G/SPS/N/ARM/35 06/12/21	Armenia	<i>Goods (products) subject to phytosanitary control</i> Eurasian Economic Commission Council Draft Decision on amendments to the Common List of Quarantine Pests of the Eurasian Economic Union approved by the Eurasian Economic Commission Council Decision No. 158 dated 30 November 2016 G/SPS/N/ARM/35 This draft provides for inclusion to the Common List of Quarantine Pests of the Eurasian Economic Union of 11 new quarantine pests: - Natal fruit fly (<i>Ceratitis rosa</i> Karsch); - Cucurbit beetle (<i>Diabrotica speciosa</i> Germar); - Western potato flea beetle (<i>Epitrix subcrinita</i> LeConte); - Emarginate ips (<i>Ips emarginatus</i> LeConte); - Monterey pine engraver (<i>Pseudips mexicanus</i> Hopkins); - Western cherry fruit fly (<i>Rhagoletis indifferens</i> Curran); - African armyworm (<i>Spodoptera exempta</i> Walker); - Sunflower fruit fly (<i>Strauzia longipennis</i> Wiedemann); - American dagger nematode (<i>Xiphinema americanum sensu stricto</i> Cobb); - Bricolense dagger nematode (<i>Xiphinema bricolense</i> Ebsary, Vrain & Graham); - Californian dagger nematode (<i>Xiphinema californicum</i> Lamberti & Bleve-Zacheo). Their introduction into the customs territory of the EAEU and their spread on it endangers the quarantine phytosanitary security of the EAEU member States.	04/02/22
G/SPS/N/IND/274 06/12/21	India	<i>Genetically modified or engineered food</i> Draft Food Safety and Standards (Genetically Modified or Engineered Foods) Regulations, 2021 G/SPS/N/IND/274 The Draft Food Safety and Standards (Genetically Modified or Engineered Foods) Regulations, 2021 is applicable to Genetically Modified Organisms (GMOs) or Genetically Engineered Organisms (GEOs) or Living Modified Organisms (LMOs) intended for direct use as food or for processing and Food or Processed food containing Genetically Modified ingredients produced from but not containing LMOs or GEOs or GMOs.	04/02/22
G/SPS/N/JPN/882 06/12/21	Japan	<i>Live poultry, poultry meat and egg products</i> Import suspension of live poultry, poultry meat and egg products from the counties of Bács-Kiskun and Csongrád-Csanád in Hungary G/SPS/N/JPN/882 In order to prevent the introduction of H5N1 high pathogenicity avian influenza (HPAI) virus into Japan, MAFF has suspended the import of live poultry, poultry meat and egg products from the counties of Bács-Kiskun and Csongrád-Csanád in Hungary, including those shipped through third countries, since 18 November 2021 based on the "Animal Health Requirements for day-old chicks of poultry to be exported to Japan from Hungary", "Animal Health	Emergency measure

Requirements for poultry meat etc. to be exported to Japan from Hungary" and the articles 37 and 44 of the "Act on Domestic Animal Infectious Disease Control".

The DLD order on temporary suspension of importation of live poultry and poultry carcasses from China to prevent the spread of Highly Pathogenic Avian Influenza (Serotypes H5N1 and H5N6) G/SPS/N/THA/467 According to the announcement of the Government Gazette dated 20 August 2021, the suspension for importation of live poultry and poultry carcasses from China has expired on 17 November 2021. However, the OIE has reported a continued outbreak of Highly Pathogenic Avian Influenza (HPAI) (Serotypes H5N5 and H5N6) in the area of China. Therefore, it is necessary for Thailand to prevent the entry of AI disease into the country. By the virtue of Animal Epidemics Act B.E. 2558 (2015), the importation of live poultry and poultry carcasses from China is temporarily suspended for a period of 90 days since 18 November 2021 onward in the Thai Royal Gazette (18 November 2021), except the feathers and down of poultry that have been processed in the approved establishment by the DLD and these commodities that have been processed to ensure the destruction of avian influenza virus recommended by OIE terrestrial Animal Health code topics 10.4.22 and 10.4.23 which use one of the following methods: - washed and steam-dried at 100°C for 30 minutes;- fumigation with formalin (10% formaldehyde) for 8 hours;- irradiation with a dose of 20 kilogray.

Draft Commission Regulation on recycled plastic materials and articles intended to come into contact with foods, and repealing Regulation (EC) No 282/2008 (Text with EEA relevance) G/SPS/N/EU/524 The regulation concerns the placing on the market of plastic materials and articles with recycled/secondary plastic content intended for use in contact with food. It sets out rules for the manufacture thereof, suitable recycling technologies, recycling processes, recycling installations, plastic waste, collection and sorting of plastic input and the decontamination thereof, and the use of the plastic output, quality control, registration of business operators and enforcement, with the purpose to ensure that the recycled content in the final plastic materials and articles intended for contact with food do not cause harm to the consumers of those foods, or change their quality or organoleptic properties. The Regulation repeals Regulation (EC) No 282/2008, which it will replace.

G/SPS/N/USA/3290 07/12/21	United States of America	<p><i>Horses</i></p> <p>"Import Regulations for Horses" [Docket No. APHIS-2016-0033] G/SPS/N/USA/3290 We are proposing to amend the regulations for the importation of equines. These changes include increasing the number of days horses exported from regions free from contagious equine metritis (CEM) are allowed to spend in a CEM-affected region and re-enter the United States without testing from 60 days to 90 days; requiring an import permit for horses transiting through CEM-affected regions; adding requirements for health certifications to ensure health certifications properly attest to the health of the imported horse; removing the requirement that horses permanently imported from Canada undergo inspection at the port</p>	28/01/22

of entry; requiring that horses transiting Central America or the West Indies comply with the same regulations that apply to horses directly imported from these regions; and adding requirements for shipping containers used in transporting horses. We are also proposing a number of miscellaneous changes to the regulations such as clarifications of existing policy or intent, and corrections of inconsistencies or outdated information. Many of these proposed changes would better align our regulations with international standards and allow us and the equine industry more flexibility. The proposed changes would also add further safeguards that protect against introducing or disseminating pests or diseases of livestock into the United States. (Federal Register, Vol. 86, No. 226, Monday, 29 November 2021, pages 67661-67669)

All rooted and unrooted plants for planting of Salpichroa spp. 07/02/22

The CFIA is prohibiting the import of *Salpichroa* spp. from all origins except the continental United States. D-08-04: Plant Protection Import Requirements for Plants and Plant Parts for Planting

G/SPS/N/CAN/1420 The Canadian Food Inspection Agency (CFIA) will prohibit the import of all propagative plant material (excluding seeds) of *Salpichroa* spp. from all origins except the continental United States. *Salpichroa* spp. is a host of the tomato leaf miner (*Tuta absoluta*), a regulated pest of Canada. In order to further prevent the spread of *Tuta absoluta* into Canada the CFIA will add *Salpichroa* spp. to Appendix 2: Plant taxa that are Not Authorized Pending a Pest Risk Analysis (NAPPRA) when intended for planting of D-08-04: Plant Protection Import Requirements for Plants and Plant Parts for Planting. The CFIA and the United States Department of Agriculture – Animal and Plant Health Inspection Service (USDA-APHIS) continue to work together by aligning our efforts to prevent the introduction of *Tuta absoluta*. CFIA's Automated Import Reference System (AIRS) is the definitive source for up to date import requirements.

Alimentos para consumo humano 07/02/22

Consulta pública de modificación del Decreto Supremo N°977/96, Ministerio de Salud, Reglamento Sanitario de los alimentos, Artículo 170, referida a factores de equivalencia tóxica (FET) de dioxinas, furanos y PCBs

G/SPS/N/CHL/711 Desde el año 2005 la Organización Mundial de la Salud (OMS) modificó los factores de equivalencia tóxica (FET) de dioxinas, furanos y PCBs por lo que la tabla que presenta estos factores en el artículo 170 del Reglamento Sanitario de los Alimentos está desactualizada. Por motivos de armonización con las directrices de la OMS y para fines de evaluación de riesgos se hace necesario hacer la actualización de estos factores. Además, se pudo verificar que existen errores en la identificación de los compuestos por lo que se hace la corrección en esta oportunidad. Para tales efectos, se destaca con amarillo los compuestos identificados erróneamente en las

diferentes partes del documento, ya sea en la tabla actual como en la tabla propuesta. Actualmente el Reglamento Sanitario de los Alimentos en el artículo 170 establece las identificaciones de los compuestos y sus respectivos factores de equivalencia tóxica. Este documento, incluye la Tabla de Factores de Equivalencia Tóxica Actuales y la Tabla de Factores de Equivalencia Tóxica Propuesta. Para mayor detalle revisar el documento adjunto a esta notificación.

G/SPS/N/USA/3291 09/12/21	United States of America	<p><i>Apple, wet pomace; Avocado; Berry, low growing, subgroup 13-07G; Brassica, leafy greens, subgroup 4-16B; Caneberry subgroup 13-07A; Fruit, citrus, group 10-10; Fruit, pome, group 11-10, except mayhaw; Fruit, small, vine climbing, except fuzzy kiwifruit subgroup 13-07F; Groundcherry; Nut, tree, group 14-12; Peach subgroup 12-12B; Pepper/eggplant subgroup 8-10B; Pomegranate; Sunflower subgroup 20B; Tomato subgroup 8-10A</i></p> <p>Bifenthrin; Pesticide Tolerances. Final Rule G/SPS/N/USA/3291 This regulation establishes tolerances for residues of bifenthrin in or on multiple commodities.</p>
