It also sets out the requirements on extended producer responsibility, collection and treatment of end-of-life vehicles, as well as on the export of used vehicles from the Union to third countries. The proposal for an ELV Regulation builds on and replaces two existing Directives: Directive 2000/53/EC on end-of-life vehicles and Directive 2005/64/EC on the type-approval of motor vehicles with regard to their reusability, recyclability and recoverability. In order to ensure to improve the design of</p>	23.07.2024

the vehicles, the new requirements are proposed: Circular design: 6 years after entry into force of the Regulation, the new type-approved vehicles will have to comply with the requirements on reusability, recyclability and recoverability (Article 4) and substances (Article 5). New type-approved vehicles will have to contain at least 25% of plastic recycled from post-consumer plastic waste, with 25% of such material coming from recycled end-of-life vehicles (Article 6). New type-approved vehicles will have to be designed in a way which ensures an easy removal of batteries and electric motors from ELVs and does not hinder the removal and replacement of the most valuable parts for re-use and recycling (Article 7). Additionally, Article 9 sets out the obligations for the manufacturers of new vehicles to draw-up the circularity strategy, Article 10 requires to declare the recycled content present in the vehicle and to provide the information on removal and replacement of parts, components and materials present in vehicles (Article 11). These requirements shall apply 3 years after entry into force of the Regulation. The Regulation also foresees a new element – each vehicle placed on the market within 6 years after entry into Regulation, shall have a circularity vehicle passport in a digital form (Article 13). The above-mentioned design related requirements shall apply to the vehicles belonging to M1 and N1 categories, with the exception of Article 11 which shall also apply to categories L3e-L7e, M2, M3, N2, N3 and O. Export of used vehicles. In order to improve the quality of vehicles that are exported from the EU to third countries, only those vehicles which are not end-of-life vehicles based on the criteria listed in Annex I to the COM/2023/451 and are roadworthy in accordance with Directive 2014/45/EU, would be authorised to be exported outside the EU. This requirement shall apply 3 years after entry into force of the Regulation.

Draft Order of the Ministry of Health of Ukraine "On Approval of Amendments to the Procedure for Confirmation of Compliance of Medicinal Products Manufacturing Conditions with the Requirements of Good Manufacturing Practice"

The draft Order provides for the approval of amendments to the Procedure for Confirmation of Compliance of Medicinal

Products Manufacturing Conditions with the Requirements of Good Manufacturing Practice, approved by the Order of the Ministry of Health of Ukraine No. 1130 of 27 December 2012. The amendments to the Procedure will provide legislative regulation of the mechanism for extending the validity of the GMP Conclusion, as well as the possibility of extending the validity of the GMP certificate until the end of 2024 issued by the authorized body of an EU member state, the United Kingdom or a state that has a mutual recognition agreement with the EU or Ukraine. Approval of the amendments to the Procedure will align it with EU requirements.

23.06.2024

The Environmental Protection (Wet Wipes Containing Plastic) (England) Regulations 2024

These regulations introduce a ban on the supply and sale of wet wipes containing plastic. The draft legislation defines a wet wipe as ‘a piece of pre-moistened or pre-wetted non-woven material which is conceived, designed and placed on the market for single-use (disposable) and intended for personal care e.g., personal hygiene or domestic use e.g., household cleaning purposes. Prewetted wipes typically contain an impregnation liquid which has been added to the wipe before it is placed on the market.’ These regulations will apply to all businesses in England. These restrictions will not apply to: The manufacture or import of wet wipes containing plastic. Supply and sale of wet wipes containing plastic, for the purpose of some business-to-business sale, as specified in the regulations. The supply and sale of wet wipes containing plastic by a retail pharmacy business, subject to conditions. The supply of wet wipes containing plastic for use for medical purposes by or under the direction of a healthcare professional or by a healthcare professional for medical purposes. Breach of these prohibitions will be an offence under the regulations. The regulations confer powers on enforcement authorities to impose civil sanctions, including monetary penalties and stop notices, in addition to criminal prosecution. The draft legislation provides a transition period of 18 months for businesses.

7310211900 (cans for drinks) and 392330 (plastic drinks bottles) 24.06.2024

The Deposit Scheme for Drinks Containers (England and Northern Ireland) Regulations 2024

This legislation will set out to establish a Deposit Return Scheme (DRS) for drinks containers where consumers are charged a deposit up-front when they buy a drink in a container that is in-scope of the scheme. The deposit can then be redeemed when the empty container is returned to a designated return point. The deposit provides a financial incentive for consumers to return drinks containers for recycling. Our Statutory instrument (SI) covers England and Northern Ireland and will include all single-use drinks containers from 150ml up to 3 litres in polyethylene terephthalate (PET) bottles, steel and aluminium cans. The key sections of our SI are: The scope and key definitions associated with a DRS Obligations for producers and suppliers Obligations for retailers and return points Obligations and responsibilities of the Deposit Management Organisation Scheme enforcement and penalties

Non-volatile particulate matter from aircraft engines; Quality (ICS code(s): 03.120); Environmental protection (ICS code(s): 13.020); Air quality (ICS code(s): 13.040); Test conditions and procedures in general (ICS code(s): 19.020); Aircraft and space vehicles in general (ICS code(s): 49.020) 24.06.2024

Control of Non-Volatile Particulate Matter From Aircraft Engines:

Emission Standards and Test Procedures

Final rule; request for comments by 24 June 2024 - This action adopts standards for measuring non-volatile particulate matter (nvPM) exhaust emissions from aircraft engines. With this rulemaking, the FAA implements the nvPM emissions standards adopted by the Environmental Protection Agency (EPA), allowing manufacturers to certificate engines to the new nvPM emissions standards in the United States, and fulfilling the statutory obligations of the FAA under the Clean Air Act (CAA). The emission standards adopted by the EPA in 40 CFR part 1031 represent the results of widely coordinated international efforts and public notice and comment rulemaking. The FAA, EPA, industry representatives, and foreign certification authorities all participated in a multi-year process that resulted in the nvPM standards adopted by the International Civil Aviation Organization (ICAO), which the EPA thereafter prescribed in 40 CFR part 1031. Because the FAA has no authority to change any of the standards adopted by the EPA, a solicitation of comments will not result in any substantive changes to the standards and would unnecessarily delay their implementation. Accordingly, the FAA finds that notice and comment on the standards and procedures adopted in this rulemaking is unnecessary because the FAA does not have authority to make changes to the standards or procedures adopted by the EPA and the EPA issued its proposed rule for notice and sought public comment on these standards and test procedures prior to promulgating them on 23 November 2022; G/TBT/N/USA/1831 and Add.1 - Control of Air Pollution From Aircraft Engines: Emission Standards and Test Procedures, EPA-HQ-OAR-2019-0660

Human Medicinal Products

25.06.2024

The Human Medicines (Amendments Relating to the Windsor Framework) Regulations 2024

The Regulations provide that a “UK marketing authorisation” comprises the following different types of authorisation: UKMA(UK)(Category 1) and UKMA(Category 2), which permit marketing of a medicinal product in all the territories of the UK; UKMA(GB) which does not permit marketing of a medicinal product in Northern Ireland; and UKMA(NI) which does not permit marketing of a medicinal product in Great Britain. These Regulations make amendments to the 2012 Regulations ensure that the correct type of authorisation is referred to. The Regulations make provision to transition existing marketing authorisations with an authorisation with a territorial limit of Great Britain to be converted to authorisations valid across the UK. The Regulations also make provision for a new requirement, for each of the above categories of authorisation, for products to be labelled “UK only”; and provision to disapply the product identification and anti-tampering device rules contained in Commission Delegated Regulation (EU) 2016/161. The changes made by the Regulations mean that the same products, in the same packs with the same labels, will be available across the whole of the UK
