*Foam concentrates fire extinguishers (HS code(s): 842410); 30/07/2022*  
*(ICS code(s): 13.220.10)*

**SI 71568 part 4 -Fire extinguishing media: Foam concentrates –Specification for low expansion foam concentrates for surface application to water-miscible liquids;**

Revision of the Mandatory Standard SI 71568 part 4, dealing with foam concentrates fire extinguishers. This draft standard revision adopts both the European Standard EN 1568-4: February 2018 and the American Standard ANSI/UL 162 – Eighth Edition: February 23, 2018 (only the requirements applying to low expansion foam concentrates for surface application to water-miscible liquids).The standard's Hebrew section includes a few national deviations as follows:

1.In the European route of compliance (Chapter A):

- oAdds to the standard's introduction a reference to the Mandatory Standards SI 2302 parts 1-2, dealing with the classification, labeling, marking, packaging and transportation of dangerous substances and mixtures;
- oChanges in the normative references (Section 2);
- oChanges the requirements of Section 12 dealing with occupational health and ecotoxicological requirements;
- oChanges the container marking requirements as detailed in Section 14.

2.In the American route of compliance (Chapter B):

- oChanges the standard's scope to apply to low expansion foam concentrates for surface application to water-miscible liquids ;
- oAdds a new Section 1-a with new normative references;
- oAdds a new Section 27 dealing with ecotoxicological requirements.The major differences between the old version and this new revised draft standard are as follow:

- Adds to both routes of compliance new requirements that limit the maximum concentration of perfluorooctanoic acid (PFOA), its salts and PFOA-related compounds and of perfluorooctanoic acid (PFOA), its salts and PFOA-related compounds, in foam concentrates;

- Adds to the American route of compliance (Chapter B) updated specifications for commercial hapten.

Both the old standard and this new revised standard will apply from entry into force of this revision for one year. During this time, products may be tested according to the old or the new revised standard.

*Motor Vehicles*

15/07/2022

**Revision of "Rules on the Performance and Standards for Motor Vehicles and their Parts";**

The following amendments will be made: These amendments will be applied to new type vehicles only.

A. Harmonizing with the UN R157 for performance requirements of Automated Lane Keeping Systems(ALKS) (Draft Table 27 Paragraph 1 related to Article 111-3)

- 1) Improving of the requirements of dedicated means of activation and deactivation of system for ALKS (Draft Table 27 paragraph 1, Item 1)
  - 2) The requirements of the control and detection of other road users and environmental conditions under the DDT(Dynamic Driving Task) (Draft Table 27 Paragraph 1, Item 2)
  - 3) Amending of indication method for the minimum following distance (DraftTable 27Paragraph 1, Item 2)
  - 4) Strengthening requirements of forward, lateral detection range and minimum forward detection distance of ALKS (Draft Table 27 Paragraph 1, Item 3)
  - 5) Improving the requirements of initiation timing of transition demand to driver (Draft Table 27 Paragraph 1, Item 4)
  - 6) Strengthening the requirements of information to the driver (Human-Machine-Interface) (Draft Table 27 Paragraph 1, Item 5)
  - 7) Amending the requirements of Minimum Risk Manoeuvre (Draft Table 27 Paragraph 1, Item 6)
  - 8) Clarifying the requirements of Emergency Manoeuvre (Draft Table 27 Paragraph 1, Item 7)
- B. Harmonizing with the UN R157 for Driver Availability Recognition System of Automated Lane Keeping Systems(ALKS) (Draft Table 27 Paragraph 2 related to Article 111-3)
- 1) Simplifying the requirements of criteria for deeming driver availability (Draft Table 27 Paragraph 2, Item 3)
  - 2) Introducing the detection requirements of driver availability (Draft Table 27 Paragraph 2, Item 4)
- C. Improving the current text of Article 111-3

	Kingdom of	<b>Performance requirements for pressurized flushing devices for plumbing fixtures</b> This Standard covers pressurized flushing devices (PFDs) intended to flush water closets, urinals, and other plumbing fixtures and specifies requirements for materials, design, methods of operation, test methods, and markings.	
<a href="#">G/TBT/N/UGA/1602</a> 31/05/2022	Uganda	<i>Parts (HS code(s): 830160); Building accessories (ICS code(s): 91.190)</i> <b>DUS 2434:2022, Building hardware -Mechanically operated locks and locking plates -Requirements and test methods, Second Edition;</b> This Uganda Standard specifies requirements and test methods for durability, strength, security and functionality of mechanically operated locks and their locking plates: a) for use in doors in buildings; b) for use on fire and smoke compartmentation doors fitted with door closing devices, to enable such doors to close reliably and thus achieve self-closing in the event of fire; and c) for use on locked fire doors to maintain the fire integrity of the door assembly. This Uganda Standard covers locks and their locking plates, which are either manufactured and placed on the market in their entirety by one producer or produced by more than one producer, or assembled from sub-assemblies produced by more than one producer and designed to be used in combination. This Uganda Standard specifies mechanically operated locks and locking systems intended for use in different environmental and security conditions, thus necessitating different grades. This Uganda Standard does not specify Multipoint locks or their locking plates. This Uganda Standard specifies the dimensions and properties required for security. Assessment of the contribution of the product to the fire resistance of specific fire resistance and/or smoke control door set assemblies is beyond the scope of this Uganda Standard.	30/07/2022

<a href="#">G/TBT/N/ESP/46</a> 01/06/2022	Spain	<i>Envases (ver definición en el artículo 3 del proyecto de Real Decreto)</i> <b>Proyecto de Real Decreto de envases y residuos de envases;</b> El proyecto de Real Decreto establece las obligaciones generales de los productores de productos envasados, ya sea en envases domésticos, comerciales e industriales. Los productores deberán dar cumplimiento de forma individual o colectiva a través de los sistemas de Responsabilidad Ampliada del Productor (RAP). La norma incluye diversas disposiciones relacionadas con la constitución y el funcionamiento de los sistemas de RAP. También se aclaran las obligaciones de los productores en el ámbito del comercio electrónico.El proyecto incluye objetivos específicos de prevención de generación de residuos de envases, de reutilización y de contenido en material reciclado. También objetivos a nivel estatal de recogida separada de envases y de reciclado.El proyecto define el coste de gestión de los residuos de envases que deben sufragarse con las	31/07/2022

contribuciones financieras aportadas por los productores en aplicación de los nuevos requisitos de la Unión Europea en la materia. En el caso de cumplimiento colectivo de las obligaciones, se establecen también los criterios mínimos para modular dichas contribuciones financieras teniendo en cuenta el diseño de envases. Introduce también nuevas obligaciones de marcado en los envases, como por ejemplo indicar su condición de reutilizable, la fracción o contenedor en la que deben depositarse o, cuando proceda, el símbolo asociado al sistema de depósito, devolución y retorno (SDDR), entre otros.

Se regulan los mecanismos necesarios para incrementar la transparencia y el adecuado seguimiento y control de las obligaciones de los productores tanto en la puesta en el mercado de productos como en la gestión de sus residuos. Finalmente, el proyecto de Real Decreto incorpora disposiciones sobre el Sistema de depósito, devolución y retorno para los envases reutilizables y para ciertos envases de bebida de un solo uso. En ese último caso y en desarrollo de la ley 7/2022 será obligatorio cuando se incumplan los objetivos de recogida separada de botellas de plástico de un solo uso previstos para 2023 ó 2027, y afectará también a las latas y a los envases compuestos de cartón (bricks).
