<a href="#">G/TBT/N/CHN/1717</a> 11/04/2023	China	<i>Portable aviation child restraint device (HS code(s): 94); (ICS code(s): 49.090)</i>	10/06/2023
		<b>National Standard of the P.R.C., Portable Aviation Child Restraint Device;</b>	
		This document specifies the terms, definitions, installation and fixing requirements of portable aviation child safety device on civil transport aircraft, the structure of the restraint system, the performance indexes and test methods of the restraint system assembly and its components, as well as the requirements of instructions for use and labels. This document applies to the design and production, inspection and testing, product certification, service provision and trade cooperation of portable aviation child safety device that are carried by passengers on civil transport aircraft and fixed on the forward-facing passenger seats only by waist restraints. Note: Portable aviation child restraint device as defined in this document does not include those that require special attachment to the passenger seat, or are supported by an external structure or attachment, or are attached to the passenger seat by special webbing restraint devices; and also does not include child restraint device for special needs, or medical used child restraint device.	
<a href="#">G/TBT/N/CHN/1718</a> 11/04/2023	China	<i>Light source products (HS code(s): 8539); (ICS code(s): 29.140.99)</i>	10/06/2023
		<b>National Standard of the P.R.C., Light sources –Safety requirements;</b>	
		This document specifies the safety requirements for light sources, including general requirements, signs and instructions, electrical safety, temperature-related requirements, mechanical safety, abnormal working condition safety, moisture-proof and dust-proof requirements. This document also includes other technical requirements that have a direct bearing on the protection of personal health and the safety of life and property. This document applies to light source products. Note: "Light source" in this document refers exclusively to "electric light source", which includes Lamps, LED modules, OLED panels, etc..	
<a href="#">G/TBT/N/CHN/1719</a> 11/04/2023	China	<i>Metal cutting machine tools and machine tool accessories (HS code(s): 8457; 8458; 8459; 8460; 8461; 8466); (ICS code(s): 25.060)</i>	10/06/2023
		<b>National Standards of the P.R.C., Metal cutting machine tools -General safeguarding specification;</b>	
		This document specifies basic safeguarding technical requirements, measures and assessment methods of the main hazards that exist in the metal cutting machine tools and machine tool accessories. This document applies to all metal cutting machine tools and machine tool accessories.	
<a href="#">G/TBT/N/CHN/1720</a> 11/04/2023	China	<i>paper, plastic and textile fiber express packaging products (HS code(s): 39232; 481910; 481940; 630590); (ICS code(s): 03.240)</i>	10/06/2023
		<b>National Standard of the P.R.C., Limits of heavy metals and other harmful substances in packagings for express service;</b>	
		The document specifies the limits and test methods of heavy metals and other harmful substances in paper, plastic and textile fiber packaging for express service. The document	

		applies to packaging for express service, and China post packaging with reference.	
<a href="#">G/TBT/N/CHN/1721</a> 11/04/2023	China	<p><i>Axle catch, matching sensor, control box, auxiliary control box (HS code(s): 847989); (ICS code(s): 73.100.40)</i></p> <p><b>National Standard of the P.R.C., Safety technical requirements of axle catch for coal mines;</b></p> <p>This document specifies the safety technical requirements, installation and use requirements, test methods and inspection rules of axle catch for coal mines. This document applies to the design, manufacture, installation, use and inspection of axle catch in the coal mines.</p>	10/06/2023
<a href="#">G/TBT/N/CHN/1722</a> 11/04/2023	China	<p><i>Sensors used in coal mines, meter, data logging devices (HS code(s): 847490); (ICS code(s): 13.100)</i></p> <p><b>National Standard of the P.R.C., Technical requirements for safety of environmental monitoring instruments for coalmines;</b></p> <p>This document specifies the safety technical requirements, test methods and inspection rules for instruments used in a coal mines. This document is applicable to instruments used in coal mines. This document applies to coal mine gas detection sensors and detectors (excluding optical interference methane detectors and gas detection tubes), other environmental monitoring sensors and detectors (excluding mechanical wind meters) and human perception sensors and other equipment.</p>	10/06/2023
<a href="#">G/TBT/N/CHN/1723</a> 11/04/2023	China	<p><i>Active implantable medical devices (HS code(s): 902150); (ICS code(s): 11.040.40)</i></p> <p><b>National Standard of the P.R.C., Implants for surgery — Active implantable medical devices —Part 2: Cardiac pacemakers;</b></p> <p>This document specifies requirements for cardiac pacemakers. This document applies to those active implantable medical devices intended to treat bradyarrhythmias and devices that provide therapies for cardiac resynchronization. This document also applies to some non-implantable parts and accessories of the devices. The tests that are specified in this document are type tests, and are to be carried out on samples of a device to show compliance. The electrical characteristics of the implantable pulse generator or lead are determined either by the appropriate method detailed in this particular document or by any other method demonstrated to have an accuracy equal to, or better than, the method specified. In case of dispute, the method detailed in this particular document applies.</p> <p>NOTE The device that is commonly referred to as an active implantable medical device can in fact be a single device, a combination of devices, or a combination of a device or devices and one or more accessories. Not all of these parts are required to be either partially or totally implantable, but there is a need to specify some requirements of non-implantable parts and accessories if they could affect the safety or performance of the implantable device.</p>	10/06/2023
<a href="#">G/TBT/N/CHN/1724</a> 11/04/2023	China	<p><i>Active implantable medical devices (HS code(s): 902150; 902190); (ICS code(s): 11.040.40)</i></p>	10/06/2023

**National Standard of the P.R.C., Implants for surgery — Active implantable medical devices —Part 1: General requirements for safety, marking and for information to be provided by the manufacturer;**

This document specifies the requirements that are generally applicable to active implantable medical devices. This document applies not only to electrically powered active implantable medical devices, but also to active implantable medical devices powered by other energy sources (e.g., gas pressure or springs). This document also applies to certain non-implantable parts and accessories of active implantable medical devices.

NOTE 1 For particular types of active implantable medical devices, these general requirements are supplemented or modified by the requirements of particular parts of the document. The tests that are specified in this document are type tests and are to be carried out on samples of an active implantable medical device to show compliance.

NOTE 2 The device that is commonly referred to as an active implantable medical device can be a single device, a combination of devices, or a combination of a device or devices and one or more accessories. Not all of these parts are required to be either partially or totally implantable, but there is a need to specify some requirements of non-implantable parts and accessories if they could affect the safety or performance of the implantable device.

10/06/2023

**National Standard of the P.R.C., Controlgear and other auxiliaries for electric lighting products—Safety Requirements;**

This document specifies the safety requirements for the marking, mechanical and electrical structure of the control devices and their components used in lighting products. This document applies to light source control devices and their components for direct current up to 1000 V and AC up to 1 000 V at 50 Hz or 60 Hz. Note: The term "light source" in this document refers exclusively to "electric light source".

*Electric Motors*

**L.I. 2456 -Energy Commission (Energy Efficiency Standards and Labelling) (Electric Motors) Regulations, 2022;**

The purpose of these Regulations is to promote the efficient use and conservation of energy in the country and mitigate related climate change by:

- a) providing for
  - i) the enforcement of standards set out in the First Schedule and the minimum energy performance standards set out in Part One of the Second Schedule;
  - ii) the labelling of electric motors;

<a href="#">G/TBT/N/GHA/44</a> 11/04/2023	Ghana	<p>iii) supplementary product information on electric motors; and</p> <p>iv) the registration of models of electric motors in the Appliance Efficiency Register; and</p> <p>b) prohibiting the manufacture, importation, offer for sale, sale, storage, donation, disposal, installation or use of an electric motor that does not meet the minimum energy performance standards set out in Part One of the Second Schedule.</p>
<a href="#">G/TBT/N/GHA/45</a> 11/04/2023	Ghana	<p><i>Air Conditioners</i></p> <p><b>L.I. 2458 -Energy Commission (Energy Efficiency Standards and Labelling) (Air Conditioners) Regulations, 2022;</b></p> <p>The purpose of these Regulations is to promote the efficient use and conservation of energy in the country and mitigate related climate change by:</p> <p>a) providing for</p> <p>i) the enforcement of standards set out in the First Schedule and the minimum energy performance standards and sound power levels of air conditioners set out in Parts One to Three of the Second Schedule;</p> <p>ii) the labelling of electric mains-operated air conditioners;</p> <p>iii) supplementary product information on electric mains-operated air conditioners; and</p> <p>iv) the registration of models of air conditioners in the Appliance Efficiency Register; and</p> <p>b) prohibiting the manufacture, importation, offer for sale, sale, storage, donation, disposal, installation or use of an air conditioner that does not meet the minimum energy performance standards set out in Parts One to Three of the Second Schedule.</p>
<a href="#">G/TBT/N/GHA/46</a> 11/04/2023	Ghana	<p><i>Water Heaters</i></p> <p><b>L.I. 2451 -Energy Commission (Energy Efficiency Standards and Labelling) (Water Heaters) Regulations, 2022;</b></p> <p>The purpose of these Regulations is to promote the efficient use and conservation of energy in the country and mitigate related climate change by:</p> <p>a) providing for</p> <p>i) the enforcement of standards set out in the First Schedule and the minimum energy performance standards set out in Part One of the Second Schedule;</p> <p>ii) the labelling of electric mains-operated water heaters;</p> <p>iii) supplementary product information on electric mains-operated water heaters; and</p> <p>iv) the registration of models of electric water heaters in the Appliance Efficiency Register; and</p> <p>b) prohibiting the manufacture, importation, offer for sale, sale, storage, donation, disposal, installation or use of a water heater that does not meet the minimum energy performance standards set out in Part One of the Second Schedule.</p>

The purpose of these Regulations is to promote the efficient use and conservation of energy in the country and mitigate related climate change by:

- a) providing for
  - i) the enforcement of standards set out in the First Schedule and the minimum energy performance standards set out in Part One of the Second Schedule;
  - ii) the labelling of distribution transformers
  - iii) supplementary product information on distribution transformers; and
  - iv) the registration of models of distribution transformers in the Appliance Efficiency Register; and
- b) prohibiting the manufacture, importation, offer for sale, sale, storage, donation, disposal, installation or use of a distribution transformer that does not meet the minimum energy performance standards set out in Part One of the Second Schedule.

*Inverters*

**L.I. 2461 -Renewable Energy (Standards and Labelling) (Inverters) Regulations, 2022;**

The purpose of these Regulations is to promote the efficient use of inverters in the country and mitigate related climate change by:

- a) providing for
  - i) the enforcement of standards set out in the First Schedule and the minimum efficiency standards set out in Part One of the Second Schedule;
  - ii) the labelling of inverters;
  - iii) supplementary product information on inverters; and
  - iv) the registration of models of inverters in the Renewable Energy Product Register; and
- b) prohibiting the manufacture, importation, offer for sale, sale, storage, donation, disposal, installation or use of an inverter that does not meet the minimum energy performance standards set out in Part One of the Second Schedule.

*Comfort Fans*

**L.I. 2460 -Energy Commission (Energy Efficiency Standards and Labelling) (Comfort Fans) Regulations, 2022;**

The purpose of these Regulations is to promote the efficient use and conservation of energy in the country and mitigate related climate change by:

- a) providing for
  - i) the enforcement of standards set out in the First Schedule and the minimum energy performance standards set out in Part One of the Second Schedule;
  - ii) the labelling of electric mains-operated comfort fans;
  - iii) supplementary product information on electric mains-operated comfort fans; and
  - iv) the registration of models of comfort fans in the Appliance Efficiency Register; and
- b) prohibiting the manufacture, importation, offer for sale, sale, storage, donation, disposal, installation or use of a comfort fan that does not meet the minimum energy performance standards set out in Part One of the Second Schedule.

<a href="#">G/TBT/N/USA/1981</a> 11/04/2023	United States of America	<i>Lifejackets and personal flotation devices; Quality (ICS code(s): 03.120); Lifejackets, buoyancy aids and flotation devices (ICS code(s): 13.340.70); Test conditions and procedures in general (ICS code(s): 19.020)</i> <b>Lifejacket Approval Harmonization;</b> Notice of proposed rulemaking -The Coast Guard proposes to amend the approval requirements and follow-up program requirements for lifejackets by incorporating new standards to replace existing legacy standards. The Coast Guard further proposes to amend lifejacket and personal flotation device (PFD) carriage requirements to allow for the use of equipment approved to the new standards and remove obsolete equipment approval requirements. The proposed amendments would streamline the process for the approval of PFDs and allow manufacturers the opportunity to produce more innovative equipment that would meet approval requirements in both Canada and the United States while also reducing the burden of the approval process and the production inspections on manufacturing firms.	06/06/2023
<a href="#">G/TBT/N/USA/1982</a> 11/04/2023	United States of America	<i>Salt substitutes; Quality (ICS code(s): 03.120); Domestic safety (ICS code(s): 13.120); Processes in the food industry (ICS code(s): 67.020); Food products in general (ICS code(s): 67.040); Spices and condiments. Food additives (ICS code(s): 67.220)</i> <b>Use of Salt Substitutes To Reduce the Sodium Content in Standardized Foods;</b> Proposed rule -The Food and Drug Administration (FDA or we) is proposing to amend our standard of identity (SOI) regulations that specify salt (sodium chloride) as a required or optional ingredient to permit the use of salt substitutes in standardized foods, to reduce the sodium content. Reducing sodium may help reduce the risk of hypertension, a leading cause of heart disease and stroke. The proposed rule, if finalized, would help support a healthier food supply by providing flexibility to facilitate industry innovation in the production of standardized foods lower in sodium while maintaining the basic nature and essential characteristics of the foods. The proposal would not require manufacturers to replace salt with salt substitutes. Instead,	08/08/2023

manufacturers would have the option of using salt substitutes to replace salt in standardized foods. Should manufacturers choose to use this flexibility to reformulate some products by substituting some salt with salt substitutes, the primary benefits realized would result from lower sodium consumption by U.S. consumers who choose to purchase and consume the reformulated versions of such products, and increased profit (producer surplus) for manufacturers (or at least no decrease in profits). The primary cost of such voluntary market behavior would include reformulation and relabeling costs for the manufacturers.

**Proposed amendment to the ENFORCEMENT DECREE OF THE ELECTRICAL APPLIANCES AND CONSUMER PRODUCTS SAFETY CONTROL ACT;**

KATS proposes amendments to the Enforcement Rule of the Electrical Appliances and Consumer Products Safety Control Act. The main modification is as below.

-(Designation Criteria) Defines the designation requirements of the inspection agency necessary for conducting safety inspections, such as organization/work system, personnel/facility requirements, etc. (Article 14-2)

-(Penalty surcharge) Establish grounds for imposing a surcharge in cases where there is a concern about user inconvenience due to inspection agency business suspension (Article 14-3)

-(Fine) Establish grounds for levying fines for violations of the law by safety inspection institutions and manufacturers (table 3)

-(Reorganization of fee standards) Simplification of the fee system, such as product inspection fee calculation based on actual cost calculation details such as test labor cost, materialcost, depreciation cost, etc. (table 2)

-(Compensation Liability) Establish detailed standards for insurance subscription amount to compensate for damages caused by poor inspections such as intention or negligence of inspection agencies (Article 14-4)

		<ul style="list-style-type: none"> <li>-(Order to suspend sales) Recall of illegal/defective products (Article 15)</li> <li>-(Other system maintenance) Reorganization of existing systems such as delegation and consignment in accordance with the expansion of products subject to safety management (electrical appliances subject to safety inspection) (Article 18, 20)</li> </ul>

<a href="#">G/TBT/N/EU/966</a> 14/04/2023	European Union	<i>Hazardous substances and mixtures</i> <b>Proposal for a Regulation of the European Parliament and of the Council amending Regulation (EC) No 1272/2008 of the European Parliament and of the Council on classification, labelling and packaging of substances and mixtures (COM(2022) 748 final);</b> This Proposal concerns a targeted revision of Regulation (EC) No 1272/2008 of the European Parliament and of the Council of 16 December 2008 on classification, labelling	13/07/2023

and packaging of substances and mixtures (CLP) by clarifying certain provisions, by adding new provisions to simplify labelling, by adapting the Regulation to new market trends as online sales and digital labelling, by introducing classification rules for multi-constituent substances and by referring to new hazard classes as well as streamlining some procedures. Amongst the new provisions, one is aiming at ensuring that all chemicals are compliant with the requirements under the CLP, including when placed on the market in the EU via online sales. The draft provision will require that companies placing chemicals on the EU market are either an EU supplier themselves or designate one. In addition, some labelling requirements have been simplified (e.g. through an extended possibility to use fold-out labels) while others were adapted to new modes of sales (bulk sales, refill sales).
