G/TBT/N/EU/968 24/04/2023	European Union	<p><i>Construction products</i></p> <p>Draft Commission Delegated Regulation (EU) on the conditions for classification, without testing, of solid wood panelling and cladding with regard to their reaction to fire and amending Decision 2006/213/EC</p> <p>The reaction to fire performance of wood panelling and cladding, and wood ribbon elements, within the classification provided for in Regulation (EU) 2016/364, is well established only when the material is untreated. For this reason, the reaction to fire performance of these products can be deemed, without the need for any further testing, to achieve a certain class of performance, as defined in the European classification system mentioned above but this classification cannot be extended to untreated products. This Delegated Regulation is necessary to prevent misuse of the existing Commission Decision 2006/213/EC.</p>	23/06/2023
G/TBT/N/KOR/1138 24/04/2023	Korea, Republic of	<p><i>Medical Devices</i></p> <p>Proposed partial amendments to the Regulation on medical device approval/report/review, etc.;</p> <p>The proposed amendments to the Regulation on medical device approval/report/review, etc. is as follows:</p> <ol style="list-style-type: none"> 1) Recognition of real-world evidence when reviewing clinical trial data <ul style="list-style-type: none"> -For clinical trial data, human test data, theses and papers (class of medical device 1 and 2) must be submitted. It is to prepare the basis for recognition of real-world evidence when reviewing clinical trial data depending on the characteristics of medical devices such as rare and urgently needed medical devices. <ol style="list-style-type: none"> 2) Introducing a custom classification procedure for newly developed medical devices such as digital health devices <ul style="list-style-type: none"> -To support rapid commercialization of newly developed medical devices by establishing a procedure for introducing custom classification procedure for newly developed medical devices such as digital health devices 3) Preparation of grounds for multiple purposes description of combination medical devices according to its characteristics <ul style="list-style-type: none"> -In the case of combination medical devices, a single purpose of use is described when applying for permission, but in order to operate a flexible screening and rational system that reflects the characteristics of various combination medical devices, we are trying to prepare a basis for listing more than one purpose of use according to the characteristics. 4) Easing double inspection when distributing used special medical equipment <ul style="list-style-type: none"> -For special medical equipment of which safety and performance are regularly checked through quality control, the certificate of inspection is exempted when distributing used products. 5) Expansion of expedited review including medical devices subject to production/import suspension reporting 	23/06/2023

		<p>-Subject of expedited review is expanded to include medical devices subject to production/import suspension reporting and public health crisis response medical devices to promote prompt response and public health in the event of supply/demand occurrences such as production/import suspension</p> <p>6) Increase test report accreditation body for biosafety data -To expand citizens' choice by increasing the number of laboratory audit institutions designated by the Minister of Food and Drug Safety for biosafety data</p> <p>7) Minor change improvement -Revise usage methods and precautions according to re-evaluation results, change of appearance of components, etc.</p>	
G/TBT/N/KOR/1139 24/04/2023	Korea, Republic of	<p><i>Medical Devices</i></p> <p>Proposed partial amendments to the Regulation on Stability Test Standard for Medical Devices;</p> <p>The proposed amendments to the Regulation on Stability Test Standard for Medical Devices is as follows:1) Measurement period for stability test-For the measurement period, at least one time point, including the last time point, can be set for long-term preservation tests and accelerated aging tests of medical devices using raw materials without physical or chemical changes, such as metals, when the data at the start of the test is replaced.2) Clarification of test items-Test items are divided into biological safety tests, performance tests, and other tests in accordance with the <Regulations on Medical Device Permission, Notification, Review, etc.> and <Regulation on In Vitro Diagnostic Medical Device Permission, Notification, Review, etc.></p>	23/06/2023
G/TBT/N/USA/1985 24/04/2023	United States of America	<p><i>Side override guards; Crash protection and restraint systems (ICS code(s): 43.040.80); Commercial vehicles (ICS code(s): 43.080)</i></p> <p>Side Underride Guards;</p> <p>Advance notice of proposed rulemaking (ANPRM) -This ANPRM responds to Section 23011(c) of the November 2021 Infrastructure Investment and Jobs Act (IIJA), commonly referred to as the Bipartisan Infrastructure Law (BIL), which directs the Secretary to conduct research on side underride guards to better understand their overall effectiveness, and assess the feasibility, benefits, costs, and other impacts of installing side underride guards on trailers and semitrailers. The BIL further directs the Secretary to report the findings of the research in aFederal Register notice to seek public comment. In addition, this ANPRM also responds to a petition for rulemaking from Ms. Marianne Karth and the Truck Safety Coalition (TSC).</p>	20/06/2023
G/TBT/N/AUS/155 25/04/2023	Australia	<p><i>Infant formula products for sale in Australia and New Zealand, including under HS 190110.</i></p> <p>Proposal P1028 Infant Formula –2nd Call For Submissions</p> <p>Proposal P1028 proposes to amend the Australia New Zealand Food Standards Code (the Code) to ensure that infant formula products are safe and suitable while also taking account of the latest scientific evidence, market developments, changes in the international regulatory context, and revised Australian and New Zealand policy</p>	07/07/2023

guidance. The proposed draft variation to the Code will amend infant formula regulation. Relevant aspects include:

- Re-drafting of Standard 2.9.1 and related provisions in Schedule 29 to reflect the differing requirements for subcategories of infant formula products (infant formula, follow-on formula and special medical purpose products for infants (SMPPi);
- Revised nutrient composition values;
- Revised permissions for food additives, contaminants and processing aids
- Addition of a definition for SMPPi, and associated revisions on nutrient composition, restriction of sale and standalone labelling permissions reflective of Standard 2.9.5 -Foods for Special Medical Purpose (FSMP)
- Amendments and new provisions regarding safety-related labelling (including directions for use and storage, warning statements and age-related statements), provision of information (including nutrition information, stage labelling and a prohibition of proxy advertising), and labelling for SMPPi.
- Amendments to clarify the requirements for novel foods when added to infant formula products.

A five year transition period, inclusive of stock-in-trade, is proposed.

Denmark

FERTILISERS (HS code(s): 31); Fertilizers (ICS code(s): 25/06/2023
65.080)Urease inhibitors

Title i Danish: Udkast til bekendtgørelse om jordbrugsvirksoheders anvendelse af gødning
Title in English: Draft of statutory order on farm enterprises' use of fertilisers;

The draft will replace the current statutory order no. 1142 of 10 July 2022 on farm enterprises' usage of fertilisers. With the new draft, a number of rules are changed. The changes are mainly minor clarifications and adjustments. The notification under the WTO TBT agreement relates to section 8, subsection 1 and 2. Section 8 contains requirements for the application of artificial fertilisers containing urea-based nitrogen in order to prevent ammonia emissions. Addition of urease inhibitor to artificial fertilisers is one possible method to fulfill the requirements. With the proposed amendment to the statutory order, the urease inhibitor is required to be CE marked.

Fruit and vegetables, processed fruit and vegetables, and Bananas 25/06/2023

Draft Commission Delegated Regulation supplementing Regulation (EU) No 1308/2013 of the European Parliament and of the Council as regards marketing standards for the fruit and vegetables sector, certain processed fruit and vegetable products and the bananas sector, and repealing Commission Regulation (EC) No 1666/1999 and Commission Implementing Regulations (EU) No 543/2011 and (EU) No 1333/2011;

The draft delegated act supplements Regulation (EU) No 1308/2013 by merging and amending rules on marketing standards currently contained in Commission Implementing Regulation (EU) No 543/2011, Commission Implementing Regulation (EU) No 1333/2011 and Commission Regulation (EC) No 1666/1999, by aligning these rules to

market development and to the Farm to Fork Strategy. It repeals Commission Implementing Regulation (EU) No 543/2011, Commission Implementing Regulation (EU) No 1333/2011 and Commission Regulation (EC) No 1666/1999. This draft delegated act aligns market development with the objectives of the Farm to Fork Strategy, regarding in particular increased information for consumers and reduction of food waste. It modernises and simplifies the rules by merging fruit and vegetables legislation with banana and dried grapes legislation, and deleting obsolete provisions. Some amendments align with recent changes in quality standards adopted by the United Nations Economic Commission for Europe (UNECE).

G/TBT/N/TTO/135 27/04/2023	Trinidad and Tobago	<p><i>Products of the chemical industry in general (ICS code(s): 71.100.01); Chemicals for industrial and domestic disinfection purposes (ICS code(s): 71.100.35); Surface active agents (ICS code(s): 71.100.40)</i></p> <p>General purpose cleaning, bleaching and disinfecting products -Compulsory requirements;</p> <p>This standard establishes chemical and labelling requirements for general purpose cleaning, bleaching and disinfecting products (including dilutable products) for use in Trinidad and Tobago. This standard applies to the following products:</p> <p>a) general purpose cleaners, including but not limited to multipurpose and multi-surface cleaners;</p> <p>EXAMPLE Products for cleaning floors, kitchens, countertops, sinks and hard surfaces such as stovetops, cooktops, and microwaves etc.</p>	26/06/2023

- b) disinfectants including disinfectants containing quaternary ammonium compounds (QACs) in liquid, powder, cream, tablet and gel forms;
- c) hand dishwashing detergents in liquid, cream, paste and gel forms;
- d) automatic dishwasherdetergents;
- e) bleaching agents including calcium hypochlorite in solution, granular, tablet, foam, cream, powder formats and bleaching gel pens;
- f) engine degreasers;
- g) automotive cleaners in liquid, cream, gel formats for multipurpose applications;
- h) spot or stain removers;
- i) aerosols that function as general purpose cleaners; and
- j) sanitizers not designed for human application.

EXAMPLE: Tyre, engine, dashboard, console, carpet, upholstery, oven, window, floor, bathroom, fabric and kitchen cleaners etc.

TTCS 21: 20XX also applies to the concentrated versions of the products mentioned above and cleaning wipes and disinfecting wipes (or pads) related to the aforementioned products.

This standard does not apply to the following products:

- 1) automotive hard paste waxes with no cleaning or disinfecting properties;
- 2) automotive rubbing or polishing compound with no cleaning or disinfecting properties;
- 3) floor polishes and waxes with no cleaning or disinfecting properties;
- 4) alcohol-based and non-alcohol based handrubs or hand sanitizers;
- 5) fabric softeners with no cleaning or disinfecting properties;
- 6) liquid sodium hypochlorite solutions which are covered under the national standard TTCS 1, Sodium hypochlorite solution (Liquid chlorine bleach) – Compulsory requirements;
- 7) laundry detergents (pods, bars, liquids and powders) which are covered under the national standard TTCS 7, Laundry detergents –Compulsory requirements
- 8) cosmetics;
- 9) cleaning products primarily intended for use on human beings and animals;
- 10) pesticides which are covered under the national standard TTS 76: Part 8, Requirements for labelling-Part 8: Labelling of retail packages of pesticides;
- 11) products covered under any other national standards; and
- 12) products covered under national primary or secondary legislation issued by other Government Ministries and agencies.
