New  
Zealand

*Fresh durian (Durio zibethinus)*  
**Amendment of Import Health Standard Commodity Sub-class: Fresh Fruit/Vegetables Durian, (Durio zibethinus) from Thailand**

13/12/2024

The sub-class import health standard describes the import specifications for fresh durian fruit imported into New Zealand. *Conogethes punctiferalis* is a regulated targeted measure pest for New Zealand and is a biosecurity risk associated with fresh durian from Thailand. MPI is proposing to replace the currently required measure of 'appropriate pest control activities' for *C. punctiferalis* on durian from Thailand with a 'systems approach'. The risk management proposal document contains technical details. The proposed systems approach schedule is formed by two independent measures below: Pest reduction activities in durian orchards; Packhouse inspection to exclude infested fruits.

Australia

*Fresh melon fruit*

16/12/2024

**Melon fruit from Japan: biosecurity import requirements draft report**

The draft report proposes that the importation of commercially produced fresh melon (*Cucumis melo*) fruit, except oriental melon (*C. melo* var. *makuwa*) and oriental pickling melon (*C. melo* var. *utilissimus*), to Australia from all commercial production areas of Japan be permitted, subject to a range of biosecurity requirements. The draft report contains details of pests that are of biosecurity concern to Australia that are potentially associated with the importation of commercially produced fresh melon fruit from Japan, the risk assessments for the identified pests, and the proposed risk management measures to reduce biosecurity risks to an acceptable level.
