisation of trans-anethole from pine oil to set a maximum content. Trans-anethole produced from pine oil authorised for ornamental birds by Implementing Regulation (EU) 2022/1452 should be authorised with a maximum content as it has the same specifications in terms of composition as the trans-anethole produced by chemical synthesis that is going to be renewed with a maximum content due to the zootechnical effects. The terms of the modification are detailed in the Annex to the Act. A transitional period is included for the interested parties to meet the new authorisation's requirements. All the additives belong to the category "sensory additives" and the functional group "compounds".

Preparations of a kind used in animal feeding (HS code(s): 2309)

Commission Implementing Regulation (EU) 2026/1859 of 29 July 2026 concerning the renewal of the authorisation of a preparation of taurine as a feed additive for Canidae Felidae Mustelidae, carnivorous finfish and other aquatic carnivorous species and repealing Implementing Regulation (EU) 2015/722 (Text with EEA relevance)

The preparation of Taurine covered by the Act was authorised for 10 years as feed additive for Canidae, Felidae, Mustelidae and carnivorous fish by Commission Implementing Regulation (EU) 2015/722 in the additive category ‘nutritional additives’ and in the functional group ‘vitamins, pro-vitamins and chemically well-defined substances having similar effect’. An application was submitted for the renewal of the authorisation of this preparation in accordance with article 14 of Regulation (EC) No 1831/2003. Based on the favourable conclusions of a scientific assessment of the dossier submitted by the applicant, conducted by the European Food Safety Authority (EFSA), the authorisation of this preparation as a feed additive for CanidaeFelidaeMustelidae, carnivorous finfish and other aquatic carnivorous species a is renewed under certain conditions detailed in the Annex to the Act. A transitional period is included for the interested parties to meet the new authorisation’s requirements.

Ukraine

Natural mineral water and spring water

Draft Order of the Ministry of Agrarian Policy and Food of Ukraine "On Amendments to the Order of the Ministry for Development of Economy, Trade and Agriculture of Ukraine No. 741 of 12 April 2021" (concerning Hygienic Requirements for the production and circulation of natural mineral water and spring water)

The draft Order provides for amendments to the Hygienic Requirements for the Production and Circulation of Natural Mineral Waters and Spring Waters, approved by Order of the Ministry for Development of Economy, Trade and Agriculture of Ukraine No. 741 of 12 April 2021, notified in documents G/SPS/N/UKR/156 and G/SPS/N/UKR/156/Add.1. The draft Order establishes conditions for the treatment of natural mineral waters and spring waters with ozone-enriched air and activated alumina to ensure the safety of the treatment processes and prevent changes to the essential characteristics of the waters. It sets requirements for the use of ozone-enriched air for the removal of compounds of iron, manganese, sulphur and arsenic, and for the use of activated alumina for the removal of excess fluoride compounds, including requirements concerning its initialisation, regeneration and quality control. The draft Order also establishes requirements concerning the permissible margins of error and the accuracy of safety testing of treated natural mineral waters and spring waters, the application of appropriate production and hygiene practices and the monitoring of critical stages of the treatment process. It also establishes labelling requirements for treated waters indicating the adsorption method used. The draft Order has been developed based on the provisions of Commission Directive 2003/40/EC and Commission Regulation (EU) No 115/2010. The draft Order is also notified under the TBT Agreement.

Viet Nam

Live animals and animal genetic material covered by the Draft Circular, including breeding animals, hatching eggs, semen, embryos and other genetic material of livestock breeds, in particular breeds listed in the List of livestock breeds requiring conserv

Draft Circular of the Minister of Agriculture and Environment on Management of Livestock Breeds and Livestock Breed Products

The Draft Circular consolidates and updates Viet Nam's rules on the management of livestock breeds and livestock breed products. It covers the international exchange of rare and precious animal genetic resources; the export or international exchange of livestock breeds and livestock breed products included in the List of livestock breeds prohibited from export; the List of livestock breeds requiring conservation; and the List of livestock breeds prohibited from export. It also prescribes requirements and procedures for testing and recognition of testing results for livestock lines and breeds; recognition of new livestock lines and breeds; minimum quality levels for livestock

16/11/2026

breeds; and certificates of training in artificial insemination and embryo transfer techniques. Applications may be submitted in person, by post or electronically, with specified processing time limits and responsibilities for updating the national livestock database. The Draft Circular maintains and standardizes four administrative procedures, clarifies central and provincial competence, reduces or simplifies processing requirements, and strengthens traceability, electronic processing and post-market control. It does not maintain the former procedure for registration of breed testing or the former procedure for first-time import of breeding males, semen and embryos; importers remain responsible for origin, declared standards and quality under applicable legislation. The Draft Circular will replace Circular No. 22/2019/TT-BNNPTNT dated 30 November 2019 and Circular No. 21/2024/TT-BNNPTNT dated 11 December 2024 and repeal the relevant provisions and forms of Circular No. 94/2025/TT-BNNMT dated 31 December 2025, Circular No. 22/2026/TT-BNNMT dated 19 May 2026 and Circular No. 23/2019/TT-BNNPTNT dated 30 November 2019. Transitional provisions preserve the validity of approvals, decisions and certificates already issued and provide for continued processing of applications received before entry into force.
