<a href="#">G/SPS/N/SAU/520</a> 11/12/2023	Saudi Arabia, Kingdom of	<i>Poultry meat, eggs and their products</i> <b>Notice of Administration Order of Saudi Food and Drug Authority Ref. No. 14534 dated 5 December 2023 entitled “Temporary ban on importation of poultry meat, eggs and their products originating from West-Vlaanderen in Belgium”</b> Following the WOAHP report dated 5 December 2023, a Highly Pathogenic Avian Influenza (HPAI) virus outbreak has occurred in West-Vlaanderen, Belgium. In compliance with the World Organization for Animal Health (WOAH), Terrestrial Animal Health Code Chapter 10.4, it is deemed necessary for the Kingdom of Saudi Arabia to prevent the entry of the HPAI virus into the country. Therefore, the import of poultry meat, eggs and their products from West-Vlaanderen, Belgium to the Kingdom of Saudi Arabia is temporarily suspended (with the exception of processed poultry meat and egg products exposed to either heat or other treatments that ensure deactivation of the HPAI virus, as long as it conforms with the approved health requirements, and standards, with a health certificate issued by the official bodies in Belgium to prove that the product is free from the virus). **Draft Commission Implementing Regulation concerning the authorisation of cinnamon bark essential oil and cinnamon leaf essential oil from Cinnamomum verum J. Presl as feed additives for certain animal species (Text with EEA relevance)**

The draft act concerns the authorisation as “flavouring compounds” of two essential oils from the plant Cinnamomum verum J. Presl within the scope of the EU legislation on feed additives, i.e., Regulation (EC) No. 1831/2003. The measure aims at authorising those additives for certain animal species: animal species for fattening except Equidae, salmonids and fin fish except brood stock, piglets and piglets of minor Suidae. For the rest of species and categories of animals the additives are withdrawn from the market subject to certain transitional periods. It is proposed to provide transitional periods for the different types of feeds and for the different species and categories of animals. For those species and categories of animals for which the additives are authorised: 6 months for

existing stocks of the additives and premixtures containing the additives and 12 months for stocks of compound feed produced with the additives. For those species and categories of animals for which the additives are withdrawn the transitional periods are: 12 months for stocks of the additives, 15 months for the stocks of the premixtures containing the additives and 24 months for the stocks of the compound feed produced with the additives.

The proposed draft Regulation concerns the update of existing MRLs for 1,4-dimethylnaphthalene, difluoroacetic acid (DFA), fluopyram and flupyradifurone in certain food commodities. MRLs for these substances in certain commodities are lowered or raised. For 1,4-dimethylnaphthalene, MRLs were revised following the evaluation and/or the lack of confirmatory data.

**Proposals to Amend the New Zealand (Maximum Residue Levels for Agricultural Compounds) Food Notice**

The document contains technical details on proposals to amend the current Notice issued under the Food Act 2014 that lists the maximum residue levels (MRLs) for agricultural compounds in New Zealand. MPI proposes the following amendments to the Notice: a. The amendment of existing entries in Schedule 1, Maximum Residue Levels for Agricultural Compounds, for the following compounds and commodities: An amendment of the entry for pydiflumetofen, to set new MRLs at 0.2 mg/kg for barley grain, 0.01(\*) mg/kg for eggs, 0.01(\*) mg/kg for milk, 0.01(\*) mg/kg for poultry fat, 0.01(\*) mg/kg for poultry meat, 0.01(\*) mg/kg for poultry offal; and The removal of the entry for warfarin, as the compound has not been approved for use in New Zealand since 2005. Note: (\*) indicates that the maximum residue level has been set at or about the limit of analytical quantification. b. The addition of three new entries in Schedule 3, for Veterinary Medicines for which No Maximum Residue Level Applies, for the following compounds: Diatomaceous earth, when used as a veterinary medicine; Gonadorelin, when used to manage reproduction in ruminants; and Sepiolite, when used as a mycotoxin binder
