**cyproconazole and spirodiclofen in oron certain products (Text with EEA relevance).**

The proposed draft Regulation concerns the review and update of existing MRLs for cyproconazole and spirodiclofen in certain food commodities. MRLs for these substances in certain commodities are lowered. MRLs for these substances in certain commodities are changed. Lower MRLs are set after deleting old uses which are not authorised any more in the European Union as the approval of the use of the active substance has expired.

Indonesia

*Animal and animal product, fish and fisheries product, plant and plant product*

**Presidential Decree No. 45 Year of 2023 concerning to Indonesian Quarantine Authority.**

Following-up to the stipulation of the Government Regulation No. 29 Year of 2023 regarding to the New Regulation of Animal, Fish and Plant Quarantine, the President of Indonesia has officially announced the establishment of the Indonesian Quarantine Authority as a Ministerial Level of Government Institution, through a Presidential Decree No 45 Year of 2023. With the establishment of Ministerial Level of Government Institution, the Indonesian Quarantine Authority is officially declared as the Border Authority which has task and duty of animal and animal product, fisheries and fish product, plant and plant product. This declaration emphasizes that the functions and authority of animal quarantine and plant quarantine is no longer under the authority of Ministry of Agriculture, and the functions and authority of fish quarantine is no longer under the authority of Ministry of Fisheries and Marine Affairs, since they have become an integral part of the Indonesian Quarantine Authority as the official border competent authority.

26/01/2024

Türkiye

*Plant and plant products subject to phytosanitary certificate*

**QR Code Verifiable Phytosanitary Certificates.**

It has been encountered fake Phytosanitary Certificate (PC) and PC for Re-export recently. The Phytosanitary Certificate and PC for Re-export issued by Türkiye will gradually be replaced by "QR Code Verifiable Phytosanitary Certificate" to ensure the security of PC and PC for Re-export. PCs (including PC for Re-export) will contain a QR code in the number 2 digit, which enables verification. Only the content of the certificate will be displayed without wet signature and stamp during the query phase with the QR code. Original certificates sent to the recipient countries with the product will be QR coded, wet signed and stamped. In addition, it will also be possible to see whether the consignment has left Türkiye Customs or not in the query of QR Code Verifiable PC (except PC for Re-export) issued only for fresh fruit and vegetable products.

As of 22 January 2024 in Samsun Agricultural Quarantine Directorate; As of 15 February 2024, QR Code Verifiable Phytosanitary Certificate (PC) will be used from all our authorized units. Between 22 January and 15 February 2024, PCs without QR code and QR Coded Verifiable Phytosanitary Certificates will be used together.

Verifiable Phytosanitary Certificates with QR Code can be queried from <https://tbs.tarbil.gov.tr/Main/PhytosanitaryCertificate>. A sample of a QR Code Verifiable Phytosanitary Certificate and Phytosanitary Certificate for Re-export can be reached from the following links:

United  
Kingdom

*Products (and associated GB commodity codes\*): Celeries (0270030) and rhubarbs (0270070)*

**New GB MRLs for azoxystrobin amending the GB MRL Statutory Register.**

Azoxystrobin is an approved active substance in Great Britain. An application was received by the Health and Safety Executive to set new MRLs for celeries and rhubarbs. Following assessment, new MRLs have been introduced to accommodate the authorisations of plant protection products in Great Britain. The Evaluation Report/Reasoned Opinion supporting the new MRLs is available at the following link. A complete list of the new MRLs is available within this document, see page 5: New MRLs (hse.gov.uk) The residue levels arising in food from the notified uses result in consumer exposures below the toxicological reference values and therefore harmful effects on human health are not expected. As the residue levels exceed the current MRLs in force, new MRLs are being adopted.
