Pesticides containing the active ingredient bifenthrin 21/07/2026

Application for reassessment an approval – APP204919 application to reassess bifenthrin. 29 pages. English. Staff Assessment Report: Application to reassess bifenthrin and bifenthrin containing substances. 78 pages. English.

The EPA is proposing to make changes to the approvals for substances containing bifenthrin. The approvals under the Hazardous Substances and New Organisms Act 1996 for the import and manufacture for release for bifenthrin and bifenthrin containing substances are proposed to be reviewed and the restrictions applied to their use changed. The EPA is proposing to prohibit the use of wide dispersive methods to apply of bifenthrin (e.g. via boom and airblast sprayer and by broadcast aerial sprayers), with the exception of the use of these substances for biosecurity where a permit from the

EPA will be required. There are non-negligible risks to the environment, in particular the aquatic environment associated with exposure when the substances are applied with wide dispersive application methods. The EPA therefore proposes that these application methods should be prohibited with a 6 month phase out period from the date of decision. Additional restrictions on the use of bifenthrin containing substances are proposed to manage risks from bifenthrin which may occur when the substance is applied through targeted spot spraying.

This document applies to room air conditioners with air cooling condensers, fully enclosed electric compressors, rated cooling capacity of not exceeding 14000W, T1 climate type and low ambient temperature air source heat pump air heaters with a nominal heating capacity of not more than 14000W. This document does not apply to mobile air conditioners, multi-split air conditioning (heat pump) units, ducted air conditioning (heat pump) units and kitchen air conditioners.	26/07/2026
G/TBT/N/PHL/368 27/05/2026	Philippines	<i>Solar energy engineering (ICS code(s): 27.160)</i> DTI Department Administrative Order "Technical Regulation for the Mandatory Product Certification of Solar Energy Systems, including Solar Photovoltaic (PV) Modules, Inverters, Battery Energy Storage Systems (BESS), Rapid Shutdown Devices, Battery Charge This Department Administrative Order (DAO) aims to ensure that components of solar energy systems, including solar photovoltaic (PV) modules, inverters, battery energy storage systems (BESS), rapid shutdown devices, battery charge controllers, and photovoltaic (PV) cables intended for importation, manufacture, distribution, sale, installation, or use in the Philippines, comply with prescribed safety and quality requirements in accordance with applicable Philippine National Standards (PNS). This is to safeguard consumers, ensure product reliability, and promote the adoption of safe and efficient solar energy technologies in the country.	25/07/2026
G/TBT/N/VNM/406 27/05/2026	Viet Nam	<i>Products and goods with medium-risk levels subject to traceability requirements under the management scope of the Ministry of Industry and Trade of Viet Nam</i>Details are provided in the attached draft Circular promulgating the List of medium-risk and high-risk products and goods. (HS codes: not specified; applies to multiple product categories) Draft "Circular promulgating the List of medium-risk and high-risk products and goods under the state management responsibility of the Ministry of Industry and Trade"; This Circular regulates the List of medium-risk and high-risk products and goods under the state management responsibility of the Ministry of Industry and Trade. Accordingly, the List of medium-risk products and goods comprises 07 groups, specifically: i) Tissue paper and toilet paper; ii) Chemicals and chemical-containing products; iii) Industrial explosives; iv) High explosives; v) Industrial explosive accessories; vi) Industrial machinery, equipment, and materials; vii) Explosive precursors.	26/06/2026

Commission Implementing Regulation amending Implementing Regulation (EU) 2025/1706 as regards specific methods, requirements and tests as well as administrative requirements regarding in-vehicle battery durability, electric vehicle range at low temperatur

This draft establishes implementing measures for in-vehicle battery durability, electric vehicle range at low temperature, and system power determination under Regulation (EU) 2024/1257 (Euro 7). It incorporates the most recent worldwide harmonised

standards from UNECE, specifically UN Regulation No. 154 (04 series of amendments) and UN Regulation No. 83 (09 series of amendments), to ensure robust and real-world representative testing for M1 and N1 category vehicles.

The draft introduces specific methods and testing requirements for type-approval, including lifecycle durability testing for in-vehicle batteries, electric range verification at low temperatures, and system power determination for multi-motor electric vehicles. These measures advance zero-emission mobility, improve energy efficiency, and ensure long-term sustainability of battery systems. Recent advancements in automotive technology make it feasible to implement stricter emissions controls. Euro 7 will ensure manufacturers adopt these technologies, driving innovation and fostering cleaner and more efficient vehicles. Timely adoption is crucial to give the industry adequate preparation time for compliance and to safeguard investments in electric vehicles, to reduce premature deaths and chronic diseases linked to air pollution, to lower healthcare costs, and protect the environment and biodiversity through stricter type-approval requirements. A smooth adoption by summer 2026 is also critical to provide industries and authorities with sufficient lead time before the application of Euro 7 to new vehicle types in November 2026.

Given the need for alignment with international standards and the short adoption period, the commenting period has been reduced to 30 days.

Commission Implementing Regulation laying down rules, procedures, testing methodologies and administrative requirements for the application of Regulation (EU) 2024/1257 as regards brake particle emissions of motor vehicles of categories M1 and N1

This draft Implementing Regulation establishes comprehensive requirements for brake particle emissions of M1 and N1 vehicles under Regulation (EU) 2024/1257 (Euro 7), incorporating UN Regulation No. 179 on the Laboratory Measurement of Brake Emissions for Light-Duty Vehicles. The draft Implementing Regulation ensures real-world representative testing and aligns with Euro 7's ambitious air quality objectives, addressing a critical and growing source of urban pollution. As vehicle engines

become cleaner, brake particle emissions—now often exceeding tailpipe emissions in urban areas—demand urgent regulatory attention. The draft introduces stringent testing protocols to accelerate the development of low-emission braking technologies, directly contributing to cleaner urban air and public health improvements by reducing particulate matter linked to respiratory diseases and premature deaths. The measures provide a clear legal framework for manufacturers while safeguarding investments in sustainable technologies. Timely adoption by summer 2026 is essential to ensure industry preparedness ahead of Euro 7's application to new vehicle types in November 2026, preventing market disruptions and enabling smooth compliance. Given the need for alignment with international standards and the short adoption period, the commenting period has been reduced to 30 days

29/06/2026

Pesticide-Treated Seeds

Proposed rule - The Department of Pesticide Regulation (DPR) proposes to adopt section 6626.5 and amend sections 6000, 6147, 6691 and 6760 of Title 3, California Code of Regulations (3 CCR). The pesticide regulatory program activities affected by the proposal are those pertaining to the handling of pesticide-treated seeds in California and the reporting and enforcement of their use. In summary, the proposed regulatory action will add a definition for pesticide-treated seed; exempt pesticide-treated seeds from registration when they meet certain conditions specific to California; require the reporting of pesticide-treated seeds planted in California; and provide exemptions to regulatory requirements for the planting of pesticide-treated seeds when certain conditions are met. The proposed rulemaking harmonizes DPR's regulation of pesticide-treated seeds with the United States Environmental Protection Agency's (U.S. EPA) regulation of pesticide-treated seeds as pesticides exempt from registration under Title 40, Code of Federal Regulations (40 CFR) section 152.25(a) and places additional California-specific conditions on the manufacture, import, sale, and use of pesticide-treated seeds.

Phasedown of Hydrofluorocarbons: Excluding Road and Intermodal Container Transport Refrigeration Units From the Hydrofluorocarbon Leak Repair Requirements

Proposed rule - The U.S. Environmental Protection Agency (EPA) is proposing an exemption for road and intermodal container transport refrigeration units (TRUs) from the leak repair requirements established under the American Innovation and Manufacturing (AIM Act). In the final rule "Phasedown of Hydrofluorocarbons: Management of Certain Hydrofluorocarbons and Substitutes Under the American Innovation and Manufacturing Act of 2020,"

(notified as G/TBT/N/USA/2242/Add.2) the EPA established, among other provisions, leak repair requirements for refrigerant-containing appliances with a charge size of 15 pounds or more that contain a hydrofluorocarbon (HFC) or certain substitutes for HFCs. The EPA intended to exempt refrigerant-containing road and intermodal container TRUs from the leak repair requirements and is issuing this proposal to clarify the applicability of these requirements. The EPA is not proposing other amendments or taking comment on any other aspects of the 2024 "Phasedown of Hydrofluorocarbons: Management of Certain Hydrofluorocarbons and Substitutes Under the American Innovation and Manufacturing Act of 2020."

Foam Fire-Extinguishing Systems

Notice of proposed rulemaking - The Coast Guard must approve marine foam fire-extinguishing systems. Currently, eight guidance documents set out the existing type approval criteria. The Coast Guard proposes to update and codify the type approval criteria to reflect current industry practices. Criteria updates would reflect advancements in technology, reduce certain testing and design requirements, and reduce the administrative burden on industry and the government. This deregulatory measure would result in cost savings for industry and the government.

Draft Decree on the Management of Cosmetics

1. This draft Decree regulates the management of cosmetics, including:

- a) Manufacture of cosmetics in Vietnam;
- b) Cosmetic product notification;
- c) Management of imported cosmetic products and issuance of Certificates of Free Sale for exported cosmetic products;
- d) Product Information Files (PIF), labeling and advertising of cosmetics;
- e) Inspection, surveillance and ensuring the safety and quality of cosmetic products;
- g) Recall of cosmetic products, revocation of the registration number of the cosmetic product declaration form, and cessation of receiving applications for cosmetic product declarations.

2. This draft Decree applies to domestic and foreign agencies, organizations, and individuals involved in activities related to cosmetic products in Vietnam, including: Manufacturing, distribution, trading, advertising, quality control, and services related to the supply and use of cosmetic products.

3. This Draft Decree consists of 09 Chapters and 49 Articles, specifically:

1. Chapter I – General Provisions consists of 04 Articles providing for:

Scope of regulation and subjects of application; Interpretation of terms; Principles for management of cosmetic product quality and safety; Implementation of administrative procedures and data management in the electronic environment.

2. Chapter II – Cosmetic Manufacturing in Vietnam consists of 08 Articles providing for:

- Cosmetic manufacturing establishments must satisfy requirements relating to personnel, facilities, equipment and quality management systems, and shall undergo periodic assessments every three years or extraordinary assessments where necessary.
- Consolidation of the conditions for issuance of the Certificate of Eligibility for Cosmetic Manufacturing and the CGMP Certificate into a single set of conditions.
- Full decentralization to provincial-level People's Committees for the issuance, amendment and revocation of Certificates of Eligibility for Cosmetic Manufacturing and CGMP Certificates.
- Specific provisions on cases of revocation of Certificates of Eligibility for Cosmetic Manufacturing.

3. Chapter III – Cosmetic Product Notification consists of 08 Articles providing for:

- Cosmetic products must be notified to the competent state authority before being placed on the market.
- Provisions on dossiers and procedures for cosmetic product notification and post-notification amendments.
- Following notification and disclosure of cosmetic product information, competent state authorities shall conduct post-notification dossier reviews and inspection and surveillance of cosmetic products circulating on the Vietnamese market.

4. Chapter IV – Management of Imported Cosmetic Products and Issuance of Certificates of Free Sale for Exported Cosmetic Products consists of 02 Articles providing for:

Imported cosmetic products must be notified prior to customs clearance, except for cases exempted from notification, such as imports for research or testing purposes, imports by diplomatic missions, or personal gifts not intended for commercial purposes...; Issuance of Certificates of Free Sale (CFS) for domestically manufactured cosmetic products intended for export.

5. Chapter V – Product Information File (PIF), Advertising and Labeling of Cosmetic Products consists of 04 Articles providing for:

- Cosmetic products circulated on the market must have a Product Information File (PIF) in accordance with ASEAN guidelines.
- Requirements for Safety Assessment Reports within the PIF in accordance with ASEAN guidelines.
- Labeling of cosmetic products shall comply with the laws on goods labeling, while mandatory labeling contents shall comply with the ASEAN Cosmetic Directive.
- Advertising of cosmetic products shall comply with the laws on advertising and shall not require prior content approval.

6. Chapter VI – Inspection, Surveillance and Assurance of Cosmetic Product Safety and Quality consists of 08 Articles providing for:

- Classification of risk levels according to cosmetic product categories; inspection and surveillance of the quality and safety of cosmetic products circulated on the market.
- Detailed provisions on post-notification dossier review and remote inspection of documents extracted from the PIF.
- Detailed provisions on specialized inspections at establishments. Contents already found compliant through remote inspections shall not be re-inspected, except where there are signs of violations or where verification of original documents and actual conditions at the establishment is necessary.
- Specific forms and contents of quality inspection and quality surveillance.
- Provisions on the adverse event reporting system for cosmetic products.

7. Chapter VII – Recall of Cosmetic Products, Withdrawal of Notification Numbers and Suspension of Acceptance of Notification Dossiers consists of 05 Articles providing for:

- Cases in which cosmetic products are subject to recall; cases of withdrawal of cosmetic product notification numbers and suspension of acceptance of cosmetic product notification dossiers.
- Forms, competence and responsibilities for cosmetic product recall.

8. Chapter VIII – Organization of Implementation consists of 06 Articles providing for:

Responsibilities of ministries, sectors, organizations and individuals involved in the manufacture and trading of cosmetic products.

9. Chapter IX – Implementation Provisions consists of 04 Articles providing for:

Implementation roadmap, transitional provisions, effective date, and responsibilities for implementation.

shields providing protection from flying objects and ultraviolet radiation- Respiratory protective equipment for workers (excluding medical masks): Respirator masks for particle filtering; Filters for use in masks and half-face respirators; - Hand and arm protective equipment for workers: Insulating gloves (excluding medical gloves, medical examination gloves)- Foot and leg protective equipment for workers: Safety shoes; insulating boots-Safety belts and personal fall-arrest systems for workers (excluding lifelines for emergency escape used in fire prevention and fighting activities).- Clothing to protect against heat and flame for worker- Lifts and their safety components, including: Doorlocks and cabin door locks; Safety gear; Lift machine braking system; Overspeed governor; Shock absorbers; Shut-off valves/check valves of hydraulic lifts- Escalators and passenger conveyors; safety components, including: Stopping and controlling braking systems for escalators or conveyors; Safety gear system; Traction machines (motors, gearboxes)- Cylinders and containers for compressed gas with nominal working pressure exceeding 0.7 bar- Vessels, reservoirs, vats and tankers with nominal working pressure exceeding 0,7 bar as classified in TCVN 8366:2010 (excluding disposable gas cylinders; returnable gas cylinders, vessels and tanks under temporary import for re-export or temporary export for re-import arrangements for containing imported or exported goods)- Refrigerating systems using refrigerants of B1; B2L; B2; B3; A2; A3 classes; A2L class (with charging amount of 05 kg or more), as classified in TCVN 6104-1,2,3,4:2015- Cranes- Bridge cranes and gantry cranes- Hoists- Cargo hoists (winches)- Engine-powered fork-lift trucks with lifting load of 1.000 kg or more- Lift tables and elevating work platforms for lifting people- Escalators- Electric liftsHS codes: 6506.10.20; 6506.10.30; 6506.10.90; 3926.90.42; 9004.90.50; 4203.29.10; 6116.10.90 6116.99.00; 6216.00.10; 6216.00.99; 6401 to 6405; 4205.00.20 6307.90.61 6307.90.69; 8428; 8431; 8402 to 8403; 7309, 3923.30.20 7613.00.00; 8415; 8418; 8426; 8427; 8428.

Draft Circular promulgating the List of Medium- and High-Risk Products and Goods under the management of the Ministry of Home Affairs.

This draft Circular promulgates the List of products and goods with medium and high risk levels under the state management responsibility of the Ministry of Home affairs and the corresponding quality management measures for products and goods on the List .Details of the List of products and goods with medium and high risk levels, corresponding HS codes and applicable national technical standards are specified in Appendix attached to this draft Circular.The draft Circular classifies into two risk categories: medium risk and high risk.This draft Circular applies to:1. Organizations and individuals producing and trading products and goods belonging to the list of products and goods with medium and high risk levels as stipulated in this Circular.2.
