National Standard of the P.R.C., Maximum allowable values of the energy efficiency and energy efficiency grades for household and similar kitchen appliances;

This document specifies the energy efficiency levels, minimum allowable values of energy efficiency, and test methods for household and similar kitchen appliances. This document applies to the following types of household and similar kitchen appliances:

—Electric rice cookers that operate under normal pressure and are heated by electric heating elements or electromagnetic induction, with a rated power not exceeding 2000W;

—Electric pressure cookers with the ability to automatically control working pressure, heated by electric heating elements or electromagnetic induction methods, with a rated power not exceeding 2000W, a rated volume not exceeding 10L, and a rated cooking pressure of 40kPa-140kPa (gauge pressure);

—Electric stewing pots and similar appliances operating under normal pressure, with a rated voltage not exceeding 250V, a rated power not exceeding 2000W, and a rated volume not exceeding 10L;

—Electric kettles with a rated voltage not exceeding 250V AC and capable of pouring water from the spout by holding the handle and tilting the kettle body;

—Induction cookers with one or more heating units, each with a rated power of 700W to 3500W;

—Microwave ovens with a maximum rated input power of 2500W and below, utilizing electromagnetic energy in the ISM frequency band of 2450MHz, and heating items and food inside the oven by resistive electric heating elements, including combination type microwave ovens.

This document does not apply to the following types of kitchen appliances:

—Commercial induction cookers, power frequency induction cookers, and concave stoves;

—Commercial microwave ovens, industrial microwave ovens, and microwave ovens with range hoods.

Ferric glycine complex (HS code(s): 230990); (ICS code(s): 65.120) 28/06/2024

National Standard of the P.R.C., Feed additive—Part 3: Minerals and their complexes (or Chelates)—Ferric glycine complex;

This document defines the chemical name, molecular formula, relative molecular mass and structural formula of Ferric glycine complex, specifies the technical requirements, sampling, inspection rules, labeling, packaging, transportation, storage and shelf life of Ferric glycine complex as a feed additive, and describes test methods. This document applies to the chemical synthesis of feed additive Ferric glycine complex with glycine and ferrous sulfate as main raw materials.

G/TBT/N/EU/1059 30/04/2024	European Union	<p><i>Biocidal products</i></p> <p>Draft Commission Implementing Decision repealing Implementing Decision (EU) 2023/2101 postponing the expiry date of the approval of sulfuryl fluoride for use in biocidal products of product types 8 and 18;</p>	29/06/2024

This draft Commission Implementing Decision repeals the postponement of the expiry date of the approval of sulfuryl fluoride as an active substance for use in biocidal products of product types 8 and 18. On 28 June 2017, applications were submitted in accordance with Article 13(1) of the Regulation (EU) No 528/2012 of the European Parliament and of the Council (BPR) for the renewal of the approval of sulfuryl fluoride for PT8 and PT18. On 13 September 2023 the Agency adopted its opinions on sulfuryl fluoride for PT8 and PT18, having regard to the conclusions of the evaluating competent authority. Given the opinions of the Agency, taking into account that the applicant did not provide the requisite information and data prescribed by the evaluating competent authority, it was not possible to determine whether sulfuryl fluoride meets the criteria referred to in Article 5(1), points (c) and (d), of the BPR with regard to reproductive toxicity and endocrine-disrupting properties on human health, and it has not been demonstrated whether sulfuryl fluoride has no unacceptable effects to human health and the environment under Article 4 of the BPR. It is therefore appropriate not to renew the approval of sulfuryl fluoride for PT 8 and 18. Consequently, a draft Decision is being prepared to not renew the approval of sulfuryl fluoride for PT8 and 18 (examination procedure under Regulation (EU) No 182/2011). Further to that Decision, it is necessary to repeal the postponement of the expiry date of the approval of sulfuryl fluoride. The present draft Decision therefore intends to repeal Decision (EU) 2023/2101 postponing the expiry date of the approval of sulfuryl fluoride for PT8 and 18.

Ribbed steel bars for concrete reinforcement (HS code(s): 7214; 7227; 7228); (ICS code(s): 77.140.15; 91.080.40) 29/06/2024

SI 4466 Part 3 -Steel for the reinforcement of concrete: Ribbed bars;

Revision of the Mandatory Standard SI 4466 part 3, dealing with ribbed steel bars for concrete reinforcement. This proposed standard revision adopts the International Standard ISO 6935-2 -Fourth edition: 2019-10, with a few changes that appear in the standard's Hebrew section. The major differences between the old version and this new revised draft standard are as follows:

- Adds new terms to Section 3 -Terms and definitions;
- Adds new Table 3.1 to Section 6 dealing with the requirements for ribs, titled "The characteristic relative area of the rib";
- Replaces Section 8, including Table 6, dealing with the tensile properties;
- Adds new sub-section 9.2, dealing with the conditions of testing.

Both the old standard and this new revised standard will apply from entry into force of this revision for a transition period of 6 months. During this time, products may be tested according to the old or the new revised standard.

Equipments subject to Conformity Assessment of Broadcasting and Communication Equipments 29/06/2024

Draft amendment of notification on Conformity Assessment of Broadcasting and Communication Equipment

- Establishment of detailed procedures and reclassification of target equipment following the introduction of a self-conformity confirmation system(new Article 11, 12 / Article 18, new paragraph 4·5 / Article 27, new paragraph 3/new Annex Form No.21/revision Attached Table 1)
 - oNew procedures and methods for writing, disclosure, document storage, change, and termination of self-conformity confirmation equipment and reclassification of target equipment
- Establishment of detailed procedures for reporting and correcting nonconforming equipment (new Article 25 / new Annex Form No.22~24)
 - oIn cases where major defects in equipment that have undergone a conformity assessment are recognized, new procedures and methods for reporting nonconformity, submitting action plans and results such as correction and collection, and disclosing information on nonconforming equipment, etc.
- Designation of a domestic agent for an overseas manufacturer and clarification of agency matters, etc. (revision Article 30)
 - oClarify the basis for designation of a domestic agent for conformity assessment and agency mattersandestablish a new procedure to change the designated domestic agent.
- Revision of conformity assessment marking method (complete revision Attached Table 5)
 - oWhen indicating that a conformity assessment has been received, it had to be indicated on both theequipment and packaging, but the marking method has been simplified so that it can be indicated on the equipment or packaging.
- Currentization of related provisions and reorganization of attached forms in accordance with revision of radio wave laws, etc. (revision Article 1, 3, 5, 8, 10, 13~24, 26~32 / revision Attached Table 4, 6, 7 / revision Annex Form No.1, 4, 5, 6, 8~10~13, 17~20)
 - oCurrentization of article numbers and related forms according to revision of radio waves laws and new notice provisions, etc.

requirements if they are used as 'primary packaging' (regulation 7.1.a) or 'shipment packaging' (regulation 7.1.d) of the draft regulations.

1.primary packaging, which is packaging conceived so as to constitute a sales unit to the final user or consumer at the point of purchase;

2.Shipment packaging, which is packaging in addition to primary packaging on items which are sold online or by mail order which are either delivered direct to the purchaser or collected by the purchaser from a shop or other collection point after they have been purchased.

Draft Regulations The Producer Responsibility Obligations (Packaging and Packaging Waste) Regulations 2024(Provisions being notified are Part 3 – Chapter 2 –Recycling Information)

The Regulations will require certain categories of businesses, including importers who are established and supply packaged products. In the UK, to label packaging as 'Recycle' or 'Do Not Recycle' together with a logo, as specified in the Regulations. Businesses that manufacture or import unfilled packaging for supply to another business will be required to provide information on its recyclability. This will inform correct labelling by the businesses that subsequently fill that packaging. A common methodology to determine recyclability will be publicly available. This will inform businesses which label to apply. The Regulations will include details of the types of packaging that must be labelled, flexibility regarding medical and veterinary products, and exemptions for certain packaging items such as small packaging.

Lifts. Escalators (ICS code(s): 91.140.90)

01/07/2024

Draft of the Egyptian Standard for " Energy performance of lifts, escalators and moving walks —Part 3: Energy calculation and classification for escalators and moving walks"

This draft Standard specifies generic tools for estimating energy consumption of escalators and moving walks, and a consistent method for energy performance classification of existing, modernized, or new escalators and moving walks. It considers the energy performance during the operational portion of the life cycle of escalators and moving walks. It does not cover energy consumption and classification of the ancillary equipment, such as the following:

- a) lighting with the exception of comb plate lighting, step gap lighting, and traffic light (comb plate lighting, step gap lighting, and traffic light are considered essential for the operation of the equipment and are therefore not defined as ancillary equipment);
- b) cooling and heating and machine room ventilation;
- c) alarm devices and emergency battery supplies equipment, etc.;
- d) environmental conditions;
- e) consumption through the power sockets.

There can be other electrical loads not associated with the escalator or moving walk, and not included. It considers all escalators and inclined moving walks up to a rise of 8 m and horizontal moving walks with a length up to 60 m (this represents about 85 % of worldwide installed units). Worth mentioning is that this draft standard is technically identical with ISO 25745-3:2015 (confirmed 2020).

Egypt

Lifts. Escalators (ICS code(s): 91.140.90)

01/07/2024

Draft of the Egyptian Standard for " Energy performance of lifts, escalators and moving walks —Part 2: Energy calculation and classification for lifts (elevators)";

This draft Standard specifies a method to estimate energy consumption based on measured values, calculation, or simulation, on an annual basis for traction, hydraulic and positive drive lifts on a single unit basis, and an energy classification system for new, existing, and modernized traction, hydraulic, and positive drive lifts on a single unit basis. It applies to passenger and goods passenger lifts with rated speeds greater than 0,15 m/s and only considers the energy performance during the operational portion of the life cycle of the lifts. For other types of lifts (e.g. service lifts, lifting platforms, etc.), it can be taken as a reference. It does not cover energy aspects, which affect the measurements, calculations, and simulations, such as the following: hoist way lighting; heating and cooling equipment in the lift car; machine room lighting; machine room heating, ventilation, and air conditioning; non-lift display systems, CCTV security cameras, etc.; non-lift monitoring systems (e.g. building management systems, etc.); effect of lift group dispatching on energy consumption; environmental conditions; consumption through the power sockets; lifts whose travel includes an express zone (an express zone is unlikely to affect the average car load but can significantly affect the average travel distance).

Worth mentioning is that this draft standard is technically identical with ISO 25745-2:2015/Amd1: 2023

Lifts. Escalators (ICS code(s): 91.140.90)

01/07/2024

Draft of the Egyptian Standard for " Energy performance of lifts, escalators and moving walks —Part 1: Energy measurement and verification ";

This draft Standard specifies:

- a) methods of measuring actual energy consumption of lifts, escalators and moving walks on a single unit basis;
 - b) methods of carrying out periodic energy verification checks on lifts, escalators and moving walks in operation.
- This document only considers the energy performance during the operational portion of the life cycle of the lifts,

escalators or moving walks. For lifts, this document does not cover energy aspects, such as:

- a) hoist way lighting;
- b) heating and cooling equipment, including fans in the lift car;
- c) machine room lighting;
- d) machine room heating, ventilation and air conditioning;
- e) non-lift, display systems, closed circuit television security cameras, etc.;
- f) non-lift, monitoring systems (building management systems, etc.);
- g) the effect of lift group dispatching on energy consumption;
- h) non-lift equipment consumption through the power sockets;
- i) energy storage systems if used as an alternative energy source for operation.

For escalators and moving walks, this document does not cover energy aspects of the ancillary equipment, such as:

- a) lighting with the exception of comb plate lighting and step gap lighting and traffic light;
- b) cooling and heating;
- c) alarm devices and emergency battery supplies equipment, etc.

Worth mentioning is that this draft standard is technically identical with ISO 25745-1:2023

Medicinal products; Good manufacturing practice (GMP) inspection

Conformity assessment procedures

This Agreement lays down the conditions under which one Party will accept the pharmaceutical GMP conformity assessment results (e.g. GMP inspection certificates) performed by the other Party's competent authority, and vice versa. This Agreement applies to GMP medicinal products for human use and facilitates market access by eliminating technical barriers to trade with respect to medicinal products.

Draft Resolution of the Cabinet of Ministers of Ukraine "On Amendments to Annexes 3 and 4 to the Technical Regulation on the Restriction of the Use of Certain Hazardous Substances in Electrical and Electronic Equipment"

The draft Resolution provides for amendments to Annexes 3 and 4 to the Technical Regulation on the Restriction of the Use of Certain Hazardous Substances in Electrical and Electronic Equipment, approved by Resolution of the Cabinet of Ministers of Ukraine No. 139 of 10.03.2017, by extending the validity of certain exemptions to the restrictions and supplementing the said Annexes with new exemptions. The amendments, in particular, related to exemptions for mercury in melt pressure transducers for capillary rheometers at temperatures over 300 °C and pressures over 1000 bar, as well as for cadmium and lead in plastic profiles in electrical and electronic windows and doors containing recovered rigid polyvinyl chloride. Such amendments are developed in order to bring the provisions of the Technical Regulation in compliance with the requirements of the Directive 2011/65/EU of the European Parliament and of the Council of 8 June 2011 on the restriction of the use of certain hazardous substances in electrical and electronic equipment, Annexes III and IV to which were amended in 2023 by Commission Delegated Directive (EU) 2023/1437 of 4 May 2023 and Commission Delegated Directive (EU) 2024/232 of 25 October 2023.

Products covered fall under the 18 product regulations under the responsibility of the Department for Business and Trade, the Ecodesign for Energy-Related Products Regulations 2010 (Department for Energy Security and Net Zero), the Explosives Regulations 2014 (Department for Work and Pensions (Health and Safety Executive)), and the Restriction of the Use of Certain Hazardous Substances in Electrical and Electronic Equipment Regulations 2012 (Department for Environment, Food and Rural Affairs). A full list of these regulations is attached to this notification. These regulations cover a range of manufactured products including mobile phones, lifts, industrial machinery, toys, and household appliances. Such products are included within, but are not limited to, the following HS codes: 36, 39, 73, 76, 85, 95, 96.

01/07/2024

The Product Safety and Metrology etc (Amendment) (Marking and Labelling) Regulations 2024

The United Kingdom has announced its intention to introduce a voluntary option for businesses to use digital labelling, as an alternative to physical labelling, for certain marking and information requirements. This will apply to most manufactured products. Where the Regulations require businesses to provide a product's UK conformity marking, manufacturer details, importer details, responsible person details (or in the case of the Aerosols Dispensers Regulations 2009, the person responsible for the marketing of the aerosol dispenser) and UK Declaration of Conformity, this will allow businesses to provide access to such marking and information through a digital link. The United Kingdom also intends to make permanent the

current temporary labelling easements relating to a product's UK conformity marking and importer details (G/TBT/N/GBR/49). Where the Regulations require businesses to provide a product's UK conformity marking and importer details on a product, this will allow businesses to provide the same marking and details on the product's packaging, on a label affixed to the product or the product's packaging, or on an accompanying document. In respect of the existing importer details easement, this will be made permanent and expanded to provide more flexibility for all importers. These labelling easements will also be extended to cover a product's manufacturer details. Where the Regulations require businesses to provide manufacturer or responsible person details (or marketer details in the case of the Aerosols Dispensers Regulations 2009) on the product, this will also allow businesses to provide these details on the product's packaging, on a label affixed to the product or the product's packaging, or on an accompanying document. This legislation applies to Great Britain (England, Scotland and Wales).
