G/TBT/N/SVN/122 03/04/2023	Slovenia	<p><i>Fresh, chilled and frozen meat of bovine, swine, sheep, goats and poultry</i></p> <p>Rules amending Rules on ensuring traceability of origin for fresh, chilled and frozen meat of bovine, swine, sheep, goats and poultry</p> <p>This Rule extends the transitional period until which operators must lay down the procedure for ensuring the traceability of the origin of fresh, chilled and frozen beef, pig, sheep, goat and poultry meat placed on the market as non-prepacked at all stages of production and distribution.</p>	02/06/2023
G/TBT/N/GBR/59 03/04/2023	United Kingdom	<p><i>Lighting Products</i></p> <p>The Ecodesign for Energy-Related Products and Energy Information (Lighting Products) (Amendment) Regulations 2023</p> <p>The UK Government proposes to update the existing ecodesign regulations for lighting products placed on the GB market (The Ecodesign for Energy Related Products and Energy Information (Lighting Products) Regulations 2021, from here on referred to as “the 2021 Regulations”). The proposal is to set a new Minimum Energy Performance Standard (MEPS) of 120 lumen per watt (lm/W) for light sources and luminaires placed on the GB market from late 2023; this MEPS would increase to 140 lm/W from 1 September 2027, in each case subject to certain allowances and exemptions. The proposal sets out a range of allowances whereby certain light sources will benefit from a reduction in the required MEPS if they have certain characteristics (e.g. a colour-rendering index of 93 or greater) which are known to cause a loss in efficacy. No changes are proposed to existing ecodesign requirements for separate control gears; nor to the existing energy labelling requirements for light sources. We undertook an assessment of the exemptions included in the 2021 Regulations to identify if changes were required at this time, which concluded that very few changes were necessary.</p>	02/06/2023
G/TBT/N/USA/1979 03/04/2023	United States of America	<p><i>Soybeans; Cereals, pulses and derived products (ICS code(s): 67.060)</i></p> <p>United States Standards for Soybeans</p> <p>Proposed rule - The Agricultural Marketing Service (AMS) proposes to revise the United States Standards for Soybeans by removing soybeans of other colors (SBOC) as an official factor. In addition, AMS proposes to revise the table of Grade Limits and Breakpoints for Soybeans to reflect this change.</p>	01/05/2023

G/TBT/N/VNM/254 03/04/2023	Viet Nam	<p><i>Ozone-depleting substances (ODS) and greenhouse gas controlled under Montreal Protocol (HFCs)</i></p> <p>Draft National technical regulation on collection, transport, recycled, reclaimed and handling of controlled substances</p> <p>This draft technical regulation shall regulate the collection, transportation, storage, recycling, reclaim and disposal of ozone-depleting substances, causing greenhouse effects substances under the Montreal Protocol on substances that deplete substances (referred to as controlled substances) used in refrigeration and air-conditioning equipment (hereinafter referred to as "equipment"). The list of controlled substances is specified in the Circular No. 01/2022/TT-BTN MT dated 07 January, 2022 by the Minister of Natural Resources and Environment on guidelines for implementation of the Law on Environmental Protection regarding response to climate change. This draft technical regulation does not specify safety requirements in production and installation. The product is designed, manufactured, assembled and installed to comply with recognized safety requirements. This draft technical regulation will apply to agencies, organizations and individuals involved in the collection, transportation, storage, recycling, reclaim and disposal of controlled substances.</p>	02/06/2023
