G/SPS/N/TPKM/619 16/10/2023	Chinese Taipei	<i>Plants or plant products</i> The draft amendment of Paragraph 10 of Part B of the "Quarantine Requirements for the Importation of Plants or Plant Products". Paragraph 10 of Part B of the "Quarantine Requirements for the Importation of Plants or Plant Products" was revised as follows: 1. The scientific name of Broad bean wilt virus and the abbreviation of Cucurbit chlorotic yellows virus (CCYV) were corrected; 2. <i>Apomyelois ceratoniae</i> , <i>Coscinoptycha improbana</i> and <i>Grapholita dimorpha</i> were added.	11/11/2023
G/SPS/N/SAU/517 16/10/2023	Saudi Arabia, Kingdom of	<i>Poultry meat, eggs and their products</i> Notice of Administration Order of Saudi Food and Drug Authority Ref. No. 8595 dated 12 October 2023 entitled "Temporary ban on importation of poultry meat, eggs and their products originating from Łódzkie in Poland". Following the WOA report dated 9 October 2023, a Highly Pathogenic Avian Influenza (HPAI) virus outbreak has occurred in Łódzkie in Poland. In compliance with the World Organization for Animal Health (WOAH), Terrestrial Animal Health Code Chapter 10.4, it is deemed necessary for the Kingdom of Saudi Arabia to prevent the entry of the	

H5N1 virus into the country. Therefore, the import of poultry meat, eggs and their products from Łódzkie in Poland to the Kingdom of Saudi Arabia is temporarily suspended (with the exception of processed poultry meat and egg products exposed to either heat or other treatments that ensure deactivation of the H5N1 virus, as long as it conforms with the approved health requirements, and standards, with a health certificate issued by the official bodies in Poland to prove that the product is free from the virus).

Dehydrated and pre-sterilised microbiological media

16/12/2023

Import risk review for dehydrated and pre-sterilised microbiological media: draft report.

The Australian Government Department of Agriculture, Fisheries and Forestry has released the Import risk review for dehydrated and pre-sterilised microbiological media: draft report (the review) for a 60-day consultation period. This review aims to modernise Australia's dehydrated and pre-sterilised microbiological media import conditions to appropriately reflect the level of biosecurity risk and simplify import permit conditions. It considers the biosecurity risks associated with importing (from any country) dehydrated and pre-sterilised microbiological media. It takes into account new and relevant peer-reviewed scientific information, international standards, relevant changes in industry practices and operational practicalities. The review identified two hazards of biosecurity concern for imported dehydrated and pre-sterilised microbiological media. Risk assessments were undertaken for each hazard and measures were proposed to manage the biosecurity risks. The draft report proposes baseline risk management measures for dehydrated and pre-sterilised microbiological media and specific risk management will continue to be required for bovine spongiform encephalopathy and scrapie.

Cellulase from Trichoderma reesei RF11412 in Brewers' mash and Distillers' mash (ICS Codes: 67.220.20)

24/12/2023

Notice of Modification to the List of Permitted Food Enzymes to Enable the Use of Cellulase from Trichoderma reesei RF11412 in Brewers' mash and Distillers' mash.

Health Canada's Food Directorate completed a premarket safety assessment of a food additive submission seeking authorization for the use of cellulase from Trichoderma reesei RF11412 in brewers' mash and distillers' mash. The requested maximum level of use for this food enzyme is "Good Manufacturing Practice". The results of the premarket assessment support the safety of cellulase from T. reesei RF11412 for its requested uses. Consequently, Health Canada has enabled the use of cellulase from this source as described in the information document by modifying the List of Permitted Food Enzymes, effective 11 October 2023. The purpose of this information document is to publicly announce the Department's decision in this regard and to provide the appropriate contact information for those wishing to submit an inquiry or new scientific information relevant to the safety of this food additive.
