United States Standards for Grades of Frozen Asparagus
Notice and request for comments - The Agricultural Marketing Service (AMS) of the Department of Agriculture (USDA) is proposing to revise the United States Standards for Grades of Frozen Asparagus by updating and defining new style requirements related to percent head material for the “cut spears or cuts and tips” style of frozen asparagus. In addition, AMS proposes to change the definition of a head when it applies to the “cut spears or cuts and tips” style. These changes would align the grade standards with modern harvesting practices and provide guidance for the effective utilization of this commodity. Copies of the current United States Standards for Grades of Frozen Asparagus are available at <https://www.ams.usda.gov/grades-standards/frozen-asparagus-grades-and-standards>

Revising U.S. Standards for Grades of Mushrooms

Notice and request for comments - The Agricultural Marketing Service (AMS) of the Department of Agriculture (USDA) proposes to revise the U.S. Standards for Grades of Mushrooms. The proposed changes would add a grade for portabella mushrooms, remove size from the criteria for each grade and create a separate section for size, and revise the tolerances for defects, consistent with modern production and handling practices. In addition, AMS proposes to update terminology, definitions, and defect scoring guides. Copies of the current U.S. Standards for Grades of Mushrooms are available at <https://www.ams.usda.gov/grades-standards/vegetables>

27.190 - Biofuels produced from food and feed crops

04/05/2026

Commission Delegated Regulation (EU) Commission Delegated Regulation (EU) 2019/807 to introduce a trajectory to gradually decrease the contribution of high indirect land-use change-risk biofuels, bioliquids and biomass fuels to renewable energy targets

Directive (EU) 2018/2001 sets out a specific limit to biofuels, bioliquids and biomass fuels produced from food and feed crops with high ILUC-risk and for which a significant expansion of their feedstock production area into land with high carbon stock is observed. The Commission has set out the criteria for determining the high indirect land-use change-risk feedstock for which a significant expansion of the production area into land with high-carbon stock is observed in Delegated Regulation (EU) 2019/807. This

delegated act updates the methodology as well as the data for determining the high indirect land-use change-risk feedstock for which a significant expansion of the production area into land with high-carbon stock is observed and sets a trajectory to gradually decrease the contribution of high indirect land-use change-risk biofuels, bioliquids and biomass fuels produced from feedstock for which a significant expansion of the production into land with high-carbon stock is observed to the targets for renewable energy.

Draft Resolution of Ukraine “On the Approval of the Procedure for State Registration of Objects”

The draft Resolution provides for the adoption of the Procedure for state registration of objects, including, in particular, general requirements for the registration of objects and plastic recycling processes, requirements regarding the form, content and format of documents to be submitted for registration, procedures for the treatment of requests for confidential treatment of information and requirements for its protection, as well as requirements for the issuance of a scientific opinion on the safety of objects. It further established that the electronic system of the State Register of substances authorized for use in the manufacture of materials and articles, as well as plastic recycling processes, shall become operational on 1 September 2026. The draft Resolution is also notified under the SPS Agreement.

Medicines, medical immunobiological products, blood products

13/06/2026

Resolution of the Cabinet of Ministers of Ukraine 377 “Certain Issues Relating to the Distribution of Medicines, Medical Immunobiological Products and Blood Products During the Period of Martial Law” of 25 March 2026

The Resolution has been developed with the aim of ensuring proper state control over the quality of medicines, medical immunobiological products and blood products manufactured and supplied to Ukraine during the period of martial law, ensuring the re-registration process of medicines, as well as preventing the risk of medicines of inadequate quality, safety and efficacy from entering the Ukrainian market. The Resolution introduces amendments to

Resolution of the Cabinet of Ministers of Ukraine of 15 January 1996 No. 73 “On approval of the Procedure for control of compliance of immunobiological products used in medical practice with state and international standards”, Resolution of the Cabinet of Ministers of Ukraine of 26 May 2005 No. 376 “On approval of the Procedure for state registration (reregistration) of medicines and the fees for their state registration (reregistration)”, Resolution of the Cabinet of Ministers of Ukraine No 902 "On Approval of the Procedure for State Quality Control of Medicinal Products Imported to Ukraine" of 14 September 2005 and Resolution of the Cabinet of Ministers of Ukraine No. 1446 "Some issues of state registration of medicines, vaccines or other medical immunobiological products for the treatment and/or specific prevention of acute respiratory disease COVID-19 caused by the SARS-CoV-2 coronavirus, subject to for emergency medical use" of 29 December 2021. In particular, it is established that for a period of six months from the date of entry into force of this Resolution: applications for the re-registration of medicines, the validity of registration certificates of which expired (or expires) during the period of martial law and has been extended for one year (until 1 January 2028), shall be submitted to the Ministry of Health; where active pharmaceutical ingredients (APIs), excipients and packaging materials not included in the registration dossier of the respective medicine are used in the manufacture of finished medicines, the applicant shall introduce the relevant changes to the registration dossier; the manufacture of finished medicines using active pharmaceutical ingredients (APIs), excipients and packaging materials not included in the registration dossier of the respective medicine is permitted; the placing on the market and use of registered finished medicines manufactured and released using active pharmaceutical ingredients (APIs), excipients and packaging materials not included in the registration dossier of the respective medicine shall be permitted until the expiry date of such medicines.
