<a href="#">G/TBT/N/BRA/1289</a> 05/01/22	Brazil	<b>CONTRAN Resolution No. 885, 13 December 2021.</b> G/TBT/N/BRA/1289 CONTRAN Resolution No. 885 of 13 December 2021 establishes the technical safety requirements and criteria for testing the restraint systems of doors, locks, hinges and their components in motor vehicles.	
<a href="#">G/TBT/N/CAN/658</a> 05/01/22	Canada	<i>Off-Road Engines and Machinery (HS: Chapters 84, 85 and 87); (ICS: 13.020, 13.040, 27.020, 53.100) Heavy-Duty Vehicles and Engines (HS: Chapters 87); (ICS: 13.020, 13.040, 27.020, 53.100) Marine Engines and Recreational Vehicles (HS: Chapter 89); (ICS: 13.020, 13.040, 27.020, 53.100)</i> <b>ICS codes: 13.020 (Environmental protection), 13.040 (Air quality), 27.020 (Internal combustion engines), 53.100 (Earth-moving machinery);</b> <b>Proposed Regulations Amending Certain Regulations Made Under the Canadian Environmental Protection Act, 1999 (22 pages, available in English and French).</b> G/TBT/N/CAN/658 The proposed Amendments would make necessary modifications to the Heavy-duty Vehicle and Engine Greenhouse Gas Emission Regulations, the On-Road Vehicle and Engine Emission Regulations and the Marine Spark-Ignition Engine, Vessel and Off-road Recreational Vehicle Emission Regulations made under the Canadian Environmental Protection Act, 1999 (CEPA) to maintain alignment with the corresponding technical amendments made by the U.S. EPA. The proposed Amendments would also make modifications to the Off-road Compression-Ignition (Mobile and Stationary) and Large Spark-Ignition Engine Emission Regulations to correct a regulatory misalignment with the U.S. EPA. The proposed Amendments will affect Canadian manufacturers and importers of vehicles and engines subject to the regulations. The proposed Amendments would ensure the application of the regulations is unchanged as a result of recent modifications in the United States. All other changes made by the U.S. EPA in their technical amendments that are not amended by the proposed Amendments would automatically apply in Canada as they are incorporated by reference in the various vehicle and engine emission regulations.	03/03/22

		<b>Proposal for amendments to legal inspection requirements of thermal paper</b>	
		G/TBT/N/TPKM/476 With a view to avoiding mistakes of customs clearance practices, the Bureau of Standards, Metrology and Inspection (BSMI) proposes to amend the twelve C.C.C. Codes currently announced to the reference C.C.C. Codes, and update the inspection standards to adopt the new version without any changes in the inspection scope. The proposed amendments is scheduled to be effective starting from the day of announcement. Whether domestically produced or imported from abroad, thermal papers must be in compliance with the inspection requirements before they are released from the production premises or the customs.

*Refuse sacks and bags, of polymers of ethylene (HS Code 3923219010); Sacks and bags, including cones, of polymers of ethylene (HS Code 3923299090); Sacks and bags, including cones, of plastics (HS Code 3923299000); Utensils, kitchenware, of plastics (HS Code 3924100091); Disposable tumblers & cups of plastics (HS Code 3924100093); Other disposable tableware, of plastics; and (HS Code 3924100094); Kitchenware, of plastics (HS Code 3924100099).*

**Single-Use Plastics Prohibition Regulations; (108 pages, available in English and French)**

G/TBT/N/CAN/661 The proposed Single-Use Plastic Prohibition Regulations (the proposed Regulations) would prohibit the manufacture, import and sale of six categories of single-use plastic items (i.e., single-use plastic checkout bags, cutlery, food service ware made from or containing problematic plastics, ring carriers, stir sticks and straws). Manufacture and import for the purposes of export would not be subject to the proposed prohibition. Checkout bags, cutlery, and straws have reusable substitutes so the proposed Regulations would identify performance standards to differentiate between single-use and reusable items for these three product categories. The Regulations would also provide exemptions for straws to accommodate people with disabilities. These exemptions are linked to the conditions upon which straws are sold. The prohibitions on sale of straws would come into force one year after the regulation's publication in the Canada Gazette, Part II. The prohibition on sale for all other single use items would come into force two years after the regulations are published in the Canada Gazette, Part II. The prohibitions on manufacture and import of all six single use items would come into force one year after registration in the Canada Gazette, Part II. The six categories of single-use plastic items subject to the proposed Regulations are commonly found on Canadian shorelines and terrestrial litter clean-ups. The Government estimates that the proposed Regulations would prevent 23,000 tonnes of plastic pollution over a period of ten years. A range of evidence sources, including peer-reviewed studies, show that the items, when littered, likely pose a threat of harm to wildlife through entanglement, ingestion or habitat disruption. The six categories of single-use plastic items also present barriers to fostering a circular

economy in Canada that would keep plastics in the economy and out of the environment because they have low recycling rates, are known to hamper recycling or wastewater treatment systems, and have barriers to increasing recycling rates. Eliminating these products from the Canadian market would remove key irritants from value recovery systems and improve their efficiency.
