G/SPS/N/CAN/1579 18/11/2024	Canada	<p><i>Pesticide flonicamid in or on various commodities (ICS Codes: 65.020, 65.100, 67.040, 67.060, 67.080, 67.220)</i></p> <p>Proposed Maximum Residue Limit: Flonicamid (PMRL2024-24)</p> <p>The objective of the notified document PMRL2024-24 is to consult on the listed maximum residue limits (MRLs) for flonicamid that have been proposed by Health Canada's Pest Management Regulatory Agency (PMRA).</p>	28/01/2025
G/SPS/N/CAN/1580 19/11/2024	Canada	<p><i>Various food colours, emulsifying agents and preservatives (ICSCodes: 67.220.20)</i></p> <p>Modifications to the List of Permitted Food Additives to set out the use of certain food colours, emulsifying agents and preservatives in two types of standardized flavouring preparations.</p> <p>As part of the modernization of Part B of the Food and Drug Regulations(FDR), Health Canada's Food and Nutrition Directorate intends to set out specific permitted uses of food colours and preservatives in "(naming the flavour) Extract or (naming the flavour) Essence" and of food colours, preservatives and emulsifying agents in "(naming the flavour) Flavour" in the Lists of Permitted Food Additives. Thespecific uses are based on the functional class food additive provisions currently set out in the food compositional standards for these two types of flavouring preparations and information Health Canada received from industry on the use of food additives from these functional classes in flavouring preparations.These modifications will come into force the day on which they are published in the Lists of Permitted Food Additives(https://www.canada.ca/en/health-canada/services/food-nutrition/food-safety/food-additives/lists-permitted.html) that will be incorporated by reference directly into the FDR. Health Canada will publish these lists on the Canada.ca website concurrently with the Regulations Amending Certain Regulations Concerning Food Additives and Compositional Standards, Microbiological Criteria and Methods of Analysis for Food, (https://www.gazette.gc.ca/rp-pr/p1/2023/2023-11-04/html/reg2-eng.html) which will be published in the Canada Gazette, Part II.The purpose of the information document is to publicly announce the Department's intent in this regard and to provide the appropriate contact information for those wishing to submit an inquiry or new scientific information relevant to the safety of these food additives.</p>	22/01/2025
G/SPS/N/CAN/1581 19/11/2024	Canada	<p><i>Pesticide flonicamid in or on various commodities (ICS Codes: 65.020, 65.100, 67.040, 67.060, 67.080, 67.220)</i></p> <p>Proposed Maximum Residue Limit: Flonicamid (PMRL2024-24)</p> <p>Health Canada's Food and Nutrition Directorate completed the premarket safety assessments of two food additive submissions seeking authorization for 1) the use of leucyl aminopeptidase from <i>Aspergillus oryzae</i>AT1088 in the</p>	

manufacture of bakery products; bread; Colby cheese; dairy-based flavouring preparations; flour; hydrolyzed animal, milk and vegetable proteins; hydrolyzed yeasts; spray-dried cheese powder; meat tenderizing preparations; various plant-based foods; pre-cooked (instant) breakfast cereals, whole wheat flour and yeast extracts, and 2) the use of lipase from *Aspergillus niger* PLR in bakery products, bread, flour, pasta and whole wheat flour. The results of the premarket assessments support the safety of leucyl aminopeptidase from *A. oryzae* AT1088 and of lipase from *A. niger* PLR for their requested uses. Consequently, Health Canada has authorized their uses as described in the information documents referenced above by modifying the List of Permitted Food Enzymes (<https://www.canada.ca/en/health-canada/services/food-nutrition/food-safety/food-additives/lists-permitted/5-enzymes.html>), effective 30 October 2024. The notice "Modification to the List of Permitted Food Enzymes to authorize the use of leucyl aminopeptidase from a new source" also reports on a corrective modification to the List of Permitted Food Enzymes. It explains that plant-based products that resemble fish or seafood products had been unintentionally excluded from the foods listing for carboxypeptidase D from *Aspergillus oryzae* AT1727 when the list was modified on 23 May 2023 and that entries for these food categories have been set out in the list for this food enzyme to correct this as of 30 October 2024. The purpose of these information documents is to publicly announce the Department's decision in this regard and to provide the appropriate contact information for those wishing to submit an inquiry or new scientific information relevant to the safety of these food additives.

Proposed Revision of the "Special Act on Imported Food Safety Control".

18/01/2025

The closure of business can not be reported not only during the business suspension period but also during a period from the time when a prior notice of disposition pursuant to Article 21 (Prior Notice of Disposition) of the Administrative Procedures Act is reached and the disposition becomes effective.

The basis for delegation is prepared so that the matters regarding imported food, etc. by original equipment manufacturing (OEM) to be observed by business entities are determined through Ordinance of the Prime Minister.

The basis for the planned import approval system is prepared in the law to allow the omission of documentary and field inspections during import declaration for the imported foods, etc. of which safety has been ensured for a long period, provided that such products have the annual import plan approved in advance.

Fresh cut flowers and foliage for decorative purposes

Ministry for Primary Industries, Import Health Standard: Fresh Cut Flowers and Foliage for Decorative Purposes (155.02.04).

07/02/2025

The proposed standard will replace the three current standards (Cut Flowers and Foliage, Cut Flowers and Branches Cordyline and Dracaena Species from All Countries, and Oncidium Cut Flowers). We are proposing several key changes to what can be imported, and to our import requirements.

- Adding 36 new plant genera and remove 78 plant genera. This would bring the total genera available to import to 136;
- Cut flowers and foliage will be available from 26 countries instead of 14;
- There will be additional requirements to manage pests on 57 host genera;
- We will no longer require any cut flowers and foliage to be devitalised.

Further details can be found within the Risk Management Proposal document.

G/SPS/N/IND/321 20/11/2024	India	<i>Dried fruits of plum (Prunus domestica) for consumption</i> Draft Plant Quarantine (Regulation of Import into India) Order, 2003 (Sixteenth Amendment) 2024. The Draft Plant Quarantine (Regulation of Import into India) (Sixteenth Amendment) Order, 2024 seeks to further liberalize provisions governing import of dried fruits of plum (<i>Prunus domestica</i>) for consumption from France.	19/01/2025

Food flavourings and certain food ingredients with flavouring properties 21/01/2025

Turkish Food Codex Regulation on Food Flavourings and certain food ingredients with flavouring properties for use in and on foods.

The purpose of this Regulation is to determine the flavourings and food ingredients with flavouring properties used in and on foods, the source materials used in their production, their conditions of use and labelling rules, taking into account consumer and human health, consumer rights, ensuring fairness in food sales and protecting the environment. This Regulation has been prepared for compliance with EU Regulation (EC) No 1334/2008, EU Regulation (EC) No 2065/2003 and Commission Implementing Regulation (EU) No 872/2012.

Resolution of the Cabinet of Ministers of Ukraine No.1301 "On Amendments to Certain Resolutions of the Cabinet of Ministers of Ukraine Concerning the Implementation of Official Control Measures" of 15 November 2024.

The Resolution of the Cabinet of Ministers of Ukraine No. 1301 "On Amendments to Certain Resolutions of the Cabinet of Ministers of Ukraine Concerning the Implementation of Official Control Measures" of 15 November 2024 (hereinafter -the Resolution) has been adopted to align the Resolutions of the Cabinet of Ministers of Ukraine No. 960 "On Some Issues of Official Control Measures of Goods Imported into the Customs Territory of Ukraine (including for the Purpose of Transit)" of 24 October 2018 and No. 1177 "On Some Issues of Implementation of the Law on Plant Quarantine" of 15 November 2019 in accordance with the provisions of the Law of Ukraine "On the Customs Tariff of Ukraine", as well as to improve and simplify control procedures at the state border. The Resolution stipulates the following:

- the lists of goods (regulatory objects), approved by Resolutions No. 960 and No. 1177, have been updated so that the descriptions of goods (regulatory objects) and their codes according to the UKTZED (Ukrainian Classification of Goods for Foreign Economic Activity) comply with the provisions of the Customs Tariff of Ukraine;
- Section 2 of the List of goods subject to veterinary and sanitary control, approved by Resolution No. 960, has been supplemented with the following items: crustaceans, with or without shell, live for breeding (heading 0306 according to UKTZED); molluscs, with or without shell, live for breeding (heading 0307 according to UKTZED); corals for breeding

(subheading 0508 00 according to UKTZED); semen and embryos of animals, fertilized fish eggs (heading 0511 according to UKTZED); veterinary vaccines (subheading 3002 42 00 00 according to UKTZED); other medicinal products used in veterinary medicine and animal husbandry (subheading 3004 90 00 00 according to UKTZED);

- The List of Goods, approved by Resolution No. 960, specifies that veterinary and sanitary control of veterinary products in the form of preliminary documentary control is not conducted;

- The List of Documents, approved by Resolution No. 960, specifies that only electronic (scanned) copies of documents, bearing a qualified electronic signature of the declarant or their authorized representative, based on a qualified electronic signature certificate, will be accepted;

- The Procedure for Interaction between Declarants, Their Representatives, Other Stakeholders and Customs Authorities, Other State Authorities, Institutions and Organisations Authorised to Perform Permitting or Control Functions for the Movement of Goods, Commercial Vehicles across the Customs Border of Ukraine Using the 'Single Window' Mechanism and Invalidation of Certain Resolutions of the Cabinet of Ministers of Ukraine, approved by the Resolution of the Cabinet of Ministers of Ukraine No. 971 of 21 October 2020, specifies that the aforementioned electronic (scanned) copies of documents shall be submitted through the "Single Window" web portal.
