<a href="#">G/TBT/N/CAN/711</a> 04/01/2024	Canada	<i>Prepackaged food products (ICS: 67.230)</i> <b>Notice of proposal to update the nutrition labelling: Table of reference amounts for food</b> Health Canada's Food Directorate is proposing three amendments to the Table of Reference Amounts for Food (TRA) based on stakeholder feedback, consumption data, market trends, and to address identified gaps for specific food categories. The TRA sets out the amount of food typically consumed in one eating occasion for different food categories and provides detailed instructions on how to determine and declare the serving size for the Nutrition Facts table (NFt). Reference amounts are used to determine what is considered to be a single-serving pre-packaged product and they serve as the basis for determining the serving size to be declared in the NFt of multiple-serving pre-packaged products. Reference amounts are part of the criteria for making nutrient content claims and health claims and they also factor into the requirements for the new front-of-package nutrition symbol. The proposed changes include: new serving size instructions for very high fibre cereals (C.3); new reference amount and corresponding serving size instructions for nutritional yeast (M.17); and changing the reference amount for fondue cooking broths (T.2).	28/02/2024

The new section implements House Bill 4758, 88th Legislature, 2023, which enacted Health and Safety Code, §161.0876 (Prohibited E-Cigarette Products). The Texas Legislature has identified concerns that electronic cigarette ("e-cigarette") manufacturers have begun marketing their products to attract youth. "Various e-cigarette manufacturers package e-cigarette products to appear nearly identical to popular candy, flavored juice boxes, and other edible treats. The similarity in packaging of e-cigarette products to children's snacks is a direct appeal from manufacturers to children, which entices them to consume these dangerous nicotine products. The CDC reports that 69 percent of youth are exposed to e-cigarette advertisement via retail stores, magazines, TV shows, movies, and the Internet. These mediums also use cartoon-like characters and celebrity imagery to appeal to youths. According to the CDC, in the 10-year period from 2011 to 2021, vaping rates among middle and high school student increased from 1.5 percent of youth to nearly 30 percent of youth using e-cigarettes. These deliberate and ongoing efforts considerably impact the consumption rates of e-cigarettes among youth and require swift action. In 2018, the Department of State Health Services determined that e-cigarette use has reached epidemic status among teens." House Comm. on Pub. Health, Bill Analysis, Tex. C.S.H.B. 4758, 88th Leg., R.S. (2023).</p>	07/01/2024

**Amendments to On-Road Motorcycle Emission Standards and Test Procedures and Adoption of New On-Board Diagnostics and Zero-Emission Motorcycle Requirements**

Proposed rule - The California Air Resources Board (CARB) Proposed Amendments to On-Road Motorcycle (ONMC) Emissions Standards and Test Procedures and adoption of new provisions relating to ONMCs under Division 3, Chapter 1, Article 2 (Approval of Motor Vehicle Pollution Control Devices) under Title 13, California Code of Regulations (collectively “Proposal”) will significantly increase the prevalence of zero-emission motorcycles (ZEMs) in California while also reducing emissions from remaining motorcycles that are powered by internal combustion engines (ICE) by greatly harmonizing with more stringent European Union 5 (Euro 5) exhaust emissions standards, proposing more stringent evaporative emissions standards, and adopting additional on-board diagnostic (OBD) requirements beyond Euro 5. The Proposal will drive the sales of ZEMs to 50% in California by the 2035 model year, thereby reducing greenhouse gas (GHG) and smog forming emissions, while also reducing smog-forming emissions from newer ICE motorcycles. CARB will conduct a public hearing on 25 January 2024 at 9 am Pacific Time to consider approving for adoption the proposed amendments to the On-Road Motorcycle (ONMC) emission standards and test procedures and adoption of new provisions relating to ONMCs under Division 3, Chapter 1, Article 2 (Approval of Motor Vehicle Pollution Control Devices) under Title 13, California Code of Regulations (collectively “Proposed Regulatory Action”). This public meeting may continue at 8:30 am Pacific Time, on 26 January 2024. Please consult the public agenda, which will be posted at <https://ww2.arb.ca.gov/rulemaking/2024/on-roadmotorcyclesregulation> ten days before the 25 January 2024, Board Meeting, for important details, including, but not limited to, the day on which this item will be considered, how to participate via Zoom, and any appropriate direction regarding a possible remote-only Board Meeting if needed.

[G/TBT/N/USA/2083](#) 04/01/2024 United States of America *Satellite and earth station applications ; Quality (ICS code(s): 03.120); Satellite (ICS code(s): 33.070.40); Space systems and operations (ICS code(s): 49.140)* 06/02/2024

**Expediting Initial Processing of Satellite and Earth Station Applications**

Proposed rule - In this document, the Federal Communications Commission (Commission) continues its long-standing practice of reviewing its licensing rules and practices in light of innovation and development in the satellite industry and seeks further comment on possible further streamlining and expediting of its rules. Proposals include: elimination of the procedural requirement to print and maintain a paper copy of a license; changing the default status of space and earth station proceedings to permit-but-disclose; allowing earth station operators to apply for and receive a limited license without an identified satellite point of communication. The Commission also seeks comment on: additional minor modifications to be made by operators without prior authorization from the Commission; whether to provide a process for market access petitioners to seek the equivalent of a special temporary authorization (STA); whether to expand the window for operators to file renewal applications for existing licenses; further streamlining some of its coordination requirements for earth and space station operators; expanding the conditions under which earth station operators could access the new, streamlined “deemed-granted” process for adding points of communications; timeframes for taking action on license applications; allowing operators to file STA extensions concurrently with an STA application; and on the creation of a permitted list that would include NGSO operators.

**Subpart 352-1 1,4 Dioxane Limits for Household Cleansing, Personal Care, and Cosmetic Products**

Proposed rule - Notice is hereby given that the New York State Department of Environmental Conservation (NYS DEC) filed a Notice of Proposed Rulemaking with the New York Department of State. This rulemaking will implement the amendments to Article 35 and Article 37 of the Environmental Conservation Law (ECL), adopted in 2019, which establish limits on the amount of 1,4-dioxane that can be present in household cleansing, personal care, and cosmetic products sold in the State. A public comment hearing for the proposed rule will be held before an Administrative Law Judge (ALJ) electronically via the Webex Events platform as follows. The electronic format is reasonably accessible to persons with impaired mobility Tuesday, 6 February 2024, 1:00 p.m.Eastern Time; Persons wishing to

comment on the proposed rule will have the opportunity to make a statement at the public comment hearing webinar. Any person wishing to provide a public statement must register in advance of the hearing no later than 1:00 p.m. Eastern Time on 5 February 2024. Any person who wishes only to observe the webinar online must also register. Any person may listen to the hearing by phone without pre-registration. Instructions on how to “join” the hearing webinar and provide an oral statement will be published on the Department’s proposed regulations webpage for 6 NYCRR Subpart 352-1 by 6 December 2023. The proposed regulations webpage for 6 NYCRR 352-1 may be accessed at: <https://www.dec.ny.gov/regulations/propregulations.html> or <https://www.dec.ny.gov/chemical/121658.html>

<p><a href="#">G/TBT/N/UKR/280</a>  05/01/2024</p>	Ukraine	<p><i>light sources with or without integrated control gear</i>  <b>draft Order of the Ministry for Communities, Territories and Infrastructure Development of Ukraine “On Approval of the Technical Regulation on Energy Labelling of Light Sources”</b>  the draft Order approves the Technical Regulation establishing requirements for energy labelling and additional information on products relating to light sources with or without integrated control gear. The requirements also apply to light sources placed on the market as part of a product. The draft of the Technical Regulation is developed in order to regulate the requirements for energy labelling of light sources in accordance with the updated EU legislation, as well as to provide consumers with information on the level of energy efficiency of light sources and additional information that will enable consumers to choose the most energy efficient products. The draft of the Technical Regulation corresponds to Commission Delegated Regulation (EU) 2019/2015 of 11 March 2019 supplementing Regulation (EU) 2017/1369 of the European Parliament and of the Council with regard to energy labelling of light sources and repealing Commission Delegated Regulation (EU) No 874/2012. Currently, in Ukraine operates the Technical Regulation on Energy Labelling of Electric Lamps and Luminaires, approved by the Resolution of the Cabinet of Ministers of Ukraine No. 340 of 27 May 2015, which was developed on the basis of Commission Delegated Regulation (EU) No 874/2012 of 12 July 2012 supplementing Directive 2010/30/EU of the European Parliament and of the Council with regard to energy labelling of electrical lamps and luminaires (repealed). After this Order enters into force, the Technical Regulation on Energy Labelling of Electric Lamps and Luminaires, approved by the Resolution of the Cabinet of Ministers of Ukraine No. 340 of 27 May 2015, will be cancelled. The draft Order also stipulates that light sources, which meet the requirements of the Technical Regulation on Energy Labelling of Electric Lamps and Luminaires, approved by the Resolution of the Cabinet of Ministers of Ukraine No. 340 of 27 May 2015, and placed on the market before the entry into force of this Order, may not be prohibited or restricted due to non-compliance of such light sources with the requirements of the Technical Regulation approved by this Order.</p>	05/03/2024
