Clarify reporting obligations for industry for voluntary (firm initiated) recalls.</li> <li>· Update the outdated references to foreign regulatory authorities who participate in mutual recognition agreements (MRA) with Canada and replace the outdated</li> </ul>	29/06/2023

information with an ambulatory list of regulatory authorities incorporated by reference.

- Offer conditional exemptions from requirements related to finished product testing for certain biologics (e.g., gene and cell therapies) and radiopharmaceuticals, as well as clarify that direct shipment to a person other than an importer (typically a healthcare provider) is permitted for these products.

The proposed amendments for the Medical Devices Regulations(MDR) would:

- Update the definition of recall to include recalls ordered by the Minister, establishing a regulatory framework for recalls of medical devices ordered by the Minister, and clarifying the industry's reporting and record keeping obligations for firm-initiated recalls;

- Improve international alignment relating to the reporting of low-risk medical device recalls;

- Modernize the Medical Device Establishment Licence (MDEL) application requirements to reflect existing practices; and

- Provide the Minister with the ability to issue terms and conditions on a MDEL to mitigate risks to health and safety, and strategically target non-compliance.

29/06/2023

**The Law of Ukraine No 2320-IX "On Waste Management" of 20.06.2022;**

The Law is aimed at improving the waste management system, determining the legal, organizational, economic and control mechanisms for ensuring comprehensive protection of human health and the environment by implementing measures to prevent or reduce waste generation, mitigate the negative impacts from waste management, and facilitate its preparation for reuse and recovery as secondary raw materials and energy resources. The Law introduces into national legislation the fundamental principles and provisions of European legislation in the field of waste management, in particular, the introduction of a waste management hierarchy and basic requirements for extended producer responsibility, and introduces a system of long-term waste management planning at the national, regional and local levels, regional and local levels. The Law provides for the introduction of an information system waste management information system, which will significantly simplify the system of

accounting and reporting, submission of declarations and implementation of permitting procedures in the field of waste management. The introduction of a subsystem of open registers will provide access to information of waste generators and other waste owners, to the public. It is proposed to strengthen control over the collection and treatment of hazardous waste by strengthening the requirements for licensing for such activities. The Law establishes the procedure for the municipal waste collection, removal and treatment, ensures the introduction of their separate collection and recycling, provides for requirements for the quality of waste management services and waste management fees for such services.

<a href="#">G/TBT/N/CHL/637</a> 20/04/2023	Chile	<p><i>Equipos terminales utilizados en las redes móviles</i></p> <p><b>Fija norma técnica que regula las especificaciones técnicas que deberá cumplir la estructura de IMEI de losequipos terminales utilizados en las redes móviles.;</b></p>	19/06/2023

En Chile existe normativa de telecomunicaciones relativa al bloqueo del IMEI de equipos terminales móviles por robo, hurto o extravío. Sin embargo, se ha registrado que posteriormente, dichos IMEI en algunos casos son adulterados con la finalidad de burlar el bloqueo del cual fueron objeto. Con motivo de evitar la situación antes descrita, a través de la presente propuesta, se busca complementar la normativa existente en la materia, estableciendo las características técnicas y estructura que deben cumplir los IMEI de los equipos terminales, para ser utilizados en las redes móviles, de lo contrario, no podrán cursar tráfico en el país.

European  
Union

*Self-propelled mobile machinery, falling within the scope of Directive 2006/42/EC, that is designed or constructed with the purpose specifically to perform work (non-road mobile machinery). The proposal applies to such machinery if it is intended to circulate on public roads in the EU. Some specific categories of products are excluded, such as: non-road mobile machinery with a maximum design speed exceeding 40 km/h; non-road mobile machinery equipped with more than three seating positions, including the driver's seating position; certain machinery that is primarily intended for the transport of one or more persons or animals, or any goods; vehicles falling within the scope of Regulation (EU) No 167/2013, Regulation (EU) No 168/2013 or Regulation (EU) 2018/858; small series (if manufacturers choose to comply with the national requirements on small series).*

**Proposal for a Regulation of the European Parliament and of the Council on the approval and market surveillance of non-road mobile machinery circulating on public roads and amending Regulation (EU) 2019/1020 (COM(2023) 178 final);**

The proposal for a Regulation ('proposal') lays down technical requirements, administrative requirements and procedures, for the EU type-approval and placing on the market, for the mobile machinery within the scope of the proposal. In addition, the proposal lays down rules and procedures for the market surveillance of such non-road mobile machinery. In accordance with the provisions of the proposal, the detailed technical requirements, including test procedures, test methods, etc., will be specified via Commission Delegated acts. The proposal allows the manufacturers of non-road mobile machinery to choose, for a transitional period (8 years from the applicability of the Regulation) to comply with the relevant national requirements for road circulation of such machinery but, in this case, they will not benefit from the free movement principle.
