They also prescribe labelling requirements for certain products to disclose and compare the energy use of a given product model relative to others in their category. The Regulations are amended regularly to introduce or update energy efficiency and testing standards.This proposed amendment would update energy efficiency and testing standards for central air conditioners and central heat pumps primarily used in the residential sector to prevent upcoming unnecessary regulatory differences between Canada and the United States. In addition, the Amendment would make other minor changes to currently regulated products to address known issues with Canadian requirements to ensure that the Regulations align with the United States more clearly where already intended. Finally, the Amendment would specify energy-using products in order for the Minister to be able to exercise the ministerial regulations authority, at its discretion, to maintain harmonization between requirements set out in another jurisdiction.	06/06/22
