G/TBT/N/ALB/102 27/04/2026	Albania	<i>Crude petroleum (ICS code(s): 75.040)</i> New (draft) National Standard of Albania - Crude oil and natural gas condensate - Classification and characteristics This Standard defines the requirements and provides a classification for the most efficient use of crude oil and crude condensate from natural gas, originating from oil and natural gas fields.	26/06/2026
G/TBT/N/ARE/702 , G/TBT/N/BHR/779 , G/TBT/N/KWT/763 , G/TBT/N/OMN/602 , G/TBT/N/QAT/753 , G/TBT/N/SAU/1436 , G/TBT/N/YEM/350 27/04/2026	Bahrain, Kingdom of	<i>Food products in general (ICS code(s): 67.040)</i> Flavored and Sweetened Greek-Style Yogurt This draft technical regulation concerned with the requirements to be met in flavored and sweetened Greek-Style Yogurt. It applies to all types available on the market.	26/06/2026
G/TBT/N/EGY/574 27/04/2026	Egypt	<i>Gas cylinders (ICS code(s): 23.020.35)</i> The draft of the Egyptian standard ES 780-2 for” gas cylinders-refillable seamless steel gas cylinders-design, construction and testing part 2: quenched and tempered steel cylinders with tensile strength greater than or equal to 1100 MPa “ . The draft of the Egyptian standard specifies minimum requirements for the material, design, construction and workmanship, manufacturing processes, examination and testing at time of manufacture for refillable seamless steel gas cylinders and tubes with water capacities up to and including 450 l. it is applicable to cylinders and tubes for compressed, liquefied and dissolved gases and for quenched and tempered steel cylinders and tubes with an actual tensile strength $R_m \geq 1100$ MPa. Worth mentioning is that this draft standard is technically identical with ISO 9809-2/2019.	26/06/2026
G/TBT/N/EGY/575 27/04/2026	Egypt	<i>Gas cylinders (ICS code(s): 23.020.35)</i> The draft of the Egyptian standard ES 780-3 for “gas cylinders — design, construction and testing of refillable seamless steel gas cylinders and tubes – part: 3 normalized steel cylinders and tubes “. The draft of the Egyptian standard specifies minimum requirements for the material, design, construction and workmanship, manufacturing processes, examination and testing at the time of manufacture for refillable seamless steel gas cylinders and tubes with water capacities up to and including 450 l. It is applicable to cylinders and tubes for compressed, liquefied and dissolved gases and for normalized or normalized and tempered steel cylinders and tubes. Worth mentioning is that this draft standard is technically identical with ISO 9809-3/2019	26/06/2026

G/TBT/N/EGY/576 27/04/2026	Egypt	<p><i>Gas cylinders (ICS code(s): 23.020.35)</i></p> <p>The draft of the Egyptian standard ES 780-4 for” Gas cylinders — Design, construction and testing of refillable seamless steel gas cylinders and tubes - Part: 4 Stainless steel cylinders with an Rm value of less than 1 100 MPa “.</p> <p>The draft of the Egyptian standard specifies the minimum requirements for the materials, design, construction and workmanship, manufacturing processes, examinations and testing at time of manufacture for refillable, seamless, stainless steel gas cylinders with water capacities up to and including 150 l. It is applicable to cylinders for compressed, liquefied and dissolved gases with a maximum actual tensile strength, R_m, of less than 1 100 MPa. NOTE: If so desired, cylinders of water capacity between 150 l and 450 l can be manufactured to be in full conformance to this standard. Worth mentioning is that this draft standard is technically identical with ISO 9809-4/2026.</p>	26/06/2026

Initial registration shall be valid for three (3) or six (6) years, while renewal registration shall be valid for three (3), six (6), nine (9), or twelve (12) years, at the discretion of the applicant.</p>	05/06/2026
<p>G/TBT/N/TPKM/593 29/04/2026</p>	Chinese Taipei	<p><i>Static converters (HS code(s): 850440)</i> Proposal for Amendments to the Legal Inspection Requirements for Seven Power Supply Equipment, Including Non-Vehicle-Mounted Chargers for Electric Motorcycles In view of the rising risk of international incidents involving electric motorcycles, electric bicycles, and electrically power-assisted bicycles, the Bureau of Standards, Metrology and Inspection (BSMI) proposes to strengthen the regulatory requirements governing seven types of power supply equipment, including non-vehicle-mounted chargers for electric motorcycles. The proposed amendments primarily make available an alternative conformity assessment procedure, i.e. Type-approved Batch Inspection for business operators to choose from. In addition, electric vehicle conductive AC and DC/combo charging equipment, which were previously announced as subject to mandatory inspection, are incorporated into the revised scope following product regrouping. This does not alter the existing regulatory requirements applicable to those</p>	28/06/2026

products; rather, it is intended to provide business operators with a comprehensive overview of the relevant regulatory measures.

28/06/2026

Draft Act amending the Act on the protection of health against the effects of using tobacco and tobacco products (governmental document no.: UD 213); 6 pages in Polish + justification and other related documents.

The proposed amendment to the Act on the Protection of Health from the Consequences of Using Tobacco and Tobacco Products includes a number of key changes aimed at strengthening regulations regarding new nicotine products and electronic cigarettes, as well as aligning the regulations with international and EU standards. The draft act proposes:- introducing a ban on the sale of disposable electronic cigarettes, both with and without nicotine;- extending the ban to include the sale of flavored nicotine pouches (except for tobacco flavor) and other nicotine products that are currently not subject to Directive 2014/40/EU and the provisions of the Act – it is proposed that these products be available only under the pharmaceutical regime after obtaining appropriate permits;- establishing new criminal sanctions to effectively enforce the regulations, including significant fines and imprisonment for violating the sales ban and for obstructing the sampling of these products;- introducing labeling of e-cigarette liquid containers to enable their identification;- establishing transitional

periods for the withdrawal from the market of products that do not meet the new requirements. The draft law is part of broader efforts to limit the availability and harmfulness of new forms of consumption of nicotine and tobacco products, with the aim of protecting public health and adapting Polish law to international standards.

The Persistent Organic Pollutants (Amendment) Regulations 2026

The UK is intending to amend Annex I of Regulation (EU) 2019/1021 of the European Parliament and of the Council on persistent organic pollutants (“POPs”) (recast) [“the assimilated POPs Regulation”]. The proposed changes are derived from the commitments and guidance set out by the Stockholm Convention, to which the UK is a Party. In brief, the United Kingdom is proposing: The prohibition from use, manufacture and placing on the market of five chemicals, UV-328 (a plastics and coatings additive which protects from sun damage), Dechlorane Plus (a flame retardant), Chlorpyrifos (pesticide), MCCPs (plasticizer and flame retardant), and LC-PFCAs (PFAS with a number of applications, including surface treatments and consumer products). These prohibitions are subject to some specific exemptions allowing the continued use of the substances. These exemptions align with the exemptions available under the Stockholm Convention. All exemptions are time-limited and are set out in detail in the accompanying statutory instrument. In addition to these specific exemptions, the SI will introduce an unintentional trace contaminant (UTC) level for the five POPs mentioned in point (a). The SI will also make amendments to the UTC limits for the existing POP, PFOS, and will remove an out-dated reference to the European Committee for Standardisation (CEN) for this POP.

Static converters (HS code(s): 850440) 29/06/2026

Proposal for Amendments to the Legal Inspection Requirements for Four Power Supply and Charging Equipment, Including Battery Chargers

The Bureau of Standards, Metrology and Inspection (BSMI) proposes amendments covering four categories of power supply and charging equipment as part of an initiative to regroup related products and present the applicable regulatory requirements in a clearer and more comprehensive manner. The principal amendments are the expansion of scope of battery chargers (to include those converting DC to DC) and the adoption of an updated version of the applicable inspection standard for other static converters in order to enhance product safety and protect consumers' rights and interests. For the remaining products, the applicable inspection standards and conformity assessment procedures will remain largely unchanged.

Static converters (HS code(s): 850440) 29/06/2026

Proposal for Amendments to the Legal Inspection Requirements for Three Power Supply Equipment, Including Uninterruptible Power Supplies

The proposed amendments cover three product items: uninterruptible power supplies (UPS), static converters, and other switch mode power supplies. For UPS, the amendments update the applicable inspection standards by adopting the latest version, with a view to enhancing product safety and aligning with current international standards. No substantive change is proposed for static converters; they are included in the amended scope solely as a result of product regrouping and to provide business operators with a more comprehensive overview of the applicable requirements. For other switch mode power supplies, the amendments introduce alternative inspection standards which

		business operators may use to demonstrate compliance with the regulatory requirements.
