G/SPS/N/BRA/2079 03/10/2022	Brazil	<i>Environment. Health protection. Safety (ICS code: 13)</i> Draft Resolution number 1111, 1 September 2022. This draft resolution is regarded the proposal for the update of active ingredients A26 –Azoxystrobin, A29 –Acetamiprid, B54 –Bixafem, C60 –Zeta-cypermethrin, C36 –Cyproconazole, C40 –Chlorfenapyr, C52 –Benzalkonium Chlorides, C70 –Chloranthraniliprole, E25 –Spirodiclofen, F68 –Fluxapyroxad, F69 –Flupyradifurone, M49 –Metominostrobin, M52 –Mefentrifluconazole, P50 –Picoxystrobin, P53 –Prothioconazole, S09 –Sulfentrazone, T32 –Tebuconazole, T54 –Trifloxystrobin and T56 –Trinexapak-ethyl on the Monograph List of Active Ingredients for Pesticides, Household Cleaning Products and Wood Preservers, published by Normative Instruction number 103 -19 October 2021 on the Brazilian Official Gazette (DOU -Diário Oficial da União).	06/11/2022
G/SPS/N/BRA/2080 03/10/2022	Brazil	<i>Environment. Health protection. Safety (ICS code: 13)</i> Draft Resolution number 1116, 16 September 2022. This draft resolution is regarded to the proposal for inclusion of active ingredient B59 -BENALAXIL-M on the Monograph List of Active Ingredients for Pesticides, Household Cleaning Products and Wood Preservers, published by Normative Instruction number 103 -19 October 2021 on the Brazilian Official Gazette (DOU -Diário Oficial da União).	19/11/2022
G/SPS/N/BRA/2081 03/10/2022	Brazil	<i>Draft Resolution number 1117, 22 September 2022.</i> Draft Resolution number 1116, 16 September 2022. This draft resolution is regarded to the proposal for inclusion of active ingredients A26 –Azoxystrobin, A29 –Acetamiprid, A67 –Afidopyropene, B46-Benzovindiflupyr, C36 –Cyproconazole, D36 –Difenoconazole, E30 –Etoazole, F36–Flutriafol, I30 –Impirfluxam, P21 –Propiconazole, P43 –Pyrimethanil, T32-Tebuconazole, T39 –terbutylazine on the Monograph List of Active Ingredients for Pesticides, Household Cleaning Products and Wood Preservers, published by Normative Instruction number 103 -19 October 2021 on the Brazilian Official Gazette (DOU -Diário Oficial da União).	26/11/2022
G/SPS/N/CAN/1455 03/10/2022	Canada	<i>Malic acid (ICS code: 67.220.20)</i> Notice of Modification to the List of Permitted pH Adjusting Agents, Acid-Reacting Materials and Water Correcting Agentsto Extend the Use of Malic Acid to Honey Wine. Health Canada's Food Directorate completed a premarket safety assessment of a food additive submission seeking approval for the use of malic acid in honey wine including honey wine to which fruits are added, and mead. Malic acid is already permitted for use in Canada as a pH adjusting agent in various food categories, including 'grape' wine and unstandardized foods (such as mead, and honey	04/12/2022

wine with added fruits) at a maximum level of use consistent with Good Manufacturing Practice.

The results of the premarket assessment support the safety of malic acid for its requested use in honey wine. Consequently, Health Canada has enabled the use of malic acid described in the information document by modifying the List of Permitted pH Adjusting Agents, Acid-Reacting Materials and Water Correcting Agents, effective 23 September 2022. The purpose of this communication is to publically announce the Department's decision in this regard and to provide the appropriate contact information for those wishing to submit an inquiry or new scientific information relevant to the safety of this food additive.

Pectin lyase from Trichoderma reeseiRF6199 in various foods (ICScode: 67.220.20)

04/12/2022

Notice of Modification to the List of Permitted Food Enzymesto Enable the Use of Pectin Lyase from Trichoderma reeseiRF6199 in Various Foods.

Health Canada's Food Directorate completed a premarket safety assessment of a food additive submission seeking approval for the use of pectin lyase from Trichoderma reeseiRF6199 in various foods. Pectin lyase from Aspergillus nigerRung373 is already permitted for use in Canada in various standardized and unstandardized foods at a level consistent with Good Manufacturing Practice. However, the source organism T. reeseiRF6199 was not a permitted source for any food enzyme in Canada. The results of the premarket assessment support the safety of pectin lyase from T. reeseiRF6199 for its requested uses. Consequently, Health Canada has enabled the use of Pectin lyase from T. reeseiRF6199 described in the information document by modifying the List of Permitted Food Enzymes, effective 23 September 2022. The purpose of this communication is to publically announce the Department's decision in this regard and to provide the appropriate contact information for those wishing to submit an inquiry or new scientific information relevant to the safety of this food additive.

Phosphatidylserine derived from soy as a supplemental ingredient

30/11/2022

Notice of proposal to enable the use of phosphatidylserine (soy) as a supplemental ingredient in foods.

Health Canada's Food Directorate has assessed phosphatidylserine for use as a supplemental ingredient. This is one of the ingredients the Food Directorate previously identified for further assessment since it was an ingredient that was present in product(s) that were previously eligible to transition to the food regulatory framework under Temporary Marketing Authorizations.

The Food Directorate concluded that information related to the safety of phosphatidylserine derived from soy supports its safe use in supplemented foods provided levels of use do not exceed intakes of 300 mg per day, do not exceed 300 mg per serving, and that certain other compositional and labelling requirements are met; as set out in the information document. Consequently, Health Canada proposes to enable the use of phosphatidylserine (soy) by modifying the List of Permitted Supplemental Ingredients.

G/SPS/N/NZL/698 03/10/2022	New Zealand	<p><i>Aquatic animal products from all countries for all uses other than as bait or feed for aquatic animals</i></p> <p>Import Health Standard: Aquatic Animal Products (ShortName: AQUAPROD.GEN).</p> <p>The Import Health Standard: Aquatic Animal Productscontains New Zealand's specific biosecurity import requirements for products derived from fish, aquatic crustaceans, aquatic molluscs, echinoderms, cnidarians, tunicates, and annelids imported from all countries for all uses other than for use as bait and feed for aquatic animals. Products that comply with the requirements of the</p>	24/10/2022

standard will meet New Zealand's appropriate level of biosecurity protection.

This notification is for consultation pertaining only to the following proposed amendments to the Import Health Standard: Aquatic Animal Products:

1. Redefining the ocean areas for importing fish from Australia;
2. Government-endorsed manufacturer's declaration as an alternative option to health certification for aquatic animal products;
3. Exporter's declaration as an alternative to health certification for aquatic animal products from Australia;
4. Schedules 4 and 6 of AQUAPROD.GEN IHS have updated fish species list;
5. Removal of health certification requirement for fish imported for further processing in New Zealand;
6. Bill of lading as acceptable document for freezing duration calculation;
7. Inclusion of a new section for composite products (products containing a mix of aquatic and non-aquatic animal ingredients);
8. Inclusion of a new section for importing marine annelid products;
9. Rephrasing some clauses for added clarity.

Meat and meat products (bovine, bubaline, camelidae, caprine, cervidae, ovine, porcine and soliped) (ICS code: 67.120; HS code: 02 -Chapter 2 -Meat and edible meat offal)
Draft updates to Australian Standard 4696:2022, Hygienic production and transportation of meat and meat products for human consumption.

Australia is updating its mandatory standard for the hygienic production and transportation of meat and meat products for human consumption. It applies to meat produced in Australia and derived from animals of the bovine, bubaline, camelidae, caprine, cervidae, ovine, porcine and soliped species slaughtered other than in a wild state. Updates have been made to the requirements under Schedule 2 -Procedures for post-mortem inspection and Schedule 3 - Ante-mortem and post-mortem dispositions.

Ukraine

Meat of bovine animals aged up to 12 months

Draft Order of the Ministry of Agrarian Policy and Food of Ukraine "On approval of the Requirements for the marketing of meat of bovine animals aged up to 12 months".

The requirements establish the rules for the marketing of meat of bovine animals aged up to 12 months. These requirements will apply to meat of bovine animals aged up to 12 months slaughtered from 1 January 2026 intended for the marketing, export and import to the customs territory of Ukraine. Meat of bovine animals aged up to 12 months slaughtered before 1 January 2026 can be placed on the market according to the rules effective before these requirements come into effect, but not longer than the expiry of the minimum shelf life. The age limits for labelling provided in the requirements are brought in line with the requirements of Commission Regulation (EC) No 566/2008. Thus, the draft Order is also notified under the TBT Agreement.

United Arab
Emirates

All living animals, their products and their by-products

Draft of the revised Ministerial Resolution number 335 of the year 2018 concerning the regulation of the importation of living animals, their products and their by-products.

Following the WOAHA report dated 19 September 2022, a Highly Pathogenic Avian Influenza virus (HPAI) outbreak has occurred in Łódzkie, Poland. In compliance with the World Organisation for Animal Health (WOAH), Terrestrial Animal Health Code Chapter 10.4, it is deemed necessary for the Kingdom of Saudi Arabia to prevent the entry of HPAI into the country. Therefore, the import of poultry meat, eggs and their products (with the exception of processed poultry meat and egg products exposed to either heat or other treatments that ensure deactivation of avian influenza viruses) from Łódzkie in Poland to the Kingdom of Saudi Arabia is temporarily suspended.

Food products

Proposed Amendments to the Standards and Specifications for Foods.

The proposed amendments seek to:

1. Revise the preservation and distribution standards:
 - Expand the type of frozen products that can be distributed after thawing;
 - Allow refrigerated meat to be temporarily frozen for mincing;
 - Allow the use of room temperature and refrigerated products as components of frozen meal kit;
2. Revise the definition of food type:
 - Expand the product type of Nutritional formulas for elderly and patients;
 - Revise the definition of meal kit containing meat.

Oiseaux de toute espèce, volaille, viande de volaille, produits à base de viande de volaille, œufs, ovoproduits et aliments pour animaux

Mesure d'urgence, appliquée par le Maroc, interdisant l'importation depuis la Belgique d'oiseaux de toute espèce, de volailles, de viande de volaille, de produits à base de viande de volailles, d'œufs, d'ovoproduits et d'aliments pour animaux à partir de Belgique.

À la lumière des cas récents d'influenza aviaire hautement pathogène signalés par la Belgique, des mesures ont été prises pour interdire l'importation au Maroc de volailles de toute espèce, de viande de volaille, de produits à base de viande de volaille, d'œufs et d'ovoproduits en provenance de Belgique. L'interdiction ne s'applique pas à la viande de volaille, aux produits à base de viande de volaille et aux ovoproduits qui ont été traités thermiquement pour détruire le virus hautement pathogène de la grippe aviaire, conformément aux recommandations de l'OIE. À l'importation, ces produits doivent être accompagnés d'un certificat sanitaire et d'un certificat délivré par les autorités sanitaires attestant qu'ils ont subi un traitement thermique
