G/TBT/N/BRA/1523 26/02/2024	Brazil	<p><i>ELECTRICAL MACHINERY AND EQUIPMENT AND PARTS THEREOF; SOUND RECORDERS AND REPRODUCERS, TELEVISION IMAGE AND SOUND RECORDERS AND REPRODUCERS, AND PARTS AND ACCESSORIES OF SUCH ARTICLES (HS code(s): 85); Refrigerating technology (ICS code(s): 27.200)</i></p> <p>Resolution No. 2, 23 November 2023 Approval of the Target Program for Refrigerators and Freezers in the Annex to this Resolution.</p>	
G/TBT/N/CAN/716 26/02/2024	Canada	<p><i>HS Code 85162999 - Electric space-heating ICS 97.100.10 - Electric heaters</i></p> <p>Danger to human health or safety assessment for portable electric heaters.</p> <p>Portable electric heaters have moved from “Table 1: Identification of hazards of concern” to “Table 2: Comment period for danger to human health or safety assessments” in the General Prohibitions process. Health Canada uses a 3-step process to determine whether a class of consumer products poses a danger to human health or safety: Table 1: Identification (Hazards of Concern); Table 2: Comment Period (Danger to Human Health or Safety Assessments); and Table 3: Determination (Notice of Danger to Human Health or Safety) Health Canada is therefore proposing that all portable electric heaters in Canada must meet the following standards and testing criteria: CSA C22.2 NO. 46-13 (R2018) – Electric Air-Heaters, or CAN/CSA E60335-2-30:13 (R2018) – Household and similar electrical appliances - Safety - Part 2-30: Particular requirements for room heaters (Adopted IEC/CEI 60335-2-30:2009, fifth edition, 2009-11, with Canadian deviations) or Performance criteria that are equivalent, as determined by Health Canada. Health Canada defines a portable electric heater for this proposal as a cord-connected appliance that heats the surrounding air and/or objects, constructed for use in more than one location. The proposal includes the following: All types of portable electric heaters, including but not limited to: convection heaters, fan-forced heaters, portable baseboard heaters, radiant heaters, liquid-filled radiator-style heaters. Portable electric heaters that can operate both mounted and freestanding. Portable electric heaters that incorporate other functions, such as fan-only modes and air cleaning. And excludes the following: Permanently connected electric heaters. Fuel-burning heaters. Health Canada invites stakeholders to provide comments during this consultation period from February 19, 2024 to May 19, 2024. Health Canada will consider these comments when making a determination on whether there is a danger to human health or safety.</p>	19/05/2024
G/TBT/N/EU/1049 27/02/2024	European Union	<p><i>metconazole (pesticide active substance)</i></p> <p>Draft Commission Implementing Regulation renewing the approval of the active substance metconazole as a candidate for substitution in accordance with Regulation (EC) No 1107/2009 of the European Parliament and of the</p>	27/04/2024

Council, and amending Commission Implementing Regulation (EU) No 540/2011

This draft Commission Implementing Regulation provides that the approval of the active substance metconazole is renewed in accordance with Regulation (EC) No 1107/2009. It is, however, necessary to include certain conditions and restrictions including in particular a restriction to use only by professional users. Existing authorised plant protection products containing metconazole will be reviewed in accordance with the conditions and restrictions set in this act. The outcome of the assessment is based on the first evaluation of the substance for use as a pesticide active substance in the EU under Regulation (EC) No 1107/2009. The substance was formerly approved under Directive 91/414/EEC. This decision only concerns the placing on the market of this substance and does not affect the Maximum Residue Levels (MRLs) for residues of the concerned active substance. Any action on MRLs will be subject to notification under the SPS procedure.

G/TBT/N/HKG/57 27/02/2024	Hong Kong, China	<i>Motorised personal mobility devices (HS: 87116020); and Power assisted pedal cycles (HS: 87116030)</i> Product certification arrangement under the regulation on the use of electric mobility devices To propose a certification system for electric mobility devices (e.g. electric scooters, electric unicycles, electric skateboards, hoverboards, electric bicycles, power assisted pedal cycles (also known as “pedal electric cycles” or “pedelecs”), etc.) so that only certified electric mobility devices would be permitted to use on designated cycle tracks in Hong Kong.	27/04/2024

SI 62552 Part 2 - Household refrigerating appliances – Characteristics and test methods: Performance requirements

Revision of the Mandatory Standard SI 62552 part 2, dealing with household refrigerating appliances. This proposed standard revision adopts the European Standard EN 62552-2: April 2020, with a few changes that appear in the standard's Hebrew section. The major difference between the old version and this new revised proposed standard is the removal of the volume limitation requirement. All sections of this revised standard will be mandatory after the entry into force, except for the following: Section 7 - Cooling capacity test; Section 9 - Automatic ice-making capacity test; Annex A - Pull-down test; Annex D - Water vapour condensation test. Both the old standard and this new revised standard will apply from entry into force of this revision for a period of two years. During this time, products may be tested according to the old or the new revised standard.

SI 14350 - Child care articles – Drinking equipment – Safety requirements and test methods

Revision of the Mandatory Standards SI 5817 parts 1 and 2, dealing with children's drinking equipment, will be replaced with SI 14350. This draft standard revision adopts the European Standard EN 14350: June 2020, with a few changes as detailed in the standard's Hebrew section. The major differences between the old version and this new revised draft standard are as follows: Combines the two old standards' parts into one new standard; Applies to drinking equipment for children under the age of 4, while its previous editions applied to drinking equipment for children under the age of 3; Adds

new definitions and mechanical and chemical tests. Both the old standards and this new revised standard will apply from entry into force of this revision for eight months. During this time, products may be tested according to the old or the new revised standard.
