**Change of the The List of Construction Products Subject to Regulation approved on 24 January 2022 by the Order No. D1-15 of the Minister of the Environment of the Republic of Lithuania.**

It should be noted that the Minister of Environment of the Republic of Lithuania on January 24, 2022 order no. D1-15 "List of Construction Products Subject to Regulation" was notified by The European Commission, the Member States and the World Trade Organization (draft legal act No. 2021/608/LT and G/TBT/N/LTU/43). The notification procedure ended on December 22, 2021. The European Commission and the Member States did not have any comments.

This draft order proposes to supplement sub-paragraphs 2.2, 2.4 and 2.6, which would provide a corresponding exemption for access to the market of non-harmonized construction products in the market of the Republic of Lithuania for a transitional period.

The amendment to the order was adopted in view of the fact that the Russian Federation was carrying out a military attack on Ukraine, which is in line with military aggression under international law, and the Republic of Belarus involvement in the attack, and due to Council Regulation (EU) 2022/355 of 2 March 2022 amending Regulation (EC) No 765/2006 concerning restrictive measures in view of the situation in Belarus, to ensure that these countries are not directly or indirectly financed by the Republic of Lithuania and the European Union, state enterprise Construction Products Certification Center suspended validity of certificates of constancy of performance of construction products, certificates of conformity of (internal) production control of construction products (hereinafter -certificates). Therefore The Ministry of Environment has prepared an order considering the problems and proposals raised by market participants, which facilitates the access of non-harmonized construction products to the market of the Republic of Lithuania during the transition period. Given the urgency and complexity of the situation, legislation should be assessed as a matter of urgency.

**Draft Order of the Minister of Environment of the Republic of Lithuania "On Exceptional Requirements Applicable to the Market of the Republic of Lithuania for the Supply of Construction Products Listed in the List of Regulated Construction Products"**

The draft order specifies the access of the construction products of the non-harmonized area specified in Item 1 of the draft order to the market of the Republic of Lithuania. The specified construction products that do not have harmonized technical specifications may be placed on the market of the Republic of Lithuania without being certified by a certification body established in the Republic of Lithuania until 1 January 2023 and until 1 June 2023 may be used in construction, but: -the country of origin and / or registered manufacturer of the specified construction products may not be the Russian Federation or the Republic of Belarus; -when supplying the specified construction products to the market of the Republic of Lithuania, the manufacturer or distributor of the construction product shall ensure that these construction products are certified in at least one certification body designated or accredited by the European Union countries or the European Free Trade Association;

-submit a declaration of performance, which must contain the information specified in sub-paragraph 3.2 of the draft order;

-the manufacturer evaluates the essential characteristics of these construction products according to the purpose of use of the construction product in accordance with the Order No. of 24 January 2022 of the Minister of Environment of the Republic of Lithuania. D1-15 Information on the Approval of the List of Regulated Construction Products in the Approved Annex, Sub-paragraphs 19.2, 19.4 (Column 4);

-by signing the declaration of performance, the manufacturer assumes responsibility for the compliance of the construction product with the declared performance.

The amendment to the order was adopted in view of the fact that the Russian Federation was carrying out a military attack on Ukraine, which is in line with military aggression under international law, and the Republic of Belarus involvement in the attack, and due to Council Regulation (EU) 2022/355 of 2 March 2022 amending Regulation (EC) No 765/2006 concerning restrictive measures in view of the situation in Belarus, to ensure that these countries are not directly or indirectly financed by the Republic of Lithuania and the European Union, state enterprise Construction Products Certification Center suspended validity of certificates of constancy of performance of construction products, certificates of conformity of (internal) production control of construction products (hereinafter -certificates). Therefore The Ministry of Environment has prepared an order considering the problems and proposals raised by market participants, which facilitates the access of non-harmonized construction products to the market of the Republic of Lithuania during the transition period. Given the urgency and complexity of the situation, legislation should be assessed as a matter of urgency.

**Draft Circular guiding on food nutrition labelling;**

This draft Circular stipulates the content and method of labelling nutritional ingredients, nutritional values and implementation roadmap for foods produced, traded and imported for circulation in Vietnam according to regulations specified in Appendix I to Decree No. 111/2021/ND-CP dated December 9, 2021 of the Government amending and supplementing a number of articles of Decree No. 43/2017/ND-CP dated April 14, 2017 of the Government on labelling of goods. The following food products are not regulated by this draft Circular:

- a) Food does not contain any nutritional ingredients specified in Article 5 of this Circular;
- b) Food materials;
- c) Products consisting of a single ingredient;
- d) Natural mineral water, bottled drinking water (including those containing only CO2 and/or flavorings);
- đ) Table salt;
- e) Vinegar and substitutes for vinegar including those with added flavoring only;
- g) Flavorings, additives, food processing aids;
- h) Food enzymes and enzymes;
- i) Tea, coffee without other added ingredients;
- k) Unpackaged foods

<a href="#">G/TBT/N/BHR/623</a> 21/04/2022	Bahrain	<i>Tea, Coffee, Cocoa (ICS code(s): 67.140)</i> <b>Green Coffee Bean;</b> This GSO standard is concerned with green coffee beans ready for use as raw material for human consumption.	20/06/22
<a href="#">G/TBT/N/BWA/133</a> 21/04/2022	Botswana	<i>Fire-fighting (ICS code(s): 13.220.10)</i> <b>BOS ISO 14520-1:2015, Gaseous fire-extinguishing systems — Physical properties and system design —Part 1: General requirements.</b> This part of ISO 14520 specifies requirements and gives recommendations for the design, installation, testing, maintenance and safety of gaseous fire fighting systems in buildings, plants or other structures, and the characteristics of the various extinguishants and types of fire for which they are a suitable extinguishing medium. It covers total flooding systems primarily related to buildings, plants and other specific applications, utilizing electrically non-conducting gaseous fire extinguishants that do not leave a residue after discharge and for which there are sufficient data currently available to enable validation of performance and safety characteristics by an appropriate independent authority. This part of ISO 14520 is not applicable to explosion suppression. This part of ISO 14520 is not intended to indicate approval of the extinguishants listed therein by the appropriate authorities, as other extinguishants may be equally acceptable. CO2 is not included as it is covered by other International Standards. This part of ISO 14520 is applicable to the extinguishants listed in Table 1. It is essential that it be used in conjunction with the separate parts of ISO 14520 for specific extinguishants, as cited in Table 1.	19/06/22
<a href="#">G/TBT/N/BWA/134</a> 21/04/2022	Botswana	<i>Fire-resistance of building materials and elements(ICS code(s): 13.220.50)</i> <b>BOS ISO 21925-1:2018 Fire resistance tests —Fire dampers for air distribution systems —Part 1: Mechanical dampers;</b> This document specifies a test method for the determination of the resistance of fire dampers to heat, and for the evaluation of their ability to prevent fire and smoke spreading from one fire compartment to another through an air distribution system. It is applicable to mechanical fire dampers. It is not intended to be used for dampers used only in smoke control systems, for testing fire protection devices which only deal with air transfer applications, or for dampers used in suspended ceilings, as the installation of the damper and duct can have an adverse effect on the performance of the suspended ceiling, requiring other methods of evaluation. NOTE "Air transfer" is a low-pressure application through a fire separation door (or wall, floor) without any connection to an air duct.	19/06/22

<a href="#">G/TBT/N/BWA/135</a> 21/04/2022	Botswana	<i>Fire-fighting (ICS code(s): 13.220.10)</i> <b>BOS ISO 7203-1 :2019, Fire extinguishing media —Foam concentrates —Part 1: Specification for low-expansion foam concentrates for top application to water-immiscible liquids;</b> This document specifies the essential properties and performance of liquid foam concentrates used to make low-expansion foams for the control, the extinction and the inhibition of reignition of fires of water-immiscible liquids. Minimum performance on certain test fires is specified. These foams are suitable for top application to fires of water-immiscible liquids. The foams that conform with ISO 7203-3 are also suitable for top application to fires of water-miscible liquids. The foam concentrates can be suitable for use in non-aspirating sprayers or for subsurface application to liquid fires, but the requirements specific to those applications are outside the scope of this document.	19/05/22
