G/SPS/N/CRI/289 25/11/2024	Costa Rica	<p><i>Plants for planting, in vitro plants for planting, botanical seeds, dried plants, and dried parts and trimmings of plants of the Musaceae (Musa sp.) family, and soil samples</i></p> <p>Proyecto que modifica la resolución No 060-2024-CV-ARP-SFE del 23 de julio de 2024, que establece medidas fitosanitarias para la importación de plantas para plantar y plantas in vitro de la familia Musaceae (Musa sp.) para plantar, originarias de cualquier país Y establece medidas para la mitigación del riesgo de la plaga Fusarium oxysporum f. sp. cubense raza 4 tropical (Foc R4T) (Draft amendment to Resolution No. 060-2024-CV-ARP-SFE of 23 July 2024, establishing phytosanitary measures for the importation of plants for planting and in vitro plants for planting of the Musaceae (Musa sp.) family originating in any country, and establishing measures to mitigate the risk of the Fusarium oxysporum f. sp. cubense tropical race 4 (Foc TR4) pest)</p> <p>The notified measure amends Resolution No. 060-2024-CV-ARP-SFE of the State Phytosanitary Service, Standards and Regulations Department, Pest Risk Analysis Unit, establishing phytosanitary measures for the importation of plants for planting and in vitro plants for planting of the Musaceae (Musa sp.) family originating in any country, and establishing phytosanitary measures to mitigate the risk of the Fusarium oxysporum f. sp. cubense tropical race 4 (Foc TR4) pest, of 23 July 2024, as follows: The text of paragraph 2, subparagraphs (a), (b), (c) and (d), of the operative provisions is replaced with: "The following phytosanitary measures are established for the importation of plants for planting, dried plants, and dried parts and trimmings of plants of the Musaceae family, as well as soil: a) The importation from any country of plants for planting of the Musaceae family, except for in vitro plants and botanical seeds, is prohibited; b) The importation of dried plants and dried parts and trimmings of plants of the Musaceae family from any country is prohibited (except for dried parts for research or laboratory samples from countries free from the Fusarium oxysporum f. sp. cubense tropical race 4 (Foc TR4) pest, provided that the laboratories studying them are duly G/SPS/N/CRI/289 - 2 - approved by the State Phytosanitary Service in accordance with the established procedures); c) The importation of soil samples from countries where Fusarium oxysporum f. sp. cubense tropical race 4 (Foc TR4) is present is prohibited; d) The prohibition on the importation of soil as a growing medium from any country is maintained." The other guidelines set out in the operative provisions of Resolution No. 60-2024-CV-ARP-SFE of 23 July 2024 remain fully in force.</p>	24/01/2025
G/SPS/N/CHL/810 25/11/2024	Chile	<p><i>Clonal walnut plants (Juglans regia, Juglans hindsii x Juglans regia and Juglans microcarpa x Juglans regia)</i></p> <p>Resolución No 7.648 de 2024: "Reconoce centro de producción Micro Paradox Inc. Para la exportación de plantas clonales de nogal desde Estados Unidos a Chile de las especies que se indica" (Resolution No. 7.648 of 2024 recognizing the production centre Micro Paradox Inc. for</p>	

the exportation of certain species of clonal walnut plants from the United States to Chile)

- The California-based production centre Micro Paradox Inc., approved by the SAG and the US authorities, is authorized to export clonal walnut plants;
- Rootstocks, microcuttings, microplugs, green bare root and micrografted plants are authorized for export under different specific conditions;
- Consignments must include an official phytosanitary certificate issued by the USDA or APHIS, with an additional declaration of compliance with measures for a list of quarantine pests;
- Consignments must undergo disinfestation treatment for insects and mites, be free from soil and gastropods, and use new containers and accompanying material incapable of harbouring pests;
- The notified Resolution provides for representative sampling for phytosanitary analysis, comprising division by discipline and sensitive methods to detect specific pests;
- Imports shall only be processed through the SAG office at Arturo Merino Benítez International Airport;
- Genetically modified material must be declared and comply with the SAG's specific rules;
- The SAG must be notified if the centre's phytosanitary status changes or if pests are detected; certification may be lost or reissued based on an official assessment;
- The SAG may conduct audits of the centre and take samples at the entry point to verify pest absence;

G/SPS/N/CHL/810 - 2 - • The centre's certification is initially valid for two years and can be automatically extended if there are no changes to the procedures or phytosanitary results. Further details can be found in the document attached to this notification.

G/SPS/N/KOR/814 26/11/2024	Korea, Republic of	<i>Food products</i> Proposed amendments to the Standards and Specifications for Food Additives	25/01/2025

The Republic of Korea is proposing to amend the "Standards and Specifications for Food Additives".

1) [Steviol Glycoside] (corresponding to INS No. 960c) obtained by the enzymatic treatment of stevia extract or purified stevia extract will be permitted as a food additive (sweetener);2) Fermented ethyl alcohol (spirits) will be permitted as a manufacturing solvent for the manufacturing of [Xanthan Gum] and [Gellan Gum];3) The analytical methods for [Invertase] and [Ferulic Acid] will be revised:

- For invertase, the wavelength for activity measurements will be specified as 515 nm;
- For ferulic acid, the indicator will be specified as bromothymolblue (BTB).

Recommended Specification for Acrylamide in Food

Commodity/Product and Recommended Specification for Acrylamide:

The recommended specification for processed cereal products and ready-to-eat foods have been revised to apply only to roasted, baked, or fried.

Operating period: From 1 February 2025

Action for Exceeding Recommended Specification

1. Encourage manufacturers, processors and importers of products exceeding the recommended specification to comply with and improve the recommended specification (notify inspection results to manufacturers, processors, or importers, refrain from importing the products, etc.)

2. Disclosure of information** when improvement measures are not implemented* for products exceeding the recommended Specification

* (Distribution food) Determined after six month in collection and inspection of same product / (Imported food) Exceeded recommended Specification twice or more.

** Food Safety Korea website (MFDS)> Professional information> Products exceeding the recommended Specification. Acts and subordinate statutes for Recommended Specification Article 7-2 of the Food Sanitation Act (Illustrations of Recommended Specification, etc.)

Pesticide Registration Maintenance Fee; Notice of Receipt of Requests To Voluntarily Cancel Certain Pesticide Registrations and Notice of Intent To Cancel Certain Other Pesticide Registrations for Non-Payment

EPA is issuing a notice of receipt of requests by registrants, submitted as part of their 2024 Pesticide Registration Maintenance Fee responses, to voluntarily cancel certain pesticide registrations. EPA intends to grant these requests to cancel at the close of the comment period for this announcement unless the Agency receives substantive comments within the comment period that would merit its further review of the requests to cancel, or unless the registrants withdraw its requests to cancel. If these requests to cancel are granted, any sale, distribution, or use of products listed in this notice will be permitted after the registrations have been cancelled only if such sale, distribution, or use is consistent with the terms as described in the final order. Additionally, EPA is issuing a notice of intent to cancel other pesticide product registrations as a result of registrants' non-payment of 2024 Pesticide Registration Maintenance Fees.

Indonesia

Primary food commodities of plant origin

27/01/2025

Draft Regulation of the National Food Agency of the Republic of Indonesia on Maximum Residue Limits of Pesticide in Primary Foods on the Markets

This Regulation is intended to serve as a standard or reference for food business operators, who wish to distribute/sell primary food commodities in the domestic market of Indonesia. This regulation specifies the maximum residue limits (MRLs) of pesticides for primary food commodities of plant origin. As Appendix I, MRLs are determined for 347 active substances of pesticides. If active substance of pesticides is not listed in Appendix I, then MRLs standard applied is 0.01 mg/kg. Compliance with MRLs would be determined by qualitative laboratory tests (screening test) followed with quantitative laboratory test for detected active substances. Additionally, Appendix II also specifies portion of primary food commodity used for laboratory testing. The date of entry into force is the same as the date of publication. However, there is a grace period of 18 months for products that have been put in the market before the publication date.

Draft Indonesian Food and Drug Authority Regulation concerning Food Packaging

This regulation is the revised version of the Regulation of the Indonesian FDA Number 20 Year 2019 on Food Packaging. Once this new regulation is enacted, the previous regulation (Regulation of Indonesian FDA Number 20 Year 2019 on Food Packaging) will be revoked. This regulation sets out permitted food packaging materials (migration level), general migration testing method, permitted food contact substances, prohibited food contact substances, recycled packaging material, application form for unlisted substances. This regulation contains six appendixes as follows: Appendix I. Listed of Permitted Food Packaging Materials Appendix II. General Migration Testing Method Appendix III. Migration Testing of Plastic Food Packaging Materials Intended for Reuse Appendix IV. Listed of Permitted Food Contact Substances for Food Packaging Appendix V. Listed of Prohibited Food Contact Substances for Food Packaging Appendix VI. Application Form for the Safety of Food Packaging

31/01/2024

Ministry for Primary Industries, Import Health Standard: Seeds for Sowing (155.02.05)

MPI is proposing to remove the following pests and any specific measures for these pests in the specific requirements in Part 2 in the Import Health Standard Seeds for Sowing (155.02.05): *Pseudomonas syringae* pv. *cannabina* and *Xanthomonas campestris* pv. *cannabis* from the *Cannabis sativa* schedule; Strawberry latent ringspot virus (strains not in New Zealand) from the *Fragaria* schedule; *Septoria helianthi* from the *Helianthus* schedule; *Coniothyrium lavandulae* and *Phoma lavandulae* from the *Lavandula* schedule. This change results in the removal of the *Lavandula* schedule from Part 2 in the import health standard and changes the import requirements for *Lavandula* seeds to basic requirements; *Penicillium brevicompactum* from the *Pinus* schedule; Plum pox virus from the *Prunus* schedule; Tobacco ringspot virus from the *Solanum tuberosum* schedule; *Tarsonemus granarius* from the *Triticum* schedule; High plains virus from the *Zea* schedule.

Emergency
notifications
(SPS)

"Temporary ban on importation of poultry meat, eggs and their products originating from Landes in France"

Following the WOAHA report dated 15 November 2024, a Highly Pathogenic Avian Influenza (HPAI) virus outbreak has occurred in Landes in France. In compliance with the World Organisation for Animal Health (WOAH), Terrestrial Animal Health Code Chapter 10.4, it is deemed necessary for the Kingdom of Saudi Arabia to prevent the entry of the HPAI virus into the country. Therefore, the import of poultry meat, eggs and their products from Landes in France to the Kingdom of Saudi Arabia is temporarily suspended (with the exception of processed poultry meat and egg products exposed to either heat or other treatments that ensure deactivation of the HPAI virus, as long as it conforms with the approved health requirements, and standards, with a health certificate issued by the official bodies in France prove that the product is free from the virus).
