Dried animal products, frozen/chilled uneviscerated fish products 20/12/2024

The draft amendment of Article 15 of the "Regulations for the Importation of Objects Subject to Animal Quarantine" and the following Quarantine Requirements in relation to Articles of the Regulations: (1) "Quarantine Requirements for the Importation of Dr

The amended texts of the draft amendment Regulations and Quarantine Requirements are marked in red. The amendments are briefly described as follows: Article 15 of the Regulations: A. Animal products that are prohibited from being import may be imported from animal infectious disease countries (zones) listed in Article 15, paragraph 1 of the Regulations, if their manufacturing processes and other risk control measures have been assessed and proven to effectively prevent the introduction of infectious animal diseases, posing no risk of disease transmission, and quarantine requirements have been established. The aforementioned quarantine requirements currently include quarantine requirements such as for the importation of poultry meat, processed products containing meat, dried animal products, and animal-derived products, etc. Therefore, this amendment has been made for clarification purposes.

B. Due to the lack of clear commercial sterilization requirements for acidified canned foods, and considering that canned foods containing animal-derived ingredients are mostly low-acid canned foods, the reference to acid canned food has been removed. Dried animal products and frozen/chilled uneviscerated fish products: The text is amended to revise the OIE abbreviation to WOAHA and that BAPHIQ, COA has been restructured as APHIA, MOA. There is no substantive content change.

Live crustaceans and molluscs

20/12/2024

The draft amendment of the "Quarantine Requirements for the Importation of Live Crustaceans and Molluscs" in relation to Article 10 (Annex 8-4) of the "Regulations for the Importation of Objects Subject to Animal Quarantine"

The amendment aims to incorporate the susceptible species of crustaceans and the sampling methods outlined in the emergency measures established in 2020 regarding the "Quarantine Requirements for the Importation of Regulated Objects Related to Decapod Iridescent Virus 1". Additionally, the update aligns with the latest version of the World Organisation for Animal Health (WOAH) regarding susceptible species of mollusks, and incorporates hybrid abalones in the quarantine requirements. The amended texts of the draft amendment quarantine requirements are marked in red.

Meat (game meat, poultry meat, meat derived from Artiodactyla animals, chilled or frozen beef/pork from Paraguay) and egg products for human consumption 20/12/2024

The draft amendment of the following Quarantine Requirements in relation the Articles of "Regulations for

the Importation of Objects Subject to Animal Quarantine": (1) "Quarantine Requirements for the Importation of Game Meat" (Article 10, Annex 13-1); (2
 Considering that there are numerous types of canned foods for human consumption that comply with high-temperature sterilization, and that some products are classified under specific Commodity Classification Code (CCC Code) and do not require quarantine, while other products are not classified under specific CCC codes or lack specific CCC codes altogether, necessitating quarantine procedures, and given that the risk of these canned foods transmitting infectious animal diseases is extremely low. Therefore, conditions are added that exempt meat and egg products that comply with high-temperature sterilization from quarantine requirements for consistency and to consider factor of quarantine cost. The amended texts of the draft amendment Quarantine Requirements are marked in red.
