**Draft of Egyptian standard for "Stationary training equipment part 1: General safety requirements and test method";**

This draft of Egyptian standard specifies general safety requirements and test methods for indoor stationary training equipment. It also covers environmental aspects. This standard is applicable to all stationary training equipment. This includes equipment for use in training areas of organizations such as sport associations, educational establishments, hotels, sport halls, clubs, rehabilitation centres and studios (classes S and I) where access and control is specifically regulated by the owner (person who has the legal responsibility), equipment for domestic use (class H) and other types of equipment including motor driven equipment. Worth mentioning is that this draft standard is technically identical with ISO 20957-1:2024.

**Draft of Egyptian standard for "Stationary training equipment—part 6: Treadmills, additional specific safety requirements and test methods";**

This draft of Egyptian standard specifies safety requirements and test methods for treadmills in addition to the general safety requirements and test methods. This draft standard deals with significant hazards, hazardous situations and events relevant to stationary training equipment used as intended and under the conditions of misuse foreseeable by the manufacturer (see Clause 4). It is applicable to power-driven as well as to non-power/manually driven training equipment type treadmills (hereafter referred to as treadmills) with the classes S, H and I and classes A, B and C regarding accuracy. Worth mentioning is that this draft standard is technically identical with ISO 20957-6:2021

**Draft of Egyptian standard for "Stationary training equipment—part 2: Strength training equipment - Additional specific safety requirements and test methods";**

This draft of Egyptian standard specifies safety requirements for stationary strength training equipment, in addition to the general safety requirements. This standard is applicable to

stationary strength training equipment with stacked weight resistance or alternative means of resistance, such as elastic cords, hydraulic, pneumatic, electrical, magnetic, springs and externally loaded weights (hereinafter referred to as stationary training equipment) with the classes H, S and I. Worth mentioning is that this draft standard is technically identical with ISO 20957-2:2024

19/06/2026

**Draft Order of the Ministry of Health of Ukraine "On Approval of the Procedure for Confirming the Compliance of Medicine Manufacturing Facilities Located Outside Ukraine with the Good Manufacturing Practice Requirements Established in Ukraine";**

The draft Order has been developed in accordance with the requirements of Articles 47 and 108 of the Law of Ukraine "On Medicines" No. 2469-IX of 28 July 2022, taking into account relevant European Union legislation. In accordance with Article 47(4) of the Law, confirmation of compliance of medicine manufacturing with the Good Manufacturing Practice requirements established in Ukraine, including for manufacturing facilities located outside Ukraine, shall be carried out by the state control authority through the inspection of manufacturing facilities conducted in a manner aligned with European Union legislation, taking into account the inspection procedures and information exchange practices applied in the European Union for the manufacture and distribution of medicines, and based on a risk-based planning approach (except for imported active pharmaceutical ingredients). The draft Order establishes the legal and organisational framework for the procedure for confirming compliance of manufacturing conditions of medicines at manufacturing facilities located outside Ukraine with the Good Manufacturing Practice (GMP) requirements established in Ukraine. In particular, it provides for:

- the inspection of medicine manufacturing facilities located outside Ukraine;
- the recognition of official GMP compliance documents issued by competent authorities of countries with Stringent Regulatory Authorities (SRAs);
- the issuance by the state control authority of documents confirming GMP compliance;
- the definition of the powers and rights of officials of the state control authority in conducting the GMP compliance confirmation procedure;
- the rights and obligations of medicine manufacturers located outside Ukraine in the course of such procedure.

This procedure applies to medicine manufacturers located outside the territory of Ukraine that hold a manufacturing licence (where such licensing is required under the national legislation of the country in which the manufacturing facilities are located) and that apply for the registration of medicines in Ukraine, as well as to applicants and their authorised representatives in accordance with the procedure established by law. It is also established that the procedure for confirming the compliance of medicine manufacturing with GMP requirements established in Ukraine that has been commenced but not completed prior to the entry into force of this Order, shall be completed

in accordance with the Procedure for Confirmation of Compliance of Manufacturing Conditions of Medicines with the Requirements of Good Manufacturing Practice, approved by Order of the Ministry of Health of Ukraine No. 1130 of 27 December 2012 (as amended by Order No. 1346 of 9 June 2020), which, for the purposes of conducting such a procedure until its completion, shall apply in the version in force as of the date of entry into force of this Order. Decisions adopted upon completion of such a procedure shall be issued using the forms approved by this Order. Upon the adoption of this draft Order, Order of the Ministry of Health of Ukraine No. 1130 of 27 December 2012 "On Approval of the Procedure for Confirmation of Compliance of Manufacturing Conditions of Medicines with the Requirements of Good Manufacturing Practice" shall cease to have effect.

It intends to restrict the use and placing on the market of terphenyl, hydrogenated as a substance on its own or, where present in a concentration greater than 0.1 % by weight, as a constituent of other substances, in mixtures, or in articles or any parts thereof. Proposed permanent derogations include: (i) uses of PHT as a heat transfer fluid in the temperature range of 250 °C to 350 °C at industrial sites that have implemented strictly controlled closed systems to prevent PHT emissions; and (ii) defence applications. The application of the proposed Regulation is deferred by 18 months, except for civilian aerospace applications, where a 10-year transitional period is proposed</p>	07/07/2026
<a href="#">G/TBT/N/EU/1206</a> 08/05/2026	European Union	<p><i>Substances classified as carcinogenic, mutagenic or toxic for reproduction category 1A or 1B in childcare articles</i></p>	07/07/2026

**Draft COMMISSION REGULATION (EU) .../...of XXX amending Annex XVII to Regulation (EC) No 1907/2006 of the European Parliament and of the Council as regards substances classified as carcinogenic, mutagenic or toxic for reproduction (CMR) category 1A or 1B in childcare products.;**

This draft Regulation would introduce a new entry into Annex XVII to Regulation (EC) No 1907/2006. It would prohibit the placing on the market of CMRs 1A and 1B in childcare products. For the purpose of this draft Regulation, childcare products are defined as any product other than a substance or mixture on their own, designed to facilitate seating, sleep, relaxation, hygiene, feeding, sucking, transportation or protection of children. The prohibition would only apply when generic or – where applicable – specific concentration limits are exceeded. A transition period of 3 years is foreseen. Exemptions would apply for (1) second-hand childcare products, (2) homogeneous material in childcare products, which is inaccessible to children, where the CMR is not released, (3) childcare products that are also devices with an intended medical purpose or their accessories and (4) childcare products, which are intended to come into contact with food (food contact materials).

La guía emitida por el Instituto de Salud Pública (ISP) establece los requisitos actualizados para el registro sanitario del agua para uso farmacéutico y define nuevas exigencias para los antibióticos de administración oral.

El documento busca evitar riesgos de intoxicación, contaminación y fallas en la eficacia del tratamiento originados por una reconstitución inadecuada en el hogar, obligando a que toda nueva solicitud de registro para antibióticos en polvo o granulado de uso oral incluya el solvente necesario como un registro de combinación. Asimismo, clasifica los diferentes tipos de agua y detalla sus estándares de calidad y finalidad de uso según la normativa nacional e internacional.

**The Medical Devices (Amendment) Regulations 2026**

The measures will amend the Medical Devices Regulations 2002 (SI 2002 No 618, as amended) as applicable in Great Britain (GB). The amendments seek to update the pre-market requirements that manufacturers must meet before placing their devices on the GB market. This will help improve patient safety, enable swifter access to medical devices through streamlined, risk-based regulatory pathways and international reliance routes, and support innovation by modernising the Regulations, aligning them more closely with international best practice. Key changes include:

1. Introduction of an international reliance scheme providing swifter routes to market for certain medical devices and in vitro diagnostic (IVD) devices.
2. Classification changes to general medical devices and IVD devices for more risk-proportionate regulation.
3. Enhanced safety and performance requirements for medical devices and IVD devices, supporting closer alignment with international regulatory approaches.
4. More comprehensive technical documentation requirements, including enhanced retention periods.
5. Strengthened requirements for medical devices to claim equivalence to an existing device.
6. Requirement for mandatory use of Unique Device Identifiers for medical devices and IVD devices along with implant cards for implantable medical devices, improving traceability, ability to manage adverse events, and transparency for patients.
7. Regulation of misleading or unsubstantiated claims about medical devices and IVD devices.
8. Broadening the circumstances in which electronic instructions for use can be adopted in place of physical instructions.

United States of America

*To better reflect the current and foreseen future marketing of nectarines as consumer preferences are favoring fruit with higher sugar content, AMS is proposing to revise the U.S. Standards for Grades of Nectarines by removing speckling as a type of defect affecting quality.*

06/07/2026

**Nectarines; Quality (ICS code(s): 03.120); Fruits. Vegetables (ICS code(s): 67.080)**

Notice; request for comments - The Agricultural Marketing Service (AMS) of the Department of Agriculture (USDA) proposes to revise the United States (U.S.) Standards for Grades of Nectarines. AMS is proposing to remove "speckling", as a type of defect when grading nectarines, since speckling is strictly a cosmetic issue and does not affect the internal quality, shelf life, or lead to any negative flavors of the affected nectarines. In fact, nectarines with higher sugar content, or sweetness, have been correlated with increased amounts of speckling. These changes would bring the grade standards in line with the present quality levels being marketed today and would provide guidance in the effective utilization of this commodity.
