nicotine. Since 1 October 2021, ENDS have been regulated as prescription medicines in Australia. The aim of the 2021 reforms was to prevent children and adolescents from accessing ENDS, whilst allowing smokers to access these products for smoking cessation with a doctor's prescription. However, evidence is emerging that the reforms are not meeting these aims. The TGA is considering whether refinements to the existing regulatory requirements for ENDS could be introduced to better support the intent of the 2021 reforms, namely preventing children and adolescents from accessing ENDS while supporting access to products of known composition and quality for smoking cessation with a doctor's prescription. The TGA is seeking comment on potential reforms in 4 main areas:

1. Changes to border controls for ENDS –to curb the unlawful supply of ENDS in Australia (one option includes to change the border controls for ENNDs to assist with the enforcement of the controls on ENDS (rather than with the aim of limiting access to ENNDs))
2. Pre-market TGA assessment of ENDS against a product standard –to create a regulated source of quality ENDS to encourage doctors to prescribe, pharmacies to supply and vaping consumers to purchase 'safer' products lawfully
3. Strengthening the product standard regarding minimum quality and safety standards for ENDS –to make them less attractive to children and adolescents, for example by not permitting certain flavours or labelling
4. Clarifying the status of ENDS as 'therapeutic goods' –to ensure that any vaping product containing nicotine is captured by the regulatory framework.

06/03/2023

Potential reforms to the regulation of nicotine vaping products -consultation paper;

The Therapeutic Goods Administration (TGA) is seeking comments on possible reforms to the regulation of ENDS. This includes vape liquids, e-liquids and e-juices that contain nicotine and/or nicotine salts. This does not include other nicotine replacement therapies (NRTs) containing nicotine, such as patches, gum, lozenges, mouth spray and inhalators nor nicotine-containing products that are not intended for use in ENDS, such as chewing tobacco and snuff. One of the possible reform options would also affect the importation of vaping devices that do not contain nicotine. Since 1 October 2021, ENDS have been regulated as prescription medicines in Australia. The aim of the 2021 reforms was to prevent children and adolescents from accessing ENDS, whilst allowing smokers to access these products for smoking cessation with a doctor's prescription. However, evidence is emerging that the reforms are not meeting these aims. The TGA is considering whether refinements to the existing regulatory requirements for ENDS could be introduced to better

support the intent of the 2021 reforms, namely preventing children and adolescents from accessing ENDS while supporting access to products of known composition and quality for smoking cessation with a doctor's prescription. The TGA is seeking comment on potential reforms in 4 main areas:

- 1.Changes to border controls for ENDS –to curb the unlawful supply of ENDS in Australia (one option includes to change the border controls for ENNDs to assist with the enforcement of the controls on ENDS (rather than with the aim of limiting access to ENNDs))
- 2.Pre-market TGA assessment of ENDS against a product standard –to create a regulated source of quality ENDS to encourage doctors to prescribe, pharmacies to supply and vaping consumers to purchase 'safer' products lawfully
- 3.Strengthening the product standard regarding minimum quality and safety standards for ENDS –to make them less attractive to children and adolescents, for example by not permitting certain flavours or labelling
- 4.Clarity the status of ENDS as 'therapeutic goods' –to ensure that any vapingproduct containing nicotine is captured by the regulatory framework.

G/TBT/N/BRA/1464 05/01/2023	Brazil	<i>FOOD TECHNOLOGY (ICS code(s): 67)</i> Draft resolution number 1134, 23 December 2022; This Draft Resolution proposes the modification of the current regulatory framework regarding the technical regulation on provisions for packaging, coatings, utensils, lids and metallic equipment in contact with food. This regulation will be also notified to the SPS Committee	06/03/2023

Canada

Mercury-containing products, including but not limited to the following: Lamps, Batteries, Dental Amalgam, Thermostats, Switches and relays, Thermometers, Other Measuring Devices, Tire Balancers (ICS: 11.060, 17.020, 17.200, 29.120, 29.140, 29.220, 43.040)

Proposed Regulations amending the Products Containing Mercury Regulations;

The proposed Regulations amending the Products Containing Mercury Regulations (the proposed Amendments) would make changes to the Products Containing Mercury Regulations (the Regulations) to align with the requirements under the Minamata Convention on Mercury. The Regulations, which came into force in 2015, prohibit the manufacture, import and sale of products containing mercury, with some exemptions for essential products which have no viable alternatives (for example lamps, certain health, safety and research applications and dental amalgam). The proposed Amendments would:

- Lower the allowable mercury content limits of three lamp products that are exempt from the general mercury prohibition, including straight fluorescent lamps for general lighting purposes, cold cathode fluorescent lamps, and external electrode fluorescent lamps;
 - Add prohibition dates for certain mercury-containing products and for replacement lamps after a transitional period;
 - Remove other exemptions for products no longer in use in Canada and products whose exemption period has expired.
- Other amendments to the Regulations are proposed to clarify some provisions of the regulatory text, such as those related to labelling, testing, reporting, and recordkeeping.

The formulation of SNI will be based on the provisions of the legislation. In this regulation, the mandatory enforcement of SNI, ST, and/or PTC is stipulated by the Minister and the	06/03/2023

voluntary implementation of SNI is carried out by Industrial Company for goods and/or services.

The conformity assessment Procedure of SNI, ST, and/or PTC which is enforced compulsorily by the Minister will be carried out by Conformity Assessment Bodies (CAB's) that has been accredited according to its scope and appointed by the Minister. The appointed CAB consists of:

- a. Products Certification Bodies
- b. Testing Laboratories; and/or
- c. Inspection Bodies.

In terms of domestic and foreign Products Certification Bodies, Testing Laboratories; and/or Inspection Bodies, the conformity assessment results can be recognized as long as there is a mutual recognition agreement between countries in the field of technical regulations in accordance with regulatory provisions of the legislation.

This regulation covers 11 Chapters, such as:

1. Chapter I General requirements
2. Chapter II Industrial Standardization Planning
3. Chapter III The Formulation of Industry Standard
4. Chapter IV The Implementation and Enforcement of the Industrial Sector
5. Chapter V The Appointment of a Conformity Assessment Bodies
6. Chapter VI Conformity Assessment
7. Chapter VII Coaching
8. Chapter VIII Industrial Standardization Development
9. Chapter IX Supervision
10. Chapter X Industry Standard Supervisor

06/03/2023

Declaration on Protection of Public Health (Food) (Declaration as voluntary), 5783-2022;

The Minister of Economy and Industry has declared the requirements of 97 mandatory food standards as voluntary and changed the mandatory sections in additional 17 food standards, following the legal power given to him by the "Protection of public health law (Food) 5776-2015". These declarations will enter into force gradually between 1 January 2023 and 1 August 2026. This declaration aims to remove unnecessary obstacles to trade, facilitate it, and lower trade barriers. The food products covered by these standards are already covered by the scope of other food regulations and are enforced by the Ministry of Health.

This action proposes the applicable volumes and percentage standards for 2023 through 2025 for cellulosic biofuel, biomass-based diesel, advanced biofuel, and total renewable fuel. This action also proposes the second supplemental standard addressing the remand of the 2016 standard-setting rulemaking. Finally, this action proposes several regulatory changes to the RFS program including regulations governing the generation of qualifying renewable electricity and other modifications intended to improve the program's implementation.</p>	10/02/2023

Safer Products Restrictions and Reporting

Proposed rule -The Washington Department of Ecology proposes a new rule, Chapter 173-337 WAC –Safer Products Restrictions and Reporting; Washington Administrative Code (WAC). This new chapter aims to reduce toxic chemicals in consumer products and implements Chapter 70A.350 RCW; Revised Code of Washington (RCW). Ecology started the second phase of this rulemaking which opens the formal public comment period. This rulemaking proposes to:

- Implement regulatory actions reported to the Washington State Legislature in June 2022. Review the Final Regulatory Determinations Report.
- Create reporting requirements or restrictions that apply to priority consumer products that contain priority chemicals. These include:
 - oPFAS in aftermarket stain-and water-resistance treatments, carpets and rugs, and leather and textile furnishings.
 - oOrtho-phthalates in personal care products (fragrances) and vinyl flooring.
 - oOrganohalogen flame retardants in electric and electronic products.
 - oFlame retardants (as defined in RCW 70A.350.010) in recreational polyurethane foam.
 - oPhenolic compounds in laundry detergent, food and drink can linings, and thermal paper.
- Include provisions for repair and replacement parts, refurbished products, and previously owned products.
