<a href="#">G/TBT/N/CAN/665</a> 07/03/22	Canada	<p><i>Drugs and Medical Devices</i></p> <p><b>Clinical Trials for Medical Devices and Drugs Relating to COVID-19 Regulations (55 pages, available in English and French)</b></p> <p>G/TBT/N/CAN/665 In order to address the immediate COVID-19 public health emergency, the Minister of Health made the Interim Order Respecting Clinical Trials for Medical Devices and Drugs in Relation to COVID-19 (IO No. 1) on 23 May 2020 to put in place a more flexible clinical trials pathway for COVID-19 drugs and medical devices. A second Interim Order (IO No. 2) replaced IO No. 1 on 3 May 2021, and transitional provisions carried clinical trials authorized under IO No. 1 into IO No. 2. As interim orders are temporary, the provisions of IO No. 2 were transitioned into regulations to ensure that the Interim Order's authorizations, obligations, and oversight continue uninterrupted for trials already authorized. The authorization pathway also remains available for new clinical trials for drugs and medical devices related to the diagnosis, treatment, mitigation, or prevention of COVID-19 given the ongoing and unpredictable nature of the COVID-19 pandemic. In addition, the Regulations contain technical provisions to maintain the status quo for clinical trials authorized under the Food and Drug Regulations, Medical Devices Regulations and Natural Health Products Regulations on or after 23 May 2020. At the same time, amendments have been made to the Food and Drug Regulations and the Natural Health Products Regulations to reduce the records retention period for clinical trials of drugs and natural health products from 25 to 15 years. This shorter retention period is expected to reduce the cost and administrative burden on clinical trials investigators and sponsors, improve alignment with Canada's international partners and contribute to making Canada a more favourable environment for conducting clinical trials. The Regulations also make a consequential amendment to the Certificate of Supplementary Protection Regulations to ensure that a clinical trial authorization or amendment under the Regulations has no impact on Health Canada's grant of a certificate of supplementary protection (which can provide up to two years of patent-like protection) under the Patent Act..</p>	Emergency measure
<a href="#">G/TBT/N/EU/877</a> 07/03/22	European Union	<p><i>Biocidal products</i></p> <p><b>ICS codes: 71.100 (Products of the chemical industry);</b></p> <p><b>Draft Commission Implementing Decision not approving N-(3-aminopropyl)-N-dodecylpropane-1,3-diamine as an existing active substance for use in biocidal products of product-type 8</b></p> <p>G/TBT/N/EU/877 This draft Commission Implementing Decision does not approve N-(3-aminopropyl)-N-dodecylpropane-1,3-diamine as an existing active substance for use in biocidal products of product-type 8. Risks for the human health were identified that could not be mitigated by adequate risks mitigation measures and no safe use could be found. The opinion of the European Chemicals Agency can be found on its website (<a href="http://echa.europa.eu/regulations/biocidal-products-regulation/approval-of-active-substances/bpc-opinions-on-active-substance-approval">http://echa.europa.eu/regulations/biocidal-products-regulation/approval-of-active-substances/bpc-opinions-on-active-substance-approval</a>).</p>	06/05/22

Air-conditioners</i>);</p> <p><b>Commercial and Industrial Fans and Blowers</b></p> <p>G/TBT/N/USA/1842 Proposed rule - This rulemaking includes a proposal for a test procedure, reporting requirements, and labelling requirements for certain fans and blowers. PUBLIC HEARING: The California Energy Commission (CEC) staff will hold a public hearing for the proposed regulations on Tuesday 12 April 2022, beginning 10:00 a.m. (Pacific Time (PT)). Interested persons, or their authorized representative, may present statements, arguments, or contentions relevant to the proposed regulations at the public hearing. The record for this hearing will be kept open until every person has had an opportunity to provide comment. Further details on the hearing are provided in the Notice of Proposed Action (NOPA) from the Docket Log.</p>	11/04/22
<a href="#">G/TBT/N/VNM/218</a> 07/03/22	Vietnam	<p><i>Products and goods with unsafe capability under management responsibility of Ministry of Information and Communications</i></p> <p><b>Draft Circular specifying the List of products and goods with unsafe capability under management responsibility of Ministry of Information and Communications</b></p> <p>G/TBT/N/VNM/218 This draft Circular specifies the List of products and goods with unsafe capability under management responsibility of Ministry of Information and Communications (the “List of Group 2 products and goods” for short). The draft Circular content is as follows: Article 1. Scope of regulations; Article 2. Subjects of application; Article 3. List of Group 2 products and goods; Article 4. Principle of quality management for Group 2 products and goods; Article 5. Enforcement; Article 6. Implementation. Annex I. List of information and communication products and goods subject to mandatory certification and declaration; Annex II. List of information and communication products and goods subject to mandatory declaration. This draft Circular specifies the List of products and goods with unsafe capability under management responsibility of Ministry of Information and Communications, which is in line with the Law on quality of products and goods. The List of products and goods is divided into 2 sub-lists, which are detailed in Annex I and Annex II. Each sub-list has its own principles for mandatory quality management (ie, certification, declaration of conformity), according to the Circular No.30/2011/TT-BTTTT dated October 31, 2011 specifying mandatory certification and declaration of products and goods in the information technology and communications sector and the Circular No.15/2018/TT-BTTTT dated November 15, 2018, the Circular No.10/2020/TT-BTTTT dated May 07, 2020 providing modifications and amendments for the Circular No.30/2011/TT-BTTTT. This draft Circular is intended to supersede the Circular No. 11/2020/TT-BTTTT dated May 14, 2020 of the Minister of Information and Communications specifying the List of products and goods with unsafe capability under management responsibility of</p>	15/04/22

Ministry of Information and Communications, and Circular No. 01/2021/TT-BTTTT dated May 14, 2021 of the Minister of Information and Communications providing amendments for the Circular No. 11/2020/TT-BTTTT.

<a href="#">G/TBT/N/CHN/1661</a> 08/03/22	China	<p><i>Automobiles HS code is only used as a reference for the determination of products in the compulsory product certification catalogue. <a href="#">G/TBT/N/USA/1843</a> 08/03/22	United States of America	<p><i>Computer room air conditioners (CRACs)</i></p> <p><b>ICS codes:</b> 13.020 (Environmental protection), 23.120 (Ventilators. Fans. Air-conditioners);</p> <p><b>Energy Conservation Program: Energy Conservation Standards for Computer Room Air Conditioners</b></p> <p>G/TBT/N/USA/1843 Notice of proposed rulemaking and request for comment - The Energy Policy and Conservation Act, as amended (EPCA), prescribes energy conservation standards for various consumer products and certain commercial and industrial equipment, including small, large, and very large commercial package air conditioning and heating equipment, of which computer room air conditioners (CRACs) are a category. EPCA requires the U.S. Department of Energy (DOE or the Department) to consider the need for amended standards each time the relevant industry standard is amended with respect to the standard levels or design requirements applicable to that equipment, or periodically under a six-year-lookback review provision. In this document, DOE is proposing amended energy conservation standards for CRACs that rely on a new efficiency metric and are equivalent to those levels specified in the industry standard. DOE has preliminarily determined that it lacks the clear and convincing evidence required by the statute to adopt standards more stringent than the levels specified in the industry standard. This document also announces a public meeting webinar (to be held 13 April 2022) to receive comment on these proposed standards and associated analyses and results.</p>	06/05/22
<a href="#">G/TBT/N/THA/657</a> 09/03/22	Thailand	<p><i>Hot-dip 55% aluminium/zinc-coated flat steel (ICS 77.140.50)</i></p> <p><b>ICS codes:</b> 77.140.50 (Flat steel products and semi-products);</p> <p><b>Draft Ministerial Regulation on Hot-dip 55% aluminium/zinc-coated flat steel (TIS 2228-2565)</b></p> <p>G/TBT/N/THA/657 The draft ministerial regulation mandates hot-dip 55%aluminium/zinc-coated flat steel to conform with the standard for Hot-dip 55% aluminium/zinc-coated flat steel (TIS 2228-2565). This standard covers hot-dip flat steel with</p>	08/05/22

aluminium/zinc-coating mass not greater than 4.0 mm in thickness and 1 500 mm in wideness.
