G/TBT/N/EU/885 11/04/2022	European Union	<p><i>Consumer products (for aspects not covered by EU harmonised product legislation)</i></p> <p>Proposal for a Regulation of the European Parliament and of the Council on general product safety, amending Regulation (EU) No 1025/2012 of the European Parliament and of the Council, and repealing Council Directive 87/357/EEC and Directive 2001/95/EC of the European Parliament and of the Council (COM(2021) 346 final)</p> <p>This proposal for a Regulation of the European Parliament and of the Council on general product safety aims at revising Directive 2001/95/EC on general product safety. The proposal confirms the key requirement that consumer products placed or made available on the EU market must be safe. According to the proposal a consumer product can benefit from the presumption of safety if it complies with the relevant European standard referenced in the Official Journal of the European Union, in the absence of such European standards, it conforms to the relevant national requirements. The proposal includes a set of clear obligations for economic operators (manufacturers, importers, distributors, fulfilment service providers), including the drawing up of technical documentation by manufacturers and traceability in the supply chain. The proposal also provides for specific obligations for online marketplaces relevant for product safety (including clear deadlines for reactions to government takedown orders and third party notices and ensuring that traders provide minimum product</p>	10/07/22

		and traceability information in their listings). Moreover, the proposal enhances market surveillance by largely aligning the market surveillance rules for non-harmonised products to the market surveillance rules set up for harmonised products in Regulation (EU) 2019/1020. The proposal also replaces and repeals the Council Directive 87/357/EEC of 25 June 1987 on food-imitating products.

The CEC proposes to update the testing, certification, and marking requirements for air filters. The CEC proposes modifying the existing scope for air filters to clarify that only air filters for ducted systems are covered by the regulation. The CEC also proposes to update the test procedures to the most recent iterations of the American National Standards Institute/American Society of Heating, Refrigerating and Air-Conditioning Engineers Standard 52.2-2017 and the Air-Conditioning, Heating, and Refrigeration Institute Standard 680 (I-P)-2017 test methods. The proposed regulation allows the size of the filter used for testing to be chosen by the manufacturer as the basic model for the filter family. The certification and marking requirements have been updated to be consistent with the updated test procedures described above.</p>	09/05/2022
G/TBT/N/AUS/141 13/04/2022	Australia	<p><i>Lane Departure Warning Systems (LDWS) for heavy vehicles</i></p> <p>Reducing Heavy Vehicle Lane Departure Crashes – Consultation Regulation Impact Statement https://www.infrastructure.gov.au/have-your-say/heavy-vehicle-lane-departure-systems</p> <p>The Australian Government is examining the case for regulating the fitment of Lane Departure Warning Systems (LDWS) in heavy vehicles through the Australian Design Rules (ADRs).The impact of road trauma is significant, costing the Australian economy approximately \$30 billion per year with heavy vehicle crashes comprising approximately \$1.5 billion.Currently it is not a requirement for heavy vehicles to be fitted with a lane departure warning system (LDWS) even though there could be considerable benefits to all road users and the wider community. A LDWS can increase the driver's alertness to an unintentional lane departure, helping to reduce the number of collisions resulting in severe or fatal injuries.This new ADR would be ADR 99/00. The vehicles affected fall under ADR sub-category MD, ME, NB and NC. It is proposed that ADR 99/00 would adopt the requirements for LDWS contained in United Nations (UN) Regulation No. 130 –Uniform provisions concerning the approval of motor vehicles with regard to the Lane Departure Warning System (LDWS).</p>	03/06/2022

Proposed rule -The Environmental Protection Agency (EPA) is proposing a rule under the Toxic Substances Control Act (TSCA) to address the unreasonable risk of injury to health it has identified for conditions of use of chrysotile asbestos following completion of the TSCA Risk Evaluation for Asbestos, Part 1: Chrysotile Asbestos. TSCA requires that EPA address the unreasonable risks of injury to health and environment by rule and to apply requirements to the extent necessary so that chrysotile asbestos no longer presents such risks. Therefore, to address the unreasonable risk identified in the TSCA Risk Evaluation for Asbestos, Part 1 from chrysotile asbestos, EPA is proposing to prohibit manufacture (including import), processing, distribution in commerce and commercial use of chrysotile asbestos for chrysotile asbestos diaphragms for use in the chlor-alkali industry, chrysotile asbestos-containing sheet gaskets used in chemical production, chrysotile asbestos-containing brake blocks used in the oil industry, aftermarket automotive chrysotile asbestos-containing brakes/linings, other chrysotile asbestos-containing vehicle friction products, and other chrysotile asbestos-containing gaskets. EPA also is proposing to prohibit manufacture (including import), processing, and distribution in commerce of aftermarket automotive chrysotile asbestos-containingbrakes/linings for consumer use, and other chrysotile asbestos-containing gaskets for consumer use. EPA is also proposing disposal and recordkeeping requirements for these conditions of use.
